|  |          |
|--|----------|
| <b>1 SCOPE.....</b>                                  | <b>2</b> |
| 1.1 SCOPE.....                                       | 2        |
| 1.2 AUDIENCE.....                                    | 2        |
| 1.3 PRE-REQUIRED KNOWLEDGE.....                      | 2        |
| 1.4 ACCESS TO HARDWARE INTERFACE.....                | 2        |
| 1.5 RELATED DOCUMENTS.....                           | 2        |
| <b>2 OPERATOR INTERFACE.....</b>                     | <b>4</b> |
| 2.1 INTRODUCTION.....                                | 4        |
| 2.2 CONNECT INTERFACE.....                           | 4        |
| 2.3 SCREEN DESCRIPTION.....                          | 4        |
| 2.4 EXECUTION MODES.....                             | 5        |
| 2.5 GETTING HELP.....                                | 5        |
| 2.6 TERMINAL KEY FUNCTION.....                       | 6        |
| 2.7 NOTATION CONVENTIONS.....                        | 6        |
| <b>3 COMMANDS DESCRIPTIONS.....</b>                  | <b>8</b> |
| 3.1 ENABLE MODE COMMANDS.....                        | 8        |
| 3.1.1 <i>exit</i> .....                              | 8        |
| 3.1.2 <i>configure terminal</i> .....                | 8        |
| 3.1.3 <i>enable</i> .....                            | 8        |
| 3.1.4 <i>Show terminal</i> .....                     | 8        |
| 3.1.5 <i>Show history</i> .....                      | 8        |
| 3.1.6 <i>Show clock</i> .....                        | 8        |
| 3.1.7 <i>Show clock detail</i> .....                 | 8        |
| 3.1.8 <i>load default</i> .....                      | 8        |
| 3.1.9 <i>save</i> .....                              | 8        |
| 3.1.10 <i>Reboot</i> .....                           | 9        |
| 3.1.11 <i>firmware application upgrade</i> .....     | 9        |
| 3.1.12 <i>ping ip</i> .....                          | 9        |
| 3.1.13 <i>show aaa</i> .....                         | 9        |
| 3.1.14 <i>show access management</i> .....           | 9        |
| 3.1.15 <i>show access-list</i> .....                 | 9        |
| 3.1.16 <i>show aggregation</i> .....                 | 10       |
| 3.1.17 <i>show alarm</i> .....                       | 10       |
| 3.1.18 <i>show cpu-load</i> .....                    | 10       |
| 3.1.19 <i>show build</i> .....                       | 10       |
| 3.1.20 <i>show command active timeout</i> .....      | 10       |
| 3.1.21 <i>show dot1x authentication method</i> ..... | 10       |
| 3.1.22 <i>show dot1x statistics</i> .....            | 11       |
| 3.1.23 <i>show drp</i> .....                         | 11       |
| 3.1.24 <i>show dt-ring</i> .....                     | 11       |
| 3.1.25 <i>show dt-ring config</i> .....              | 11       |
| 3.1.26 <i>show dt-ring-plus</i> .....                | 11       |
| 3.1.27 <i>show flash</i> .....                       | 11       |
| 3.1.28 <i>show gmrp</i> .....                        | 11       |
| 3.1.29 <i>show gmrp mac-address</i> .....            | 12       |
| 3.1.30 <i>show ip</i> .....                          | 12       |
| 3.1.31 <i>show ipmc</i> .....                        | 12       |
| 3.1.32 <i>show ipv6</i> .....                        | 12       |
| 3.1.33 <i>show lacp</i> .....                        | 12       |
| 3.1.34 <i>show line</i> .....                        | 13       |
| 3.1.35 <i>show lldp neighbors</i> .....              | 13       |
| 3.1.36 <i>show lldp statistics</i> .....             | 13       |

# 1 Scope

## 1.1 Scope

This user guide describes the commands and parameters of the Command Line Interface (CLI) as implemented in the current version of KYLAND series software. These commands are used to set-up, administer and maintain the system.

## 1.2 Audience

The guide is intended for Operating personnel (sometimes called craft persons).

## 1.3 Pre-required Knowledge

The reader must be familiar with the:

- Basic operations of KYLAND series (see the HW Installation Guide).
- Security and activity monitoring constraints that limit how a command is implemented.

## 1.4 Access to Hardware Interface

Access to the hardware interface is by a terminal (or computer with terminal emulation software). Requirements for the terminal are:

- RS-232 ASCII port
- Selectable transmission baud rate
- Full alphanumeric capability
- Selectable odd/even or no parity check

## 1.5 Related Documents

You may want to refer to the following related documents:

## 2 Operator Interface

### 2.1 Introduction

Access to the Switch is protected by a logon security system. You can log on to the switch with the user name and password. After three failed logon attempts, the system refuses further attempts.

After you log on, the system monitors the interface for periods of inactivity. If the interface is inactive for too long, you are automatically logged off.

The CLI initial user name is (admin) and password is (123). You should change the password as soon as possible, because the initial password is known to anyone who reads this manual. You can also change the user name or add additional user names. Use the "account add" command to enter a new user identification, password and authorization level.

### 2.2 Connect Interface

| Interface | Parameter   |
|-----------|---|
| Console   | Baud rate: 115200bps,<br>Data bit: 8,<br>Parity: None,<br>Stop bit: 1 |
| Telnet    | Port 23   |
| SSH       | Port 22 (In Windows, you can run terminal emulator such as PuTTY)     |

### 2.3 Screen Description

|   |
|---|
| <ol style="list-style-type: none"><li>1. Connecting to KYLAND Ethernet port(RJ45 Ethernet port)</li><li>2. Key-in the command under Telnet: <b>telnet 192.168.0.2</b></li><li>3. Login with default account and password.<br/><b>Username: admin</b><br/><b>Password: 123</b></li></ol> |
|---|

Figure 2-1 Screen Description

## 2.4 Execution Modes

The CLI contains several execution modes. Users will see different set of commands under different execution modes. Table 2-1 lists all the execution modes and their purposes. When users enter a certain execution mode, the corresponding mode prompt will be displayed automatically on the screen. The mode prompts of all the execution modes are also listed in Table 2-1.

Table 2-1 List of Execution Modes

| Mode                          | Access Level | Prompt                |
|-------------------------------|--------------|-----------------------|
| Init Mode                     | Guest        | >                     |
| Enable Mode                   | Guest        | #                     |
| Config Mode                   | Guest        | (conf)#               |
| Alarm Profile Config Mode     | Engineer     | (alarm-profile-conf)# |
| Gigabit Interface Config Mode | Engineer     | (gigabit-intf-conf)#  |
| ACL Profile Config Mode       | Engineer     | (acl-profile-conf)#   |
| scheduler Profile Config Mode | Engineer     | (sch-profile-conf)#   |
| Vlan Interface Config Mode    | Engineer     | (vlan-intf-conf)#     |

## 2.5 Getting help

The user can get help by entering a question mark '?' at each position in the command. The displayed result depends on the execution mode and previous input.

---

## 2.6 Terminal Key Function

Following is the list of all the terminal keys and their function.

Table 2-2 List of Terminal Keys

|               |  |
|---------------|--|
| ENTER         | Run a CLI config script  |
| CTRL-M        |  |
| TAB           | Tab completion.  |
| CTRL-I        | If tab is pressed after a non-whitespace character, complete the word before the Tab.<br>If tab is pressed after a whitespace character, complete the next word.   |
| ?             | Display available commands<br>If ? is pressed after a non-whitespace character, show possible choices for this word.<br>If ? is pressed after a whitespace character, show possible choices for the next word. |
| <Up Arrow>    | Up history   |
| CTRL-P        |  |
| <Down Arrow>  | Down history   |
| CTRL-N        |  |
| Home          | Move the cursor to the beginning of the input line   |
| CTRL-A        |  |
| End           | Move the cursor to the end of the input line   |
| CTRL-E        |  |
| <Left Arrow>  | Move the cursor backward   |
| CTRL-B        |  |
| <Right Arrow> | Move the cursor forward  |
| CTRL-F        |  |
| BACKSPACE     | Erase the character before the cursor  |
| CTRL-H        |  |

## 2.7 Notation Conventions

The notation conventions for the parameter syntax of each CLI command are as follows:

- Parameters enclosed in [ ] are optional.
- Parameter values are separated by a vertical bar “|” only when one of the specified values can be used.
- Parameter values are enclosed in { } when you must use one of the values specified.

## 3 Commands Descriptions

### 3.1 Enable Mode Commands

The commands in this section can be executed under enable command modes.

#### 3.1.1 exit

|                    |                                 |
|--------------------|---------------------------------|
| <b>Description</b> | Exit current mode and quit CLI. |
| <b>Syntax</b>      | exit                            |
| <b>Parameter</b>   | None                            |

#### 3.1.2 configure terminal

|                    |                           |
|--------------------|---------------------------|
| <b>Description</b> | Enter configuration mode. |
| <b>Syntax</b>      | configure terminal        |
| <b>Parameter</b>   | None                      |

#### 3.1.3 enable

|                    |                    |
|--------------------|--------------------|
| <b>Description</b> | Enter enable mode. |
| <b>Syntax</b>      | enable             |
| <b>Parameter</b>   | None               |

#### 3.1.4 Show terminal

|                    |                                |
|--------------------|--------------------------------|
| <b>Description</b> | Show CLI environment variables |
| <b>Syntax</b>      | show terminal                  |
| <b>Parameter</b>   | None                           |

#### 3.1.5 Show history

|                    |  |
|--------------------|--|
| <b>Description</b> | Show command history (Note: commands issued in one execution mode only appear in history of that execution mode) |
| <b>Syntax</b>      | show history   |
| <b>Parameter</b>   | None   |

#### 3.1.6 Show clock

|                    |                     |
|--------------------|---------------------|
| <b>Description</b> | Show current time   |
| <b>Syntax</b>      | show clock [detail] |
| <b>Parameter</b>   | None                |

#### 3.1.7 Show clock detail

|                    |                           |
|--------------------|---------------------------|
| <b>Description</b> | Show detailed information |
| <b>Syntax</b>      | show clock detail         |
| <b>Parameter</b>   | None                      |

#### 3.1.8 load default

|                    |                     |
|--------------------|---------------------|
| <b>Description</b> | Load default config |
| <b>Syntax</b>      | load default        |
| <b>Parameter</b>   | None                |

#### 3.1.9 save

|                    |                                      |
|--------------------|--------------------------------------|
| <b>Description</b> | Write running configuration to flash |
|--------------------|--------------------------------------|

|                  |      |
|------------------|------|
| <b>Syntax</b>    | save |
| <b>Parameter</b> | None |

### 3.1.10 Reboot

|                    |                |
|--------------------|----------------|
| <b>Description</b> | Reboot system. |
| <b>Syntax</b>      | reboot         |
| <b>Parameter</b>   | None           |

### 3.1.11 firmware application upgrade

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Use firmware upgrade to load new firmware image to the switch.        |  |
| <b>Syntax</b>      | firmware application upgrade { first   second   all   to-ram } <word> |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | first   | only upgrade the first application file.                         |
|                    | second  | only upgrade the second application file.                        |
|                    | all   | upgrade both application file.                                   |
|                    | to-ram  | upgrade application to ram and restart from ram, for debug only. |

### 3.1.12 ping ip

|                    |   |                                |
|--------------------|---|--------------------------------|
| <b>Description</b> | Check the status of Network.  |                                |
| <b>Syntax</b>      | ping ip <ipv4_addr> [ repeat <1-60> ] [ size <2-1452> ] [ interval <0-30> ] |                                |
| <b>Parameter</b>   |   |                                |
|                    | <b>Name</b>   | <b>Description</b>             |
|                    | ipv4_addr   | ICMP destination IPv4 address. |
|                    | repeat  | Specify repeat count.          |
|                    | size  | Specify datagram size.         |
|                    | interval  | Specify repeat interval.       |

### 3.1.13 show aaa

|                    |          |
|--------------------|----------|
| <b>Description</b> | Show AAA |
| <b>Syntax</b>      | show aaa |
| <b>Parameter</b>   | None     |

### 3.1.14 show access management

|                    |  |                               |
|--------------------|--|-------------------------------|
| <b>Description</b> | Access management configuration                          |                               |
| <b>Syntax</b>      | show access management [ statistics   <access_id_list> ] |                               |
| <b>Parameter</b>   |  |                               |
|                    | <b>Name</b>  | <b>Description</b>            |
|                    | statistics   | Statistics data               |
|                    | access_id_list   | ID of access management entry |

### 3.1.15 show access-list

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | Access list   |                                  |
| <b>Syntax</b>      | show access-list [ interface [ ( <port_type> [ <v_port_type_list> ] ) ] ] [ rate-limiter [ <rate_limiter_list> ] ] [ ace statistics [ <ace_list> ] ]<br><br>show access-list ace-status [ static ] [ link-oam ] [ loop-protect ] [ dhcp ] [ ptp ] [ upnp ] [ arp-inspection ] [ mep ] [ ipmc ] [ ip-source-guard ] [ ip-mgmt ] [ conflicts ] [ switch <switch_list> ] |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>   | <b>Description</b>               |
|                    | interface   | Select an interface to configure |

|  |                   |   |
|--|-------------------|---|
|  | ace-status        | The local ACEs status   |
|  | port_type         | GigabitEthernet, 1 Gigabit Ethernet Port                                      |
|  | v_port_type_list  | PORT_LIST, Port list in 1/1-14  |
|  | rate-limiter      | Rate limiter  |
|  | rate_limiter_list | <RateLimiterList : 1~16> Rate limiter ID                                      |
|  | ace               | Access list entry   |
|  | statistics        | Traffic statistics  |
|  | ace_list          | <AceId : 1~256> ACE ID  |
|  | static            | The ACEs that are configured by users manually                                |
|  | loop-protect      | The ACEs that are configured by Loop Protect module                           |
|  | ipmc              | The ACEs that are configured by IPMC module                                   |
|  | ip-source-guard   | The ACEs that are configured by IP Source Guard module                        |
|  | dhcp              | The ACEs that are configured by DHCP module                                   |
|  | conflicts         | The ACEs that did not get applied to the hardware due to hardware limitations |
|  | arp-inspection    | The ACEs that are configured by ARP Inspection module                         |

### 3.1.16 show aggregation

|                    |                           |                           |
|--------------------|---------------------------|---------------------------|
| <b>Description</b> | Aggregation               |                           |
| <b>Syntax</b>      | show aggregation [ mode ] |                           |
| <b>Parameter</b>   |                           |                           |
|                    | <b>Name</b>               | <b>Description</b>        |
|                    | mode                      | Traffic distribution mode |

### 3.1.17 show alarm

|                    |                                  |                                |
|--------------------|----------------------------------|--------------------------------|
| <b>Description</b> | Alarm information                |                                |
| <b>Syntax</b>      | show alarm { history   current } |                                |
| <b>Parameter</b>   |                                  |                                |
|                    | <b>Name</b>                      | <b>Description</b>             |
|                    | current                          | Show alarm current information |
|                    | history                          | Show alarm history information |

### 3.1.18 show cpu-load

|                    |                    |
|--------------------|--------------------|
| <b>Description</b> | Device information |
| <b>Syntax</b>      | show build         |
| <b>Parameter</b>   |                    |

### 3.1.19 show build

|                    |                        |
|--------------------|------------------------|
| <b>Description</b> | Device information     |
| <b>Syntax</b>      | show system cpu status |
| <b>Parameter</b>   |                        |

### 3.1.20 show command active timeout

|                    |                             |
|--------------------|-----------------------------|
| <b>Description</b> | Command active timeout      |
| <b>Syntax</b>      | show command active timeout |
| <b>Parameter</b>   |                             |

### 3.1.21 show dot1x authentication method

|                    |                                  |
|--------------------|----------------------------------|
| <b>Description</b> | dot1x authen method              |
| <b>Syntax</b>      | show dot1x authentication method |

|                  |  |
|------------------|--|
| <b>Parameter</b> |  |
|------------------|--|

### 3.1.22 show dot1x statistics

|                    |  |                           |
|--------------------|--|---------------------------|
| <b>Description</b> | dot1x statistics information   |                           |
| <b>Syntax</b>      | show dot1x statistics { eapol   radius   all} [ interface <port_type_list> ] |                           |
| <b>Parameter</b>   |  |                           |
|                    | <b>Name</b>  | <b>Description</b>        |
|                    | eapol  | EAPOL statistics          |
|                    | radius   | Backend Server statistics |
|                    | all  | all dot1x statistics      |
|                    | port_type_list   | Interface list            |

### 3.1.23 show drp

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | DRP config information.                              |                    |
| <b>Syntax</b>      | show drp [ domain <1-32> ] { configuration   state } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | domain   | Domain ID          |
|                    | configuration  | Configuration      |
|                    | state  | State              |

### 3.1.24 show dt-ring

|                    |                             |                    |
|--------------------|-----------------------------|--------------------|
| <b>Description</b> | dt-ring config information. |                    |
| <b>Syntax</b>      | show dt-ring <1-32>         |                    |
| <b>Parameter</b>   |                             |                    |
|                    | <b>Name</b>                 | <b>Description</b> |
|                    | <1-32>                      | dt-ringID          |

### 3.1.25 show dt-ring config

|                    |                             |  |
|--------------------|-----------------------------|--|
| <b>Description</b> | dt-ring config information. |  |
| <b>Syntax</b>      | show dt-ring config         |  |
| <b>Parameter</b>   |                             |  |

### 3.1.26 show dt-ring-plus

|                    |                                  |                    |
|--------------------|----------------------------------|--------------------|
| <b>Description</b> | dt-ring-plus config information. |                    |
| <b>Syntax</b>      | show dt-ring-plus [master]       |                    |
| <b>Parameter</b>   |                                  |                    |
|                    | <b>Name</b>                      | <b>Description</b> |
|                    | <1-32>                           | dt-ringID          |

### 3.1.27 show flash

|                    |                         |  |
|--------------------|-------------------------|--|
| <b>Description</b> | show FLASH information. |  |
| <b>Syntax</b>      | show flash              |  |
| <b>Parameter</b>   |                         |  |

### 3.1.28 show gmrp

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | gmrp information.                      |                    |
| <b>Syntax</b>      | show gmrp [interface <port_type_list>] |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                            | <b>Description</b> |
|                    | port_type_list                         | List of port ID    |

### 3.1.29 show gmrp mac-address

|                    |                                       |                            |
|--------------------|---------------------------------------|----------------------------|
| <b>Description</b> | Gmrp mac-address information.         |                            |
| <b>Syntax</b>      | show gmrp mac-address {agent dynamic} |                            |
| <b>Parameter</b>   |                                       |                            |
|                    | <b>Name</b>                           | <b>Description</b>         |
|                    | mac-address                           | Gmrp MAC addresses         |
|                    | agent                                 | Gmrp agent mac addresses   |
|                    | dynamic                               | Gmrp dynamic mac addresses |

### 3.1.30 show ip

|                    |                |                                       |
|--------------------|----------------|---------------------------------------|
| <b>Description</b> | IP information |                                       |
| <b>Syntax</b>      | show ip        |                                       |
| <b>Parameter</b>   |                |                                       |
|                    | <b>Name</b>    | <b>Description</b>                    |
|                    | arp            | Address Resolution Protocol           |
|                    | dhcp           | Dynamic Host Configuration Protocol   |
|                    | http           | Hypertext Transfer Protocol           |
|                    | igmp           | Internet Group Management Protocol    |
|                    | interface      | IP interface status and configuration |
|                    | name-server    | Domain Name System                    |
|                    | route          | Display the current ip routing table  |
|                    | source         | source command                        |
|                    | ssh            | Secure Shell                          |
|                    | statistics     | Traffic statistics                    |
|                    | verify         | verify command                        |

### 3.1.31 show ipmc

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | IPMC information  |  |
| <b>Syntax</b>      | show ipmc profile [ <profile_name> ] [ detail ]<br>show ipmc range [ <entry_name> ] |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                                       |
|                    | profile   | IPMC profile configuration                               |
|                    | range   | A range of IPv4/IPv6 multicast addresses for the profile |
|                    | profile_name  | <ProfileName : word16> Profile name in 16 char's         |
|                    | detail  | Detail information of a profile                          |
|                    | entry_name  | <EntryName : word16> Range entry name in 16 char's       |

### 3.1.32 show ipv6

|                    |                  |                                  |
|--------------------|------------------|----------------------------------|
| <b>Description</b> | IPv6 information |                                  |
| <b>Syntax</b>      | show ipv6        |                                  |
| <b>Parameter</b>   |                  |                                  |
|                    | <b>Name</b>      | <b>Description</b>               |
|                    | interface        | Select an interface to configure |
|                    | mld              | Multicasat Listener Discovery    |
|                    | neighbor         | IPv6 neighbors                   |
|                    | route            | IPv6 routes                      |
|                    | statistics       | Traffic statistics               |

### 3.1.33 show lacp

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | LACP information  |  |
| <b>Syntax</b>      | show lacp { internal   statistics   system-id   neighbour } |  |

| Parameter |            |                             |
|-----------|------------|-----------------------------|
|           | Name       | Description                 |
|           | internal   | Internal LACP configuration |
|           | neighbour  | Neighbour LACP status       |
|           | statistics | Internal LACP statistics    |
|           | system-id  | LACP system id              |

### 3.1.34 show line

| <b>Description</b> | Alive line information |                                       |
|--------------------|------------------------|---------------------------------------|
| <b>Syntax</b>      | show line [ alive ]    |                                       |
| <b>Parameter</b>   |                        |                                       |
|                    | Name                   | Description                           |
|                    | alive                  | Display information about alive lines |

### 3.1.35 show lldp neighbors

| <b>Description</b> | Shows the LLDP neighbors information.              |                       |
|--------------------|--|-----------------------|
| <b>Syntax</b>      | show lldp neighbors [ interface <port_type_list> ] |                       |
| <b>Parameter</b>   |  |                       |
|                    | Name   | Description           |
|                    | port_type_list                                     | Interface to display. |

### 3.1.36 show lldp statistics

| <b>Description</b> | Shows the LLDP statistics information.              |                       |
|--------------------|---|-----------------------|
| <b>Syntax</b>      | show lldp statistics [ interface <port_type_list> ] |                       |
| <b>Parameter</b>   |   |                       |
|                    | Name  | Description           |
|                    | port_type_list                                      | Interface to display. |

### 3.1.37 show logging

| <b>Description</b> | Logging information  |                                       |
|--------------------|--|---------------------------------------|
| <b>Syntax</b>      | show logging <log_id> [ switch <switch_list> ]<br>show logging [ info ] [ warning ] [ error ] [ switch <switch_list> ] |                                       |
| <b>Parameter</b>   |  |                                       |
|                    | Name   | Description                           |
|                    | log_id   | <logging_id: 1-4294967295> Logging ID |
|                    | error  | Error                                 |
|                    | info   | Information                           |
|                    | warning  | Warning                               |

### 3.1.38 show loop-protect

| <b>Description</b> | Loop protect information                                    |  |
|--------------------|---|--|
| <b>Syntax</b>      | show loop-protect [ interface ( <port_type> [ <plist> ] ) ] |  |
| <b>Parameter</b>   |   |  |
|                    | Name  | Description                              |
|                    | interface   | Interface status and configuration       |
|                    | port_type   | GigabitEthernet, 1 Gigabit Ethernet Port |
|                    | plist   | <port_type_list> Port list in 1/1-14     |

### 3.1.39 show manufacture information

|                    |                               |  |
|--------------------|-------------------------------|--|
| <b>Description</b> | show manufacture information. |  |
| <b>Syntax</b>      | show manufacture-information  |  |
| <b>Parameter</b>   | None                          |  |

### 3.1.40 show memory

|                    |                          |
|--------------------|--------------------------|
| <b>Description</b> | show memory information. |
| <b>Syntax</b>      | show memory              |
| <b>Parameter</b>   | None                     |

### 3.1.41 show monitor

|                    |  |                                    |
|--------------------|--|------------------------------------|
| <b>Description</b> | show monitor information.                      |                                    |
| <b>Syntax</b>      | show monitor [session {<uint>   all   remote}] |                                    |
| <b>Parameter</b>   |  |                                    |
|                    | <b>Name</b>                                    | <b>Description</b>                 |
|                    | monitor  | Monitoring different system events |
|                    | session  | MIRROR session                     |
|                    | all  | Show all MIRROR sessions           |
|                    | remote   | Show only Remote MIRROR sessions   |

### 3.1.42 show ntp status

|                    |                        |
|--------------------|------------------------|
| <b>Description</b> | Show SNTP information. |
| <b>Syntax</b>      | show sntp              |
| <b>Parameter</b>   | None                   |

### 3.1.43 show users

|                    |                    |
|--------------------|--------------------|
| <b>Description</b> | Show account list. |
| <b>Syntax</b>      | show users         |
| <b>Parameter</b>   | None               |

### 3.1.44 show running-config

|                    |                             |
|--------------------|-----------------------------|
| <b>Description</b> | Show running configuration. |
| <b>Syntax</b>      | show running-config         |
| <b>Parameter</b>   | None                        |

### 3.1.45 show running-config interface Gigabit

|                    |   |                                      |
|--------------------|---|--------------------------------------|
| <b>Description</b> | Show port config  |                                      |
| <b>Syntax</b>      | show running-config interface ( <port_type> [ <list> ] ) [ all-defaults ] |                                      |
| <b>Parameter</b>   |   |                                      |
|                    | <b>Name</b>   | <b>Description</b>                   |
|                    | list  | <port_type_list> Port list in 1/1-14 |
|                    | all-defaults  | Include most/all default values      |

### 3.1.46 show running-config interface vlan

|                    |   |
|--------------------|---|
| <b>Description</b> | Show default running configuration.                             |
| <b>Syntax</b>      | show running-config interface vlan <vlan_list> [ all-defaults ] |
| <b>Parameter</b>   | None  |

### 3.1.47 show running-config all-defaults

|                    |                                      |
|--------------------|--------------------------------------|
| <b>Description</b> | Show all default setting             |
| <b>Syntax</b>      | show running-config [ all-defaults ] |
| <b>Parameter</b>   | None                                 |

### 3.1.48 show running-config feature

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Show running config feature                                 |                    |
| <b>Syntax</b>      | show running-config feature <feature_name> [ all-defaults ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |

|  |              |   |
|--|--------------|---|
|  | feature_name | CWORD<br><br>Valid words are 'GVRP' 'access' 'access-list' 'aggregation' 'alm_profile' 'arp-inspection' 'auth' 'clock' 'dhcp' 'dhcp-snooping' 'dhcp_server' 'dns' 'dot1x' 'green-ethernet' 'http' 'icli' 'ip-igmp-snooping' 'ip-igmp-snooping-port' 'ip-igmp-snooping-vlan' 'ipmc-profile' 'ipmc-profile-range' 'ipv4' 'ipv6' 'ipv6-mld-snooping' 'ipv6-mld-snooping-port' 'ipv6-mld-snooping-vlan' 'lcp' 'lldp' 'logging' 'loop-protect' 'mac' 'monitor' 'mstp' 'mvr' 'mvr-port' 'ntp' 'phy' 'port' 'port-security' 'pvlan' 'qos' 'rmon' 'snmp' 'source-guard' 'ssh' 'tring_g1' 'tring_g2' 'tring_g3' 'user' 'vlan' 'voice-vlan' 'web-privilege-group-level' |
|  | all-defaults | Include most/all default values   |

### 3.1.49 show running-config line

|                    |  |                                   |
|--------------------|--|-----------------------------------|
| <b>Description</b> | Line information   |                                   |
| <b>Syntax</b>      | show running-config line { console   vty } <list> [ all-defaults ] |                                   |
| <b>Parameter</b>   |  |                                   |
|                    | <b>Name</b>  | <b>Description</b>                |
|                    | console  | Console                           |
|                    | vty  | VTY                               |
|                    | list   | <range_list> List of console/VTYs |
|                    | all-defaults   | Include most/all default values   |

### 3.1.50 show running-config vlan

|                    |  |                                  |
|--------------------|--|----------------------------------|
| <b>Description</b> | VLAN information                                 |                                  |
| <b>Syntax</b>      | show running-config vlan <list> [ all-defaults ] |                                  |
| <b>Parameter</b>   |  |                                  |
|                    | <b>Name</b>                                      | <b>Description</b>               |
|                    | list   | <vlan_list> List of VLAN numbers |
|                    | all-defaults                                     | Include most/all default values  |

### 3.1.51 show version

|                    |   |
|--------------------|---|
| <b>Description</b> | Show firmware hardware and software status update status. |
| <b>Syntax</b>      | show version  |
| <b>Parameter</b>   | None  |

### 3.1.52 show clock

|                    |                    |
|--------------------|--------------------|
| <b>Description</b> | Show current time. |
| <b>Syntax</b>      | Show clock         |
| <b>Parameter</b>   | None               |

### 3.1.53 show ddm

|                    |                                      |
|--------------------|--------------------------------------|
| <b>Description</b> | Show DDMI configuration              |
| <b>Syntax</b>      | show transceiver [ base   ddm ] info |
| <b>Parameter</b>   | None                                 |

### 3.1.54 show version

|                    |                           |
|--------------------|---------------------------|
| <b>Description</b> | Show version information. |
| <b>Syntax</b>      | show version              |
| <b>Parameter</b>   | None                      |

### 3.1.55 show mac address table

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | Show MAC information.   |                                  |
| <b>Syntax</b>      | show mac address-table [ conf   static   aging-time   { { learning   count } [ interface <port_type_list>   vlan <vlan_id> ] }   { address <mac_addr> [ vlan <vlan_id> ] }   vlan <vlan_id>   interface <port_type_list>   dynamic   unicast   multicast] |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>   | <b>Description</b>               |
|                    | conf  | User added static mac addresses  |
|                    | static  | All static mac addresses         |
|                    | aging-time  | Aging time                       |
|                    | learning  | Learn/disable/secure state       |
|                    | count   | Total number of mac addresses    |
|                    | interface   | Select an interface to configure |
|                    | vlan  | Addresses in this VLAN           |
|                    | address   | MAC address lookup               |
|                    | dynamic   | All dynamic mac addresses        |
|                    | unicast   | All unicast mac addresses        |
|                    | multicast   | All multicast mac addresses      |

### 3.1.56 show mvr

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | MVR information  |  |
| <b>Syntax</b>      | show mvr [ vlan <v_vlan_list>   name <mvr_name> ] [ group-database [ interface ( <port_type> [ <v_port_type_list> ) ] ] [ sfm-information ] ] [ detail ] |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                                     |
|                    | vlan   | Search by VLAN   |
|                    | v_vlan_list  | <vlan_list> MVR multicast VLAN list                    |
|                    | name   | Search by MVR name                                     |
|                    | mvr_name   | <MvrName : word16> MVR multicast VLAN name             |
|                    | group-database   | Multicast group database from MVR                      |
|                    | interface  | Search by port   |
|                    | port_type  | GigabitEthernet, 1 Gigabit Ethernet Port               |
|                    | v_port_type_list   | PORT_LIST, Port list in 1/1-14                         |
|                    | sfm-information  | Including source filter multicast information from MVR |
|                    | detail   | Detail information/statistics of MVR group database    |

### 3.1.57 show interface port < port\_type\_list >

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Show interface information per \port.                  |   |
| <b>Syntax</b>      | show interface <port_type> [ <port_type_list> ] status |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                                    |
|                    | <port_type>  | Port type in Fast, Giga or Tengiga ethernet           |
|                    | <portNo>   | <b>Valid values:</b> 1 ~ 10<br><b>Type:</b> Mandatory |

### 3.1.58 show interface port <portNo> statistics

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Show Ethernet counter per gigabit port.                    |   |
| <b>Syntax</b>      | show interface <port_type> [ <port_type_list> ] statistics |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                                    |
|                    | <port_type>  | Port type in Fast, Giga or Tengiga ethernet           |
|                    | <portNo>   | <b>Valid values:</b> 1 ~ 10<br><b>Type:</b> Mandatory |
|                    | counter  | Show Gigabit Ethernet counter.                        |

### 3.1.59 show platform phy

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | PHYs' information  |  |
| <b>Syntax</b>      | show platform phy [ interface ( <port_type> [ <v_port_type_list> ] ) ]<br><br>show platform phy id [ interface ( <port_type> [ <v_port_type_list> ] ) ]<br><br>show platform phy instance<br><br>show platform phy status [ interface ( <port_type> [ <v_port_type_list> ] ) ] |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                       |
|                    | id   | ID                                       |
|                    | instance   | PHY Instance Information                 |
|                    | status   | Status                                   |
|                    | interface  | Interface                                |
|                    | port_type  | GigabitEthernet, 1 Gigabit Ethernet Port |
|                    | v_port_type_list   | PORT_LIST, Port list in 1/1-14           |

### 3.1.60 show poe

|                    |   |                                |
|--------------------|---|--------------------------------|
| <b>Description</b> | Show PoE status and information for each port       |                                |
| <b>Syntax</b>      | show poe [ interface <port_type_list>   extension ] |                                |
| <b>Parameter</b>   |   |                                |
|                    | <b>Name</b>   | <b>Description</b>             |
|                    | poe   | Power over Ethernet            |
|                    | port_type_list                                      | PORT_LIST, Port list in 1/1-14 |
|                    | extension   | Extend infomation              |

### 3.1.61 show port-security

|                    |                    |   |
|--------------------|--------------------|---|
| <b>Description</b> | Port security      |   |
| <b>Syntax</b>      | show port-security |   |
| <b>Parameter</b>   |                    |   |
|                    | <b>Name</b>        | <b>Description</b>                          |
|                    | port               | Show MAC Addresses learned by Port Security |
|                    | switch             | Show Port Security status                   |
|                    | interface          | Interface                                   |
|                    | port_type          | GigabitEthernet, 1 Gigabit Ethernet Port    |
|                    | v_port_type_list   | PORT_LIST, Port list in 1/1-14              |

### 3.1.62 show process

|                    |                              |
|--------------------|------------------------------|
| <b>Description</b> | Show current state of system |
|--------------------|------------------------------|

|                  |              |   |
|------------------|--------------|---|
| <b>Syntax</b>    | show process |   |
| <b>Parameter</b> |              |   |
|                  | <b>Name</b>  | <b>Description</b>  |
|                  | load         | Show current CPU load: 100ms, 1s and 10s running average (in percent, zero is idle) |
|                  | list         | Show current state of system threads  |
|                  | detail       | optionally show thread call stack   |

### 3.1.63 show ptp

|                    |                       |  |
|--------------------|-----------------------|--|
| <b>Description</b> | Show PTP data         |  |
| <b>Syntax</b>      | show ptp              |  |
| <b>Parameter</b>   |                       |  |
|                    | <b>Name</b>           | <b>Description</b>                                       |
|                    | <0-3>                 | various PTP data   |
|                    | system-time           | the PTP <-> system time synchronization mode.            |
|                    | default               | PTP default data set (IEEE1588 paragraph 8.2.1).         |
|                    | current               | PTP current data set (IEEE1588 paragraph 8.2.2).         |
|                    | parent                | PTP parent data set (IEEE1588 paragraph 8.2.3).          |
|                    | time-property         | PTP time properties data set (IEEE1588 paragraph 8.2.4). |
|                    | filter                | PTP filter parameters.                                   |
|                    | servo                 | PTP servo parameters.                                    |
|                    | servo-extended        | PTP servo extended parameters.                           |
|                    | clk                   | PTP slave clock options parameters.                      |
|                    | ho                    | PTP slave holdover parameters.                           |
|                    | uni                   | PTP slave unicast configuration parameters.              |
|                    | master-table-unicast  | PTP master list of connected unicast slaves.             |
|                    | slave                 | PTP slave clock lock threshold parameters.               |
|                    | port-state            | PTP port state.  |
|                    | port-ds               | PTP port data set (IEEE1588 paragraph 8.2.5).            |
|                    | wireless              | PTP port wireless parameters.                            |
|                    | foreign-master-record | PTP port foreign masters.                                |

### 3.1.64 show sntp

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | Show sntp status information. |
| <b>Syntax</b>      | show sntp status              |
| <b>Parameter</b>   | None                          |

### 3.1.65 show ssh public-key

|                    |                          |                    |
|--------------------|--------------------------|--------------------|
| <b>Description</b> | Show system information. |                    |
| <b>Syntax</b>      | show system              |                    |
| <b>Parameter</b>   |                          |                    |
|                    | <b>Name</b>              | <b>Description</b> |
|                    | cpu                      | CPU                |
|                    | led                      | led                |
|                    | status                   | status             |

### 3.1.66 show system

|                    |                                       |                    |
|--------------------|---------------------------------------|--------------------|
| <b>Description</b> | Show ssh public-key information.      |                    |
| <b>Syntax</b>      | show ssh public-key [name <word3-20>] |                    |
| <b>Parameter</b>   |                                       |                    |
|                    | <b>Name</b>                           | <b>Description</b> |

|  |            |                           |
|--|------------|---------------------------|
|  | name       | detail of the key by name |
|  | <word3-20> | public key name           |

### 3.1.67 show sflow

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Sflow information  |  |
| <b>Syntax</b>      | <pre>show sflow show sflow statistics { receiver [ &lt;rcvr_idx_list&gt; ]   samplers [ interface [ &lt;samplers_list&gt; ] ( &lt;port_type&gt; [ &lt;v_port_type_list&gt; ] ) ] }</pre> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                       |
|                    | receiver   | Show statistics for receiver             |
|                    | samplers   | Show statistics for samplers             |
|                    | interface  | Interface                                |
|                    | port_type  | GigabitEthernet, 1 Gigabit Ethernet Port |
|                    | v_port_type_list   | <port_type_list> Port list in 1/1-14     |

### 3.1.68 show snmp

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | SNMP information  |  |
| <b>Syntax</b>      | <pre>show snmp show snmp access [ &lt;group_name&gt; { v1   v2c   v3   any } { auth   noauth   priv } ] show snmp community v3 [ &lt;community&gt; ] show snmp host [ &lt;conf_name&gt; ] [ system ] [ switch ] [ interface ] [ aaa ] show snmp mib context show snmp mib ifmib ifIndex show snmp security-to-group [ { v1   v2c   v3 } &lt;security_name&gt; ] show snmp user [ &lt;username&gt; &lt;engineID&gt; ] show snmp view [ &lt;view_name&gt; &lt;oid_subtree&gt; ]</pre> |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                                 |
|                    | access  | access configuration                               |
|                    | group_name  | <GroupName : word32> group name                    |
|                    | any   | any security model                                 |
|                    | v1  | v1 security model                                  |
|                    | v2c   | v2c security model                                 |
|                    | v3  | v3 security model                                  |
|                    | auth  | authNoPriv Security Level                          |
|                    | noauth  | noAuthNoPriv Security Level                        |
|                    | priv  | authPriv Security Level                            |
|                    | community   | Community  |
|                    | community   | <Community : word127> Specify community name       |
|                    | host  | Set SNMP host's configurations                     |
|                    | conf_name   | <ConfName : word32> Name of the host configuration |
|                    | aaa   | AAA event group                                    |

| Parameter |          |  |
|-----------|----------|--|
|           | Name     | Description  |
|           | <vlanid> | <b>Valid values:</b> 1~4094<br><b>Type:</b> Mandatory. |

### 3.1.74 show vlan name

| <b>Description</b> | Show bridge port member set/status per VLAN name ( 32 words ). |  |
|--------------------|--|--|
| <b>Syntax</b>      | show vlan name <vword32>                                       |  |
| <b>Parameter</b>   |  |  |
|                    | Name   | Description  |
|                    | < vword32>   | <b>Valid values:</b> 32 words<br><b>Type:</b> Mandatory. |

### 3.1.75 show vlan brief

| <b>Description</b> | VLAN summary information                           |                             |
|--------------------|--|-----------------------------|
| <b>Syntax</b>      | show vlan [ id <vlan_list>   name <name>   brief ] |                             |
| <b>Parameter</b>   |  |                             |
|                    | Name   | Description                 |
|                    | id   | VLAN status by VLAN id      |
|                    | vlan_list  | <vlan_list> VLAN IDs 1-4095 |
|                    | name   | VLAN status by VLAN name    |
|                    | name   | <vword32> A VLAN name       |
|                    | brief  | VLAN summary information    |

### 3.1.76 show vlan ip-subnet

| <b>Description</b> | Show VLAN ip-subnet entries            |  |
|--------------------|--|--|
| <b>Syntax</b>      | show vlan ip-subnet [ id <subnet_id> ] |  |
| <b>Parameter</b>   |  |  |
|                    | Name                                   | Description                            |
|                    | id                                     | Show a specific ip-subnet entry        |
|                    | subnet_id                              | <1-128> The specific ip-subnet to show |

### 3.1.77 show vlan mac

| <b>Description</b> | Show VLAN MAC entries                |  |
|--------------------|--------------------------------------|--|
| <b>Syntax</b>      | show vlan mac [ address <mac_addr> ] |  |
| <b>Parameter</b>   |                                      |  |
|                    | Name                                 | Description                                |
|                    | address                              | Show a specific MAC entry                  |
|                    | mac_addr                             | <mac_ucast> The specific MAC entry to show |

### 3.1.78 show vlan protocol

| <b>Description</b> | Protocol-based VLAN status   |   |
|--------------------|--|---|
| <b>Syntax</b>      | show vlan protocol [ eth2 { <etype>   arp   ip   ipx   at } ] [ snap { <oui>   rfc-1042   snap-8021h } <pid> ] [ llc <dsap> <ssap> ] |   |
| <b>Parameter</b>   |  |   |
|                    | Name   | Description                                     |
|                    | eth2   | Ethernet protocol based VLAN status             |
|                    | etype  | 0x600-0xffff> Ether Type(Range: 0x600 - 0xFFFF) |
|                    | arp  | Ether Type is ARP                               |
|                    | ip   | Ether Type is IP                                |
|                    | ipx  | Ether Type is IPX                               |
|                    | at   | Ether Type is AppleTalk                         |
|                    | llc  | LLC-based VLAN status                           |

|  |            |  |
|--|------------|--|
|  | dsap       | <0x0-0xff> DSAP (Range: 0x00 - 0xFF)               |
|  | ssap       | <0x0-0xff> SSAP (Range: 0x00 - 0xFF)               |
|  | snap       | SNAP-based VLAN status                             |
|  | oui        | <0x0-0xfffff> SNAP OUI (Range 0x000000 - 0FFFFFFF) |
|  | rfc-1042   | SNAP OUI is rfc-1042                               |
|  | snap-8021h | SNAP OUI is 8021h                                  |

### 3.1.79 show vlan status

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Show the VLANs configured for each interface  |   |
| <b>Syntax</b>      | show vlan status [ interface ( <port_type> [ <plist> ] ) ] [ combined   admin   nas   mvr   voice-vlan   mstp   erps   vcl   evc   gvrp   all   conflicts ] |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                                    |
|                    | admin   | Show the VLANs configured by administrator            |
|                    | all   | Show all VLANs configured                             |
|                    | combined  | Show the VLANs configured by a combination            |
|                    | conflicts   | Show VLANs configurations that has conflicts          |
|                    | gvrp  | Show the VLANs configured by GVRP                     |
|                    | interface   | Show the VLANs configured for a specific interface(s) |
|                    | mstp  | Show the VLANs configured by MSTP.                    |
|                    | mvr   | Show the VLANs configured by MVR                      |
|                    | nas   | Show the VLANs configured by NAS                      |
|                    | vcl   | Show the VLANs configured by VCL                      |

### 3.1.80 show qos-queue-mapping

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | Show CoS queue mapping table. |
| <b>Syntax</b>      | show qos maps                 |
| <b>Parameter</b>   | None                          |

### 3.1.81 show interface ports <portNo> priority

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Show QoS per gigabit port.  |   |
| <b>Syntax</b>      | show interface <port_type> [ <port_type_list> ] statistics { priority [ <0~7> ] } |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                                    |
|                    | priority [ <0~7> ]  | <b>Valid values:</b> 0 ~7<br><b>Type:</b> Mandatory   |
|                    | <port_type>   | Port type in Fast, Giga or Tenga ethernet             |
|                    | <portNo>  | <b>Valid values:</b> 0 ~ 10<br><b>Type:</b> Mandatory |

### 3.1.82 show pvlan [ <pvlan\_list> ]

|                    |                             |                                    |
|--------------------|-----------------------------|------------------------------------|
| <b>Description</b> | PVLAN ID                    |                                    |
| <b>Syntax</b>      | show pvlan [ <pvlan_list> ] |                                    |
| <b>Parameter</b>   |                             |                                    |
|                    | <b>Name</b>                 | <b>Description</b>                 |
|                    | pvlan_list                  | PVLAN ID to show configuration for |

### 3.1.83 show pvlan isolation [ interface <port\_type> [ <port\_type\_list> ] ]

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Show all port isolation information.                                |   |
| <b>Syntax</b>      | show pvlan isolation [ interface <port_type> [ <port_type_list> ] ] |   |
| <b>Parameter</b>   | None  |   |
|                    | <b>Name</b>   | <b>Description</b>                                    |
|                    | <port_type>   | Port type in Fast, Giga or Tengiga ethernet           |
|                    | <portNo>  | <b>Valid values:</b> 1 ~ 10<br><b>Type:</b> Mandatory |

### 3.1.84 show interface gigabit <portNo> port-isolation

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Show isolation information per gigabit port.                        |   |
| <b>Syntax</b>      | show pvlan isolation [ interface <port_type> [ <port_type_list> ] ] |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                                    |
|                    | <portNo>  | <b>Valid values:</b> 1 ~ 10<br><b>Type:</b> Mandatory |

### 3.1.85 show qos interface

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | QoS interface information                                 |  |
| <b>Syntax</b>      | show qos [ { interface [ ( <port_type> [ <port> ] ) ] } ] |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                       |
|                    | interface   | Interface                                |
|                    | port_type   | GigabitEthernet, 1 Gigabit Ethernet Port |
|                    | port  | PORT_LIST, Port list in 1/1-14           |

### 3.1.86 show qos maps

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | MAPS  |                                  |
| <b>Syntax</b>      | show qos maps { maps [ dscp-cos ] [ dscp-ingress-translation ] [ dscp-classify ] [ cos-dscp ] [ dscp-egress-translation ] } |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>   | <b>Description</b>               |
|                    | cos-dscp  | Map for cos to dscp              |
|                    | dscp-classify   | Map for dscp classify enable     |
|                    | dscp-cos  | Map for dscp to cos              |
|                    | dscp-egress-translation   | Map for dscp egress translation  |
|                    | dscp-ingress-translation  | Map for dscp ingress translation |

### 3.1.87 show qos qce

|                    |                            |                     |
|--------------------|----------------------------|---------------------|
| <b>Description</b> | QCE                        |                     |
| <b>Syntax</b>      | show qos { qce [ <qce> ] } |                     |
| <b>Parameter</b>   |                            |                     |
|                    | <b>Name</b>                | <b>Description</b>  |
|                    | qce                        | <Id : 1-256> QCE ID |

### 3.1.88 show qos storm

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Show storm control information by VLAN. |  |
| <b>Syntax</b>      | show qos storm                          |  |
| <b>Parameter</b>   |   |  |

### 3.1.89 show rmon

| <b>Description</b> |   |      |             |       |                              |       |                              |         |                                |            |                                   |         |                                  |
|--------------------|---|------|-------------|-------|------------------------------|-------|------------------------------|---------|--------------------------------|------------|-----------------------------------|---------|----------------------------------|
| <b>Syntax</b>      | show rmon alarm [ <id_list> ]<br>show rmon event [ <id_list> ]<br>show rmon history [ <id_list> ]<br>show rmon statistics [ <id_list> ]   |      |             |       |                              |       |                              |         |                                |            |                                   |         |                                  |
| <b>Parameter</b>   |   |      |             |       |                              |       |                              |         |                                |            |                                   |         |                                  |
|                    | <table border="1"> <thead> <tr> <th>Name</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>alarm</td> <td>Display the RMON alarm table</td> </tr> <tr> <td>event</td> <td>Display the RMON event table</td> </tr> <tr> <td>history</td> <td>Display the RMON history table</td> </tr> <tr> <td>statistics</td> <td>Display the RMON statistics table</td> </tr> <tr> <td>id_list</td> <td>&lt;1~65535&gt;, Statistics entry list</td> </tr> </tbody> </table> | Name | Description | alarm | Display the RMON alarm table | event | Display the RMON event table | history | Display the RMON history table | statistics | Display the RMON statistics table | id_list | <1~65535>, Statistics entry list |

### 3.1.90 show interface vlan

|                    |   |
|--------------------|---|
| <b>Description</b> | Show VLAN interface information of all VLANs. |
| <b>Syntax</b>      | show interface vlan                           |
| <b>Parameter</b>   | None  |

### 3.1.91 show interface vlan <vlanid>

| <b>Description</b> | Show VLAN interface information of specify VLAN.  |      |             |          |   |
|--------------------|---|------|-------------|----------|---|
| <b>Syntax</b>      | show interface vlan <vlanid>  |      |             |          |   |
| <b>Parameter</b>   |   |      |             |          |   |
|                    | <table border="1"> <thead> <tr> <th>Name</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>&lt;vlanid&gt;</td> <td>VLAN ID.<br/><b>Valid values:</b> 1 ~ 4094<br/><b>Type:</b> Mandatory</td> </tr> </tbody> </table> | Name | Description | <vlanid> | VLAN ID.<br><b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory |
| Name               | Description   |      |             |          |   |
| <vlanid>           | VLAN ID.<br><b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory   |      |             |          |   |

### 3.1.92 show dot1x status

|                    |   |
|--------------------|---|
| <b>Description</b> | Show dot1x stats.   |
| <b>Syntax</b>      | show dot1x status [ interface <port_type> [ <port_type_list> ] ]<br>[ brief ] |
| <b>Parameter</b>   | None  |

### 3.1.93 show dot1x statistics

| <b>Description</b> | Show dot1x statistics  |      |             |     |                           |       |                       |        |                                |           |           |           |  |                  |                                |
|--------------------|--|------|-------------|-----|---------------------------|-------|-----------------------|--------|--------------------------------|-----------|-----------|-----------|--|------------------|--------------------------------|
| <b>Syntax</b>      | show dot1x statistics { eapol   radius   all } [ interface ( <port_type> [ <v_port_type_list> ] ) ]  |      |             |     |                           |       |                       |        |                                |           |           |           |  |                  |                                |
| <b>Parameter</b>   |  |      |             |     |                           |       |                       |        |                                |           |           |           |  |                  |                                |

|                    | level   | Web privilege group level   |

### 3.1.96 show link state track

|                    |  |                              |
|--------------------|--|------------------------------|
| <b>Description</b> | Monitor link state track                   |                              |
| <b>Syntax</b>      | show link state track [group <group_num> ] |                              |
| <b>Parameter</b>   |  |                              |
|                    | <b>Name</b>                                | <b>Description</b>           |
|                    | group_num                                  | Link state track group <1-2> |

### 3.1.97 show udd

|                    |                          |                    |
|--------------------|--------------------------|--------------------|
| <b>Description</b> | Monitor udd              |                    |
| <b>Syntax</b>      | show udd [ <port_list> ] |                    |
| <b>Parameter</b>   |                          |                    |
|                    | <b>Name</b>              | <b>Description</b> |
|                    | <port_list>              | port list          |

## 3.2 Configure Mode Commands

Commands that can be executed under Configure Mode

### 3.2.1 interface gigabit <portNo>

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Gigabit Ethernet interface. (enter gigabit interface mode) |   |
| <b>Syntax</b>      | interface gigabit <portNo>                                 |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                                    |
|                    | <portNo>   | <b>Valid values:</b> 1 ~ 10<br><b>Type:</b> Mandatory |

### 3.2.2 interface vlan <vlanid>

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Vlan Ethernet interface (enter mode of interface vlan) |   |
| <b>Syntax</b>      | interface vlan <vlanid>                                |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                                      |
|                    | <vlanid>   | <b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory |

### 3.2.3 aaa authentication login

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Use the aaa authentication login command to configure the authentication methods.              |                    |
| <b>Syntax</b>      | aaa authentication login { console   telnet   ssh   http } { [ local   radius   tacacs ] ... } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | authentication   | Authentication     |

### 3.2.4 aaa accounting

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Use the aaa accounting command to configure the accounting methods.               |                    |
| <b>Syntax</b>      | aaa accounting { console   telnet   ssh } tacacs { [ commands <0-15> ] [ exec ] } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | accounting  | Accounting         |

### 3.2.5 aaa authorization

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Use the aaa authorization command to configure the authorization methods.               |                    |
| <b>Syntax</b>      | aaa authorization { console   telnet   ssh } tacacs commands <0-15> [ config-commands ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | authorization   | Authorization      |

### 3.2.6 access

|                    |                          |                                 |
|--------------------|--------------------------|---------------------------------|
| <b>Description</b> | Management configuration |                                 |
| <b>Syntax</b>      | access management        |                                 |
| <b>Parameter</b>   |                          |                                 |
|                    | <b>Name</b>              | <b>Description</b>              |
|                    | management               | Access management configuration |

### 3.2.7 access-list

|                    |                               |   |
|--------------------|-------------------------------|---|
| <b>Description</b> | Enter Acl Profile Config Mode |   |
| <b>Syntax</b>      | profile acl                   |   |
| <b>Parameter</b>   | <b>Name</b>                   | <b>Description</b>                                      |
|                    | <vlanid>                      | <b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory |
| <b>Parameter</b>   | None                          |   |

### 3.2.8 address-conflict-detect state

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set ip mac address conflict detect         |                    |
| <b>Syntax</b>      | address-conflict-detect {enable   disable} |                    |
| <b>Parameter</b>   | <b>Name</b>                                | <b>Description</b> |
|                    | enable                                     | Enable detect      |
|                    | disable                                    | Disable detect     |

### 3.2.9 address-conflict-detect interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | set ip mac address conflict detect interval timer |                    |
| <b>Syntax</b>      | address-conflict-detect interval <180-600>        |                    |
| <b>Parameter</b>   | <b>Name</b>                                       | <b>Description</b> |

### 3.2.10 aggregation mode

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Traffic distribution mode                    |  |
| <b>Syntax</b>      | aggregation mode { dmac   ip   port   smac } |  |
| <b>Parameter</b>   | <b>Name</b>                                  | <b>Description</b>                       |
|                    | dmac   | Destination MAC affects the distribution |
|                    | ip   | IP address affects the distribution      |
|                    | port   | IP port affects the distribution         |
|                    | smac   | Source MAC affects the distribution      |

### 3.2.11 alarm port-alarm

|                    |                      |                    |
|--------------------|----------------------|--------------------|
| <b>Description</b> | set port alarm state |                    |
| <b>Syntax</b>      | alarm port-alarm     |                    |
| <b>Parameter</b>   | <b>Name</b>          | <b>Description</b> |
|                    | crc-err              | Crc error          |
|                    | input-rate           | Input rate         |
|                    | linkdown             | Link down          |
|                    | output-rate          | Output rate        |
|                    | pkt-loss             | Packet loss        |

### 3.2.12 alarm cpu-usage

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | set cpu alarm state   |                         |
| <b>Syntax</b>      | alarm cpu-usage { enable [ threshold <50-100> margin <1-20> ]   disable } |                         |
| <b>Parameter</b>   | <b>Name</b>   | <b>Description</b>      |
|                    | enable  | Enable cpu usage alarm  |
|                    | threshold   | Threshold               |
|                    | margin  | Margin                  |
|                    | disable   | Disable cpu usage alarm |

### 3.2.13 alarm drp state

|                    |                     |  |
|--------------------|---------------------|--|
| <b>Description</b> | set drp alarm state |  |
|--------------------|---------------------|--|

|                  |                                      |                    |
|------------------|--------------------------------------|--------------------|
| <b>Syntax</b>    | alarm drp <1-32> { enable   disable} |                    |
| <b>Parameter</b> |                                      |                    |
|                  | <b>Name</b>                          | <b>Description</b> |
|                  | <1-32>                               | Domain id <1-32>   |
|                  | enable                               | Enable alarm       |
|                  | disable                              | Disable alarm      |

### 3.2.14 alarm dt-ring state

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set dt-ring alarm state                  |                    |
| <b>Syntax</b>      | alarm dt-ring <1-32> { enable   disable} |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                              | <b>Description</b> |
|                    | <1-32>                                   | Domain id <1-32>   |
|                    | enable                                   | Enable alarm       |
|                    | disable                                  | Disable alarm      |

### 3.2.15 alarm mem

|                    |   |                            |
|--------------------|---|----------------------------|
| <b>Description</b> | set memory alarm state  |                            |
| <b>Syntax</b>      | alarm memory-usage { enable [ threshold <50-100> margin <1-20> ]   disable} |                            |
| <b>Parameter</b>   |   |                            |
|                    | <b>Name</b>   | <b>Description</b>         |
|                    | enable  | Enable memory usage alarm  |
|                    | threshold   | Threshold                  |
|                    | margin  | Margin                     |
|                    | disable   | Disable memory usage alarm |

### 3.2.16 alarm power

|                    |                                 |                    |
|--------------------|---------------------------------|--------------------|
| <b>Description</b> | set power alarm state           |                    |
| <b>Syntax</b>      | alarm power { enable   disable} |                    |
| <b>Parameter</b>   |                                 |                    |
|                    | <b>Name</b>                     | <b>Description</b> |
|                    | enable                          | Enable alarm       |
|                    | disable                         | Disable alarm      |

### 3.2.17 set transceiver alarm enable

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set transceive alarm state                 |                    |
| <b>Syntax</b>      | alarm transceive hard { enable   disable } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                | <b>Description</b> |
|                    | enable                                     | Enable alarm       |
|                    | disable                                    | Disable alarm      |

### 3.2.18 set transceiver soft alarm enable

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set transceive alarm state   |                    |
| <b>Syntax</b>      | alarm transceive soft-rx interface <port_type_list> { disable   enable [ threshold <-400-82> ] } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | port_type_list   | Sfp interface      |
|                    | disable  | Disable alarm      |
|                    | enable   | Enable             |
|                    | threshold  | Threshold          |

### 3.2.19 banner

|                    |                                       |  |
|--------------------|---------------------------------------|--|
| <b>Description</b> | Banner control                        |  |
| <b>Syntax</b>      | banner { LINE   exec   login   motd } |  |
| <b>Parameter</b>   |                                       |  |
|                    | <b>Name</b>                           | <b>Description</b>                                   |
|                    | LINE                                  | c banner-text c, where 'c' is a delimiting character |
|                    | exec                                  | Set EXEC process creation banner                     |
|                    | login                                 | Set login banner                                     |
|                    | motd                                  | Set Message of the Day banner                        |

### 3.2.20 default access-list rate-limiter

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Rate limiter   |                    |
| <b>Syntax</b>      | default access-list rate-limiter [ <rate_limiter_list> ] |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | RateLimiterId :  | Rate limiter ID    |
|                    | 1-16   |                    |

### 3.2.21 clock timezone

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Set time zone.                              |   |
| <b>Syntax</b>      | clock timezone <word16> <-23-23> [ <0-59> ] |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>                                 | <b>Description</b>  |
|                    | < word16>                                   | <b>Valid values:</b> please see ' <a href="#">list timezone</a> '<br><b>Type:</b> Mandatory |
|                    | default                                     | Set time zone to default (GMT/UTC).<br><b>Type:</b> Mandatory                               |

### 3.2.22 clock summer-time set [start-time] [end-time]

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Set date/time.   |   |
| <b>Syntax</b>      | clock summer-time <word16> date [ <1-12> <1-31> <2000-2097> <hhmm> <1-12> <1-31> <2000-2097> <hhmm> [ <1-1440> ] ] |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>  |
|                    | < word16>  | <b>Valid values:</b> please see ' <a href="#">list timezone</a> '<br><b>Type:</b> Mandatory |
|                    | <day>  | <b>Valid values:</b> 1 ~ 31<br><b>Type:</b> Mandatory                                       |
|                    | <month>  | <b>Valid values:</b> 1 ~ 12<br><b>Type:</b> Mandatory                                       |
|                    | <year>   | <b>Valid values:</b> 2000-2097<br><b>Type:</b> Mandatory                                    |
|                    | <minute>   | <b>Valid values:</b> 0 ~ 59<br><b>Type:</b> Mandatory                                       |
|                    | <second>   | <b>Valid values:</b> 0 ~ 59<br><b>Type:</b> Optional  |

### 3.2.23 green ethernet eee

|                    |   |
|--------------------|---|
| <b>Description</b> | Sets if EEE should be optimized for least traffic latency or least power consumption. |
| <b>Syntax</b>      | green-ethernet eee optimize-for-power   |
| <b>Parameter</b>   | None  |

### 3.2.24 LED power reduction

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Use green-ethernet led interval to configure the LED intensity at specific interval of the day. |  |
| <b>Syntax</b>      | green-ethernet led interval <0~24> intensity <0-100>  |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | interval  | Interval in whole hours at which to configure the LED intensity. |
|                    | intensity   | LEDs intensity.  |

### 3.2.25 green-ethernet led on-event

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Use green-ethernet led on-event to configure when to turn LEDs intensity to 100%%. |  |
| <b>Syntax</b>      | green-ethernet led on-event { [ link-change <0-65535> ] [ error ] }                |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | link-change  | Specifies how long to turn LEDs intensity to 100%%, when a link changes state. |
|                    | error  | Set LEDs intensity to 100%% if an error occurs.                                |

### 3.2.26 set system's network name

|                    |                            |   |
|--------------------|----------------------------|---|
| <b>Description</b> | Set system's network name. |   |
| <b>Syntax</b>      | hostname <line255>         |   |
| <b>Parameter</b>   |                            |   |
|                    | <b>Name</b>                | <b>Description</b>                            |
|                    | <line255>                  | This system's network name (1-32 characters). |

### 3.2.27 account add <username>

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Add an account.  |  |
| <b>Syntax</b>      | username <word31> privilege <0-15> password encrypted <word4-44> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | < word31>  | <b>Valid values:</b> 1 ~ 31 characters<br><b>Type:</b> Mandatory |
|                    | <0-15>   | <b>Valid values:</b> 0 ~ 15<br><b>Type:</b> Mandatory            |
|                    | < word4-44>  | <b>Valid values:</b> 4-44 characters<br><b>Type:</b> Mandatory   |

### 3.2.28 account delete <username>

|                    |                      |  |
|--------------------|----------------------|--|
| <b>Description</b> | Delete an account.   |  |
| <b>Syntax</b>      | no username <word31> |  |
| <b>Parameter</b>   |                      |  |
|                    | <b>Name</b>          | <b>Description</b>   |
|                    | < word31>            | <b>Valid values:</b> 1 ~ 31 characters<br><b>Type:</b> Mandatory |

### 3.2.29 syslog {enable|disable}

|                    |                                   |  |
|--------------------|-----------------------------------|--|
| <b>Description</b> | Disable or enable syslog service. |  |
| <b>Syntax</b>      | logging on<br>no logging on       |  |

|                  |      |
|------------------|------|
| <b>Parameter</b> | None |
|------------------|------|

### 3.2.30 configuration save and replace

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Save and install configuration  |  |
| <b>Syntax</b>      | copy { startup-config   running-config   <Filename> } { startup-config   running-config   < Filename > } [ syntax-check ] |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                           |
|                    | running-config  | Currently running configuration              |
|                    | startup-config  | Startup configuration                        |
|                    | syntax-check  | Perform syntax check on source configuration |
|                    | Filename  | File in FLASH or on TFTP server              |

### 3.2.31 clear ip igmp snooping statistics

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | clear ipigmpsnoopingstatisti                          |                    |
| <b>Syntax</b>      | clear ip igmp snooping [ vlan<vlan_list> ] statistics |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | vlan_list   | VLAN list.         |

### 3.2.32 clear logging

|                    |   |                                |
|--------------------|---|--------------------------------|
| <b>Description</b> | clear logging   |                                |
| <b>Syntax</b>      | clear logging [ info ] [ warning ] [ error ] [ switch <switch_list> ] |                                |
| <b>Parameter</b>   |   |                                |
|                    | <b>Name</b>   | <b>Description</b>             |
|                    | info  | Information                    |
|                    | warning   | Warning                        |
|                    | error   | Error                          |
|                    | Switch list   | List of switch ID, ex, 1,3-5,6 |

### 3.2.33 clear mac address-table

|                    |                         |
|--------------------|-------------------------|
| <b>Description</b> | clear mac address-table |
| <b>Syntax</b>      | clear mac address-table |
| <b>Parameter</b>   |                         |

### 3.2.34 delete

|                    |                                       |                        |
|--------------------|---------------------------------------|------------------------|
| <b>Description</b> | Delete one file in flash: file system |                        |
| <b>Syntax</b>      | delete <word>                         |                        |
| <b>Parameter</b>   |                                       |                        |
|                    | <b>Name</b>                           | <b>Description</b>     |
|                    | <word>                                | Name of file to delete |

### 3.2.35 dir

|                    |  |
|--------------------|--|
| <b>Description</b> | Directory of all files in flash: file system |
| <b>Syntax</b>      | dir  |
| <b>Parameter</b>   |  |

### 3.2.36 do

|                    |                                     |
|--------------------|-------------------------------------|
| <b>Description</b> | To run exec commands in config mode |
| <b>Syntax</b>      | do <line>                           |

|                  |             |                    |
|------------------|-------------|--------------------|
| <b>Parameter</b> |             |                    |
|                  | <b>Name</b> | <b>Description</b> |
|                  | <line>      | Exec Command       |

### 3.2.37 duplex

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | Set duplex mode                               |                                  |
| <b>Syntax</b>      | duplex { half   full   auto [ half   full ] } |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>                                   | <b>Description</b>               |
|                    | half  | Forced half duplex.              |
|                    | full  | Forced full duplex.              |
|                    | auto  | Auto negotiation of duplex mode. |
|                    | [ half   full ]                               | Advertise half /full duplex.     |

### 3.2.38 firmware

|                    |                           |                    |
|--------------------|---------------------------|--------------------|
| <b>Description</b> | Firmware swap and upgrade |                    |
| <b>Syntax</b>      | firmware upgrade          |                    |
| <b>Parameter</b>   |                           |                    |
|                    | <b>Name</b>               | <b>Description</b> |
|                    | upgrade                   | Firmware upgrade   |

### 3.2.39 help

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Description of the interactive help system |  |
| <b>Syntax</b>      | help                                       |  |
| <b>Parameter</b>   |  |  |

### 3.2.40 ip arp inspection

|                    |                   |  |
|--------------------|-------------------|--|
| <b>Description</b> | iparp inspection  |  |
| <b>Syntax</b>      | ip arp inspection |  |
| <b>Parameter</b>   |                   |  |

### 3.2.41 ip arp inspection translate

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | IP ARP inspection entry interface configuration   |  |
| <b>Syntax</b>      | ip arp inspection translate [ interface <port_type><port_type_id><vlan_id><mac_ucast><ipv4_ucast> ] |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                         |
|                    | port_type   | Port type in Fast, Giga or Tengigaethernet |
|                    | port_type_id  | Port ID in the format of switch-no/port-no |
|                    | vlan_id   | Select a VLAN id to configure              |
|                    | mac_ucast   | Select a MAC address to configure          |
|                    | ipv4_ucast  | Select an IP Address to configure          |

### 3.2.42 ip arp inspection entry

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | arp inspection entry interface config   |  |
| <b>Syntax</b>      | ip arp inspection entry interface <port_type> <in_port_type_id> <vlan_var> <mac_var> <ipv4_var> |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                         |
|                    | port_type   | Port type in Fast, Giga or Tengigaethernet |
|                    | in_port_type_id   | Port ID in the format of switch-no/port-no |

|  |          |                                   |
|--|----------|-----------------------------------|
|  | vlan_var | Select a VLAN id to configure     |
|  | mac_var  | Select a MAC address to configure |
|  | ipv4_var | Select an IP Address to configure |

### 3.2.43 ip arp inspection vlan

|                    |                                   |                          |
|--------------------|-----------------------------------|--------------------------|
| <b>Description</b> | IP ARP inspection vlan setting    |                          |
| <b>Syntax</b>      | ip arp inspection vlan<vlan_list> |                          |
| <b>Parameter</b>   |                                   |                          |
|                    | <b>Name</b>                       | <b>Description</b>       |
|                    | vlan_list                         | arp inspection vlan list |

### 3.2.44 ip arp static add

|                    |  |                             |
|--------------------|--|-----------------------------|
| <b>Description</b> | Add static arp                           |                             |
| <b>Syntax</b>      | ip arp static add <ipv4_addr> <mac_addr> |                             |
| <b>Parameter</b>   |  |                             |
|                    | <b>Name</b>                              | <b>Description</b>          |
|                    | ipv4_addr                                | static arp ipv4 ip address  |
|                    | mac_addr                                 | static arp ipv4 mac address |

### 3.2.45 ip arp static delete

|                    |   |                             |
|--------------------|---|-----------------------------|
| <b>Description</b> | Delete static arp                           |                             |
| <b>Syntax</b>      | ip arp static delete <ipv4_addr> <mac_addr> |                             |
| <b>Parameter</b>   |   |                             |
|                    | <b>Name</b>                                 | <b>Description</b>          |
|                    | ipv4_addr                                   | static arp ipv4 ip address  |
|                    | mac_addr                                    | static arp ipv4 mac address |

### 3.2.46 ip arp timeout set

|                    |                           |                    |
|--------------------|---------------------------|--------------------|
| <b>Description</b> | Set ARP timeout           |                    |
| <b>Syntax</b>      | ip arp timeout set <1-60> |                    |
| <b>Parameter</b>   |                           |                    |
|                    | <b>Name</b>               | <b>Description</b> |

### 3.2.47 ip dhcp excluded-address

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Prevent DHCP from assigning certain addresses   |                    |
| <b>Syntax</b>      | ip dhcp excluded-address <low_ip> [ <high_ip> ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |
|                    | low_ip  | Low IP address     |
|                    | high_ip   | High IP address    |

### 3.2.48 ip dhcp pool

|                    |                            |  |
|--------------------|----------------------------|--|
| <b>Description</b> | Pool name in 32 characters |  |
| <b>Syntax</b>      | ip dhcp pool <pool_name>   |  |
| <b>Parameter</b>   |                            |  |

### 3.2.49 ip dhcp server

|                    |                |  |
|--------------------|----------------|--|
| <b>Description</b> | DHCP Server    |  |
| <b>Syntax</b>      | ip dhcp server |  |
| <b>Parameter</b>   |                |  |

### 3.2.50 ip dhcp relay

|                    |                                |
|--------------------|--------------------------------|
| <b>Description</b> | DHCP relay agent configuration |
| <b>Syntax</b>      | ip dhcp relay                  |
| <b>Parameter</b>   |                                |

### 3.2.51 ip dhcp relay information option

|                    |   |
|--------------------|---|
| <b>Description</b> | IP DHCP relay information option(Option 82) |
| <b>Syntax</b>      | ip dhcp relay information option            |
| <b>Parameter</b>   |   |

### 3.2.52 ip dhcp snooping

|                    |                  |
|--------------------|------------------|
| <b>Description</b> | IP DHCP snooping |
| <b>Syntax</b>      | ipdhcp snooping  |
| <b>Parameter</b>   |                  |

### 3.2.53 ip helper-address

|                    |                                  |                                     |
|--------------------|----------------------------------|-------------------------------------|
| <b>Description</b> | DHCP relay server                |                                     |
| <b>Syntax</b>      | ip helper-address <v_ipv4_ucast> |                                     |
| <b>Parameter</b>   |                                  |                                     |
|                    | <b>Name</b>                      | <b>Description</b>                  |
|                    | Ip : ipv4_ucast                  | IP address of the DHCP relay server |

### 3.2.54 ip dns proxy

|                    |                      |
|--------------------|----------------------|
| <b>Description</b> | IP DNS proxy service |
| <b>Syntax</b>      | ipdns proxy          |
| <b>Parameter</b>   |                      |

### 3.2.55 ip http secure-redirect

|                    |                         |
|--------------------|-------------------------|
| <b>Description</b> | IP http secure-redirect |
| <b>Syntax</b>      | ip http secure-redirect |
| <b>Parameter</b>   |                         |

### 3.2.56 ip http secure-server

|                    |                           |
|--------------------|---------------------------|
| <b>Description</b> | IP Secure HTTP web server |
| <b>Syntax</b>      | ip http secure-server     |
| <b>Parameter</b>   |                           |

### 3.2.57 ip source binding interface

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | IP source binding entry interface configuration  |  |
| <b>Syntax</b>      | Ip source binding interface <port_type> <port_type_id> <vlan_id><br><ipv4_ucast> <mac_ucast> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                         |
|                    | port_type  | Port type in Fast, Giga or Tengigaethernet |
|                    | port_type_id   | Port ID in the format of switch-no/port-no |
|                    | vlan_id  | Select a VLAN id to configure              |
|                    | ipv4_ucast   | Select an IP Address to configure          |
|                    | mac_ucast  | Select a MAC address to configure          |

### 3.2.58 ip ssh

|                    |                 |
|--------------------|-----------------|
| <b>Description</b> | IP Secure Shell |
| <b>Syntax</b>      | ipssh           |

|                  |  |
|------------------|--|
| <b>Parameter</b> |  |
|------------------|--|

### 3.2.59 ip name-server

|                    |   |                                     |
|--------------------|---|-------------------------------------|
| <b>Description</b> | IP name server  |                                     |
| <b>Syntax</b>      | ip name-server { <v_ipv4_ucast>   dhcp [ interface vlan <v_vlan_id> ] } |                                     |
| <b>Parameter</b>   |   |                                     |
|                    | <b>Name</b>   | <b>Description</b>                  |
|                    | v_ipv4_ucast  | A valid IPv4 unicast address        |
|                    | dhcp  | Dynamic Host Configuration Protocol |
|                    | v_vlan_id   | VLAN identifier(s): VID             |

### 3.2.60 ip route

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | IP Route  |                    |
| <b>Syntax</b>      | ip route <v_ipv4_addr> <v_ipv4_netmask> <v_ipv4_gw> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | v_ipv4_addr   | Network            |
|                    | v_ipv4_netmask                                      | Netmask            |
|                    | v_ipv4_gw   | Gateway            |

### 3.2.61 ip routing

|                    |            |
|--------------------|------------|
| <b>Description</b> | IP routing |
| <b>Syntax</b>      | ip routing |
| <b>Parameter</b>   |            |

### 3.2.62 ip verify

|                    |                                |  |
|--------------------|--------------------------------|--|
| <b>Description</b> | IP verify                      |  |
| <b>Syntax</b>      | ip verify [source] [translate] |  |
| <b>Parameter</b>   |                                |  |
|                    | <b>Name</b>                    | <b>Description</b>                     |
|                    | source                         | verify source                          |
|                    | translate                      | ip verify source translate all entries |

### 3.2.63 ipmc profile

|                    |                            |
|--------------------|----------------------------|
| <b>Description</b> | IPMC profile configuration |
| <b>Syntax</b>      | ipmc profile               |
| <b>Parameter</b>   |                            |

### 3.2.64 ipmc range

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | A range of IPv4/IPv6 multicast addresses for the profile                              |  |
| <b>Syntax</b>      | ipmc range <word16> { <ipv4_mcast> [ <ipv4_mcast> ]   <ipv6_mcast> [ <ipv6_mcast> ] } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | word16  | Range entry name in 16 char's                                    |
|                    | ipv4_mcast  | Valid IPv4 multicast address                                     |
|                    | ipv4_mcast  | Valid IPv4 multicast address that is not less than start address |
|                    | ipv6_mcast  | Valid IPv6 multicast address                                     |
|                    | ipv6_mcast  | Valid IPv6 multicast address that is not less than start address |

### 3.2.65 ipv6 mld host-proxy

|                    |                                     |                                   |
|--------------------|-------------------------------------|-----------------------------------|
| <b>Description</b> | enable MLD leave proxy.             |                                   |
| <b>Syntax</b>      | ipv6 mld host-proxy [ leave-proxy ] |                                   |
| <b>Parameter</b>   |                                     |                                   |
|                    | <b>Name</b>                         | <b>Description</b>                |
|                    | leave-proxy                         | MLD proxy for leave configuration |

### 3.2.66 ipv6 mld snooping

|                    |                      |                    |
|--------------------|----------------------|--------------------|
| <b>Description</b> | enable MLD snooping. |                    |
| <b>Syntax</b>      | ipv6 mld snooping    |                    |
| <b>Parameter</b>   |                      |                    |
|                    | <b>Name</b>          | <b>Description</b> |

### 3.2.67 ipv6 mld snooping vlan

|                    |                                    |                    |
|--------------------|------------------------------------|--------------------|
| <b>Description</b> | config MLD VLAN.                   |                    |
| <b>Syntax</b>      | ipv6 mld snooping vlan <vlan_list> |                    |
| <b>Parameter</b>   |                                    |                    |
|                    | <b>Name</b>                        | <b>Description</b> |

### 3.2.68 ipv6 mld ssm-range

|                    |   |                                    |
|--------------------|---|------------------------------------|
| <b>Description</b> | set MLD SSM range.                      |                                    |
| <b>Syntax</b>      | ipv6 mld ssm-range <ipv6_mcast> <8-128> |                                    |
| <b>Parameter</b>   |   |                                    |
|                    | <b>Name</b>                             | <b>Description</b>                 |
|                    | ipv6_mcast                              | Valid IPv6 multicast address       |
|                    | <8-128>                                 | Prefix length ranges from 8 to 128 |

### 3.2.69 key-file

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | set Keyfile.                                    |                    |
| <b>Syntax</b>      | key-file {import  delete} public-key <word3-20> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |
|                    | import  | Create             |
|                    | delete  | Delete             |
|                    | <word3-20>                                      | key file name      |

### 3.2.70 lacp

|                    |                                     |   |
|--------------------|-------------------------------------|---|
| <b>Description</b> | LACP system priority                |   |
| <b>Syntax</b>      | lacp system-priority <v_1_to_65535> |   |
| <b>Parameter</b>   |                                     |   |
|                    | <b>Name</b>                         | <b>Description</b>                          |
|                    | system-priority                     | System priority                             |
|                    | <v_1_to_65535>                      | Priority value, lower means higher priority |

### 3.2.71 line

|                    |  |                       |
|--------------------|--|-----------------------|
| <b>Description</b> | Console terminal control                 |                       |
| <b>Syntax</b>      | line { <0~16>   console 0   vty <0~15> } |                       |
| <b>Parameter</b>   |  |                       |
|                    | <b>Name</b>                              | <b>Description</b>    |
|                    | <0~16>                                   | List of line numbers  |
|                    | console                                  | Console terminal line |
|                    | vtty                                     | Virtual terminal      |

### 3.2.72 login host

|                    |  |                               |
|--------------------|--|-------------------------------|
| <b>Description</b> | Domain name and IP address                   |                               |
| <b>Syntax</b>      | logging host { <v_ipv4_ucast>   <v_word45> } |                               |
| <b>Parameter</b>   |  |                               |
|                    | <b>Name</b>                                  | <b>Description</b>            |
|                    | hostname                                     | Domain name of the log server |
|                    | ipv4_ucast                                   | IP address of the log server  |

### 3.2.73 log level

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Log level                                |                    |
| <b>Syntax</b>      | logging level { info   warning   error } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                              | <b>Description</b> |
|                    | error                                    | Error              |
|                    | info                                     | Information        |
|                    | warning                                  | Warning            |

### 3.2.74 log on

|                    |            |
|--------------------|------------|
| <b>Description</b> | Log on     |
| <b>Syntax</b>      | logging on |
| <b>Parameter</b>   |            |

### 3.2.75 logout

|                    |               |
|--------------------|---------------|
| <b>Description</b> | System logout |
| <b>Syntax</b>      | logout        |
| <b>Parameter</b>   |               |

### 3.2.76 modbusTCP enable

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | modbusTCP state configuration |
| <b>Syntax</b>      | modbusTCP enable              |
| <b>Parameter</b>   |                               |

### 3.2.77 modbusTCP disable

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | modbusTCP state configuration |
| <b>Syntax</b>      | modbusTCP disable             |
| <b>Parameter</b>   |                               |

### 3.2.78 modbusTCP readonly enable

|                    |  |
|--------------------|--|
| <b>Description</b> | modbusTCP readonly state configuration |
| <b>Syntax</b>      | modbusTCP readonly enable              |
| <b>Parameter</b>   |  |

### 3.2.79 modbusTCP readonly disable

|                    |  |
|--------------------|--|
| <b>Description</b> | modbusTCP readonly state configuration |
| <b>Syntax</b>      | modbusTCP readonly disable             |
| <b>Parameter</b>   |  |

### 3.2.80 mac address-table aging-time

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | MAC table entries/configuration                  |   |
| <b>Syntax</b>      | mac address-table aging-time <v_0_10_to_1000000> |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>                                      | <b>Description</b>                      |
|                    | <v_0_10_to_1000000>                              | Aging time in seconds, 0 disables aging |

### 3.2.81 mac address-table learning

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | VLAN learning.                              |                    |
| <b>Syntax</b>      | mac address-table learning vlan <vlan_list> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                 | <b>Description</b> |

### 3.2.82 mac address-table static

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | MAC table entries/configuration   |                                  |
| <b>Syntax</b>      | mac address-table static <v_mac_addr> vlan <v_vlan_id> interface ( <port_type> [ <v_port_type_list> ] ) |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>   | <b>Description</b>               |
|                    | <v_mac_addr>  | 48 bit MAC address               |
|                    | v_vlan_id   | VLAN IDs 1-4095                  |
|                    | port_type   | Select an interface to configure |
|                    | v_port_type_list  | Port list                        |

### 3.2.83 multicast unregistered

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Configure multicast.  |  |
| <b>Syntax</b>      | multicast unregistered {ip   l2 } action {forward  discard} |  |
| <b>Parameter</b>   |   |  |

### 3.2.84 Mvr

|                    |             |  |
|--------------------|-------------|--|
| <b>Description</b> | enable MVR. |  |
| <b>Syntax</b>      | mvr         |  |
| <b>Parameter</b>   |             |  |

### 3.2.85 mvr name <word16> channel

|                    |                                    |                           |
|--------------------|------------------------------------|---------------------------|
| <b>Description</b> | set MVR interface channel.         |                           |
| <b>Syntax</b>      | mvr name <word16> channel <word16> |                           |
| <b>Parameter</b>   |                                    |                           |
|                    | <b>Name</b>                        | <b>Description</b>        |
|                    | <word16>                           | MVR multicast VLAN name   |
|                    | <word16>                           | Profile name in 16 char's |

### 3.2.86 mvr name <word16> frame priority

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | set MVR interface priority settings.   |                         |
| <b>Syntax</b>      | mvr name <word16> frame priority <0-7> |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                            | <b>Description</b>      |
|                    | <word16>                               | MVR multicast VLAN name |
|                    | priority                               | Interface CoS priority  |

### 3.2.87 mvr name <word16> frame tagged

|                    |                                      |                                     |
|--------------------|--------------------------------------|-------------------------------------|
| <b>Description</b> | set MVR interface priority settings. |                                     |
| <b>Syntax</b>      | mvr name <word16> frame tagged       |                                     |
| <b>Parameter</b>   |                                      |                                     |
|                    | <b>Name</b>                          | <b>Description</b>                  |
|                    | <word16>                             | MVR multicast VLAN name             |
|                    | tagged                               | Tagged IGMP/MLD frames will be sent |

### 3.2.88 mvr name <word16> igmp-address

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | set MVR IGMP address settings for IGMP.     |                         |
| <b>Syntax</b>      | mvr name <word16> igmp-address <ipv4_ucast> |                         |
| <b>Parameter</b>   |   |                         |
|                    | <b>Name</b>                                 | <b>Description</b>      |
|                    | <word16>                                    | MVR multicast VLAN name |

### 3.2.89 mvr name <word16> last-member-query-interval

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | set MVR interface LMQI.                                |                         |
| <b>Syntax</b>      | mvr name <word16> last-member-query-interval <0-31744> |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>  | <b>Description</b>      |
|                    | <word16>   | MVR multicast VLAN name |

### 3.2.90 mvr name <word16> mode

|                    |   |                               |
|--------------------|---|-------------------------------|
| <b>Description</b> | set MVR interface mode setting.                 |                               |
| <b>Syntax</b>      | mvr name <word16> mode { dynamic   compatible } |                               |
| <b>Parameter</b>   |   |                               |
|                    | <b>Name</b>                                     | <b>Description</b>            |
|                    | <word16>  | MVR multicast VLAN name       |
|                    | dynamic   | Dynamic MVR operation mode    |
|                    | compatible                                      | Compatible MVR operation mode |

### 3.2.91 mvr vlan <vlan\_list> channel

|                    |                                       |                           |
|--------------------|---------------------------------------|---------------------------|
| <b>Description</b> | set MVR interface channel.            |                           |
| <b>Syntax</b>      | mvr vlan <vlan_list> channel <word16> |                           |
| <b>Parameter</b>   |                                       |                           |
|                    | <b>Name</b>                           | <b>Description</b>        |
|                    | <vlan_list>                           | MVR multicast VLAN list   |
|                    | <word16>                              | Profile name in 16 char's |

### 3.2.92 mvr vlan <vlan\_list> frame priority

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | set MVR interface priority settings.      |                         |
| <b>Syntax</b>      | mvr vlan <vlan_list> frame priority <0-7> |                         |
| <b>Parameter</b>   |   |                         |
|                    | <b>Name</b>                               | <b>Description</b>      |
|                    | <vlan_list>                               | MVR multicast VLAN list |
|                    | priority                                  | Interface CoS priority  |

### 3.2.93 mvr vlan <vlan\_list> frame tagged

|                    |                                   |                                     |
|--------------------|-----------------------------------|-------------------------------------|
| <b>Description</b> | set MVR frame tagged settings.    |                                     |
| <b>Syntax</b>      | mvr vlan <vlan_list> frame tagged |                                     |
| <b>Parameter</b>   |                                   |                                     |
|                    | <b>Name</b>                       | <b>Description</b>                  |
|                    | <vlan_list>                       | MVR multicast VLAN list             |
|                    | tagged                            | Tagged IGMP/MLD frames will be sent |

### 3.2.94 mvr vlan <vlan\_list> igmp-address

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set MVR IGMP address settings for IGMP.        |                    |
| <b>Syntax</b>      | mvr vlan <vlan_list> igmp-address <ipv4_ucast> |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                    | <b>Description</b> |

|  |             |                         |
|--|-------------|-------------------------|
|  | <vlan_list> | MVR multicast VLAN list |
|--|-------------|-------------------------|

### 3.2.95 mvr vlan <vlan\_list> last-member-query-interval

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | set MVR interface LMQI.                                   |                         |
| <b>Syntax</b>      | mvr vlan <vlan_list> last-member-query-interval <0-31744> |                         |
| <b>Parameter</b>   |   |                         |
|                    | <b>Name</b>   | <b>Description</b>      |
|                    | <vlan_list>   | MVR multicast VLAN list |

### 3.2.96 mvr vlan <vlan\_list> mode

|                    |  |                               |
|--------------------|--|-------------------------------|
| <b>Description</b> | set MVR interface mode setting.                    |                               |
| <b>Syntax</b>      | mvr vlan <vlan_list> mode { dynamic   compatible } |                               |
| <b>Parameter</b>   |  |                               |
|                    | <b>Name</b>  | <b>Description</b>            |
|                    | <vlan_list>  | MVR multicast VLAN list       |
|                    | dynamic  | Dynamic MVR operation mode    |
|                    | compatible   | Compatible MVR operation mode |

### 3.2.97 mvr vlan <vlan\_list> [ name <word16> ]

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | set MVR VLAN interface.                |                         |
| <b>Syntax</b>      | mvr vlan <vlan_list> [ name <word16> ] |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                            | <b>Description</b>      |
|                    | <vlan_list>                            | MVR multicast VLAN list |
|                    | name                                   | MVR multicast name      |
|                    | <word16>                               | MVR multicast VLAN name |

### 3.2.98 no

|                    |                                |                              |
|--------------------|--------------------------------|------------------------------|
| <b>Description</b> | Function disable               |                              |
| <b>Syntax</b>      | no { port-securit   terminal } |                              |
| <b>Parameter</b>   |                                |                              |
|                    | <b>Name</b>                    | <b>Description</b>           |
|                    | port-securit                   | Port security (psec limit)   |
|                    | terminal                       | Set terminal line parameters |

### 3.2.99 ping

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| <b>Description</b> | The ping function  |                    |
| <b>Syntax</b>      | ping { ip   ipv6 } |                    |
| <b>Parameter</b>   |                    |                    |
|                    | <b>Name</b>        | <b>Description</b> |
|                    | ip                 | IP (ICMP) echo     |
|                    | ipv6               | IPv6 (ICMPv6) echo |

### 3.2.100 port-security

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Port security                                   |   |
| <b>Syntax</b>      | port-security [aging] [time <v_10_to_10000000>] |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>                                     | <b>Description</b>  |
|                    | aging   | Enable/disable port security aging                                  |
|                    | time  | Time in seconds between check for activity on learned MAC addresses |
|                    | v_10_to_10000000                                | <10-10000000> seconds   |

### 3.2.101 ptp <0-3> domain

|                    |                          |                      |
|--------------------|--------------------------|----------------------|
| <b>Description</b> | Set clock domain         |                      |
| <b>Syntax</b>      | ptp <0-3> domain <0-127> |                      |
| <b>Parameter</b>   |                          |                      |
|                    | <b>Name</b>              | <b>Description</b>   |
|                    | <0-3>                    | Clock instance [0-3] |
|                    | domain                   | Clock domain for PTP |

### 3.2.102 ptp <0-3> log

|                    |                        |                        |
|--------------------|------------------------|------------------------|
| <b>Description</b> | Set the PTP debug mode |                        |
| <b>Syntax</b>      | ptp <0-3> log <1-4>    |                        |
| <b>Parameter</b>   |                        |                        |
|                    | <b>Name</b>            | <b>Description</b>     |
|                    | <0-3>                  | Clock instance [0-3]   |
|                    | log                    | Set the PTP debug mode |

### 3.2.103 ptp <0-3> mode

|                    |  |                       |
|--------------------|--|-----------------------|
| <b>Description</b> | Create a PTP clock instance  |                       |
| <b>Syntax</b>      | ptp <0-3> mode { boundary   e2etransparent   p2ptransparent   master   slave } [ onestep   twostep ] [ ethernet   ip4multi ] [ oneway   twoway ] [ id <clock_id> ] [ vid <vlan_id> [ <0-7> ] [ tag ] ] [ profile { ieee1588 } ] [ clock-domain 0 ] [ dscp <0-63> ] |                       |
| <b>Parameter</b>   |  |                       |
|                    | <b>Name</b>  | <b>Description</b>    |
|                    | <0-3>  | Clock instance [0-3]  |
|                    | mode   | Enable a PTP instance |

### 3.2.104 ptp <0-3> priority1

|                    |                             |  |
|--------------------|-----------------------------|--|
| <b>Description</b> | Set Clock priority1         |  |
| <b>Syntax</b>      | ptp <0-3> priority1 <0-255> |  |
| <b>Parameter</b>   |                             |  |
|                    | <b>Name</b>                 | <b>Description</b>   |
|                    | <0-3>                       | Clock instance [0-3]   |
|                    | priority1                   | Clock priority 1 for PTP BMC algorithm (0 is highest priority) |

### 3.2.105 ptp <0-3> priority2

|                    |                             |  |
|--------------------|-----------------------------|--|
| <b>Description</b> | Set Clock priority2         |  |
| <b>Syntax</b>      | ptp <0-3> priority2 <0-255> |  |
| <b>Parameter</b>   |                             |  |
|                    | <b>Name</b>                 | <b>Description</b>   |
|                    | <0-3>                       | Clock instance [0-3]   |
|                    | Priority2                   | Clock priority 2 for PTP BMC algorithm (0 is highest priority) |

### 3.2.106 ptp system-time

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Enable synchronization between PTP and System time |  |
| <b>Syntax</b>      | ptp system-time { get   set }                      |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                             |
|                    | get  | Get (update) the PTP time from the system time |
|                    | set  | Set (update) the system time from the PTP      |

### 3.2.107 sntp server ip-address

|                    |                                       |                    |
|--------------------|---------------------------------------|--------------------|
| <b>Description</b> | Configure SNTP server ip.             |                    |
| <b>Syntax</b>      | sntp server ip-address {<ipv4_ucast>} |                    |
| <b>Parameter</b>   |                                       |                    |
|                    | <b>Name</b>                           | <b>Description</b> |

### 3.2.108 Sntp

|                    |              |                    |
|--------------------|--------------|--------------------|
| <b>Description</b> | sntp enable. |                    |
| <b>Syntax</b>      | sntp         |                    |
| <b>Parameter</b>   |              |                    |
|                    | <b>Name</b>  | <b>Description</b> |

### 3.2.109 switchport vlan mapping

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | add VLAN Translation mapping..                       |  |
| <b>Syntax</b>      | switchport vlan mapping <1-26> <vlan_list> <vlan_id> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                       |
|                    | mapping  | Add VLAN translation entry into a group. |
|                    | <1-26>   | Group id                                 |

### 3.2.110 telnet-server

|                    |                       |                    |
|--------------------|-----------------------|--------------------|
| <b>Description</b> | telnet-server enable. |                    |
| <b>Syntax</b>      | telnet-server enable  |                    |
| <b>Parameter</b>   |                       |                    |
|                    | <b>Name</b>           | <b>Description</b> |
|                    | enable                | open telnet server |

### 3.2.111 thermal-protect grp

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Thermal protection configurations.            |  |
| <b>Syntax</b>      | thermal-protect grp <0~3> temperature <0-255> |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>                                   | <b>Description</b>   |
|                    | grp   | Sets temperature at which to turn ports mapped to the corresponding group off. |
|                    | temperature                                   | temperature keyword  |

### 3.2.112 usb auto backup configurator

|                    |   |                          |
|--------------------|---|--------------------------|
| <b>Description</b> | usb auto backup configurations.                   |                          |
| <b>Syntax</b>      | usb auto backup configurator { enable   disable } |                          |
| <b>Parameter</b>   |   |                          |
|                    | <b>Name</b>                                       | <b>Description</b>       |
|                    | auto  | auto backup configurator |
|                    | backup  | auto backup configurator |

### 3.2.113 usb config-file delete

|                    |                                 |                    |
|--------------------|---------------------------------|--------------------|
| <b>Description</b> | Delete usb config-file.         |                    |
| <b>Syntax</b>      | usb config-file delete <vword8> |                    |
| <b>Parameter</b>   |                                 |                    |
|                    | <b>Name</b>                     | <b>Description</b> |
|                    | <vword8>                        | config-file name   |

### 3.2.114 usb config-file download

|                    |                                   |                    |
|--------------------|-----------------------------------|--------------------|
| <b>Description</b> | download usb config-file.         |                    |
| <b>Syntax</b>      | usb config-file download <vword8> |                    |
| <b>Parameter</b>   |                                   |                    |
|                    | <b>Name</b>                       | <b>Description</b> |
|                    | <vword8>                          | config-file name   |

### 3.2.115 usb config-file upload

|                    |                         |                    |
|--------------------|-------------------------|--------------------|
| <b>Description</b> | Upload usb config-file. |                    |
| <b>Syntax</b>      | usb config-file upload  |                    |
| <b>Parameter</b>   |                         |                    |
|                    | <b>Name</b>             | <b>Description</b> |

### 3.2.116 usb config-file list

|                    |                       |                    |
|--------------------|-----------------------|--------------------|
| <b>Description</b> | List usb config-file. |                    |
| <b>Syntax</b>      | usb config-file list  |                    |
| <b>Parameter</b>   |                       |                    |
|                    | <b>Name</b>           | <b>Description</b> |

### 3.2.117 profinet enable

|                    |                          |                    |
|--------------------|--------------------------|--------------------|
| <b>Description</b> | profinet Configuration . |                    |
| <b>Syntax</b>      | profinet disable         |                    |
| <b>Parameter</b>   |                          |                    |
|                    | <b>Name</b>              | <b>Description</b> |

### 3.2.118 profinet enable

|                    |                          |                    |
|--------------------|--------------------------|--------------------|
| <b>Description</b> | profinet Configuration . |                    |
| <b>Syntax</b>      | profinet enable          |                    |
| <b>Parameter</b>   |                          |                    |
|                    | <b>Name</b>              | <b>Description</b> |

### 3.2.119 privilege

|                    |  |                              |
|--------------------|--|------------------------------|
| <b>Description</b> |  |                              |
| <b>Syntax</b>      | privilege { exec   configure   config-vlan   line   interface   if-vlan   ipmc-profile   snmps-host   stp-aggr   dhcp-pool   rfc2544-profile } level <privilege> <cmd> |                              |
| <b>Parameter</b>   |  |                              |
|                    | <b>Name</b>  | <b>Description</b>           |
|                    | config-vlan  | VLAN Configuration Mode      |
|                    | configure  | Global configuration mod     |
|                    | dhcp-pool  | DHCP Pool Configuration Mode |
|                    | exec   | Exec mode                    |
|                    | if-vlan  | VLAN Interface Mode          |
|                    | interface  | Port List Interface Mode     |
|                    | ipmc-profile   | IPMC Profile Mode            |
|                    | line   | Line configuration mode      |
|                    | rfc2544-profile  | RFC2544 Profile Mode         |
|                    | snmps-host   | SNMP Server Host Mode        |
|                    | stp-aggr   | STP Aggregation Mode         |

### 3.2.120 reboot

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | System or configuration reset |
|--------------------|-------------------------------|

|                  |             |                    |
|------------------|-------------|--------------------|
| <b>Syntax</b>    | reboot      |                    |
| <b>Parameter</b> |             |                    |
|                  | <b>Name</b> | <b>Description</b> |

### 3.2.121 rmon

|                    |                      |                         |
|--------------------|----------------------|-------------------------|
| <b>Description</b> | RMON                 |                         |
| <b>Syntax</b>      | rmon {alarm   event} |                         |
| <b>Parameter</b>   |                      |                         |
|                    | <b>Name</b>          | <b>Description</b>      |
|                    | alarm                | Configure an RMON alarm |
|                    | event                | Configure an RMON event |

### 3.2.122 rmon alarm

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | RMON Alarm   |   |
| <b>Syntax</b>      | rmon alarm <id> <oid_str> <interval> { absolute   delta } rising-threshold <rising_threshold> [ <rising_event_id> ] falling-threshold <falling_threshold> [ <falling_event_id> ] { [ rising   falling   both ] } |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>  |
|                    | id   | Alarm entry ID  |
|                    | ifInDiscards   | The number of inbound packets that are discarded even the packets are normal  |
|                    | flnErrors  | The number of inbound packets that contained errors preventing them from being deliverable to a higher-layer protocol |
|                    | ifInNUcastPkts   | The number of broad-cast and multi-cast packets delivered to a higher-layer protocol                                  |
|                    | ifInOctets   | The total number of octets received on the interface, including framing characters                                    |
|                    | ifInUcastPkts  | The number of uni-cast packets delivered to a higher-layer protocol   |
|                    | ifInUnknownProtos  | The number of the inbound packets that were discarded because of the unknown or un-support protocol                   |
|                    | ifOutDiscards  | The number of outbound packets that are discarded event the packets is normal   |
|                    | ifOutErrors  | The The number of outbound packets that could not be transmitted because of errors                                    |
|                    | ifOutNUcastPkts  | The number of broad-cast and multi-cast packets that request to transmit  |
|                    | ifOutOctets  | The number of octets transmitted out of the interface, including framing characters                                   |
|                    | ifOutUcastPkts   | The number of uni-cast packets that request to transmi  |
|                    | interval   | Sample interval   |
|                    | absolute   | Test each sample directly   |
|                    | delta  | Test delta between samples  |
|                    | rising_threshold   | <-2147483648-2147483647> rising threshold value   |
|                    | rising_event_id  | <0-65535> Event to fire on rising threshold crossing  |
|                    | falling_threshold  | <-2147483648-2147483647> falling threshold value  |
|                    | falling_event_id   | <0-65535> Event to fire on falling threshold  |

|  |         |   |
|--|---------|---|
|  |         | crossing  |
|  | both    | Trigger alarm when the first value is larger than the rising threshold or less than the falling threshold (default) |
|  | falling | Trigger alarm when the first value is less than the falling threshold   |
|  | rising  | Trigger alarm when the first value is larger than the rising threshold  |

### 3.2.123 rmon alarm

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | RMON Event   |   |
| <b>Syntax</b>      | rmon event <id> [ log ] [ trap <community> ] { [ description <description> ] } |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                      |
|                    | description  | Specify a description of the event      |
|                    | log  | Generate RMON log when the event fires  |
|                    | trap   | Generate SNMP trap when the event fires |

### 3.2.124 terminal

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Terminal control  |  |
| <b>Syntax</b>      | terminal { editing   exec-timeout   help   history   length   width } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                         |
|                    | editing   | Enable command line editing                |
|                    | exec-timeout  | Set the EXEC timeout                       |
|                    | help  | Description of the interactive help system |
|                    | history   | Control the command history function       |
|                    | length  | Set number of lines on a screen            |
|                    | width   | Set width of the display terminal          |

### 3.2.125 vlan <vlanid>

|                    |                 |  |
|--------------------|-----------------|--|
| <b>Description</b> | Configure VLAN. |  |
| <b>Syntax</b>      | vlan <vlanid>   |  |
| <b>Parameter</b>   |                 |  |
|                    | <b>Name</b>     | <b>Description</b>   |
|                    | <vlanid>        | Create an empty VLAN index.<br><b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory |

### 3.2.126 vlan <vlanid> <name>

|                    |                        |  |
|--------------------|------------------------|--|
| <b>Description</b> | Configure VLAN's name. |  |
| <b>Syntax</b>      | vlan <vlanid> <name>   |  |
| <b>Parameter</b>   |                        |  |
|                    | <b>Name</b>            | <b>Description</b>   |
|                    | <vlanid>               | Create an empty VLAN index.<br><b>Valid values:</b> 1 ~ 4094<br><b>Type:</b> Mandatory |
|                    | <name>                 | VLAN Name (0~31)<br><b>String Size:</b> 0~31<br><b>Type:</b> Mandatory                 |

### 3.2.127 mac address-table aging-time <time>

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Configure aging time for a bridge port. |   |
| <b>Syntax</b>      | mac address-table aging-time <time>     |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>                             | <b>Description</b>  |
|                    | <time>                                  | <b>Valid values:</b> 10 ~ 1000000 (seconds), 0: disable aging<br><b>Type:</b> Mandatory |

### 3.2.128 media-type

|                    |                                  |  |
|--------------------|----------------------------------|--|
| <b>Description</b> | Configure media-type             |  |
| <b>Syntax</b>      | media-type { rj45   sfp   dual } |  |
| <b>Parameter</b>   |                                  |  |
|                    | <b>Name</b>                      | <b>Description</b>                           |
|                    | rj45                             | rj45 interface (copper interface).           |
|                    | sfp                              | sfp interface (fiber interface).             |
|                    | dual                             | Dual media interface (cu & fiber interface). |

### 3.2.129 monitor destination interface

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | The destination port. That is the port that trafficed should be mirrored to. |                    |
| <b>Syntax</b>      | monitor destination interface <port_type> <port_type_id>                     |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | <port_type>  | Port type          |
|                    | <port_type_id>   | Port Number        |

### 3.2.130 monitor source interface

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | Mirror Interface traffic  |                         |
| <b>Syntax</b>      | monitor source { { interface ( <port_type> [ <v_port_type_list> ] ) } |                         |
| <b>Parameter</b>   |   |                         |
|                    | <b>Name</b>   | <b>Description</b>      |
|                    | port_type   | 1 Gigabit Ethernet Port |
|                    | v_port_type_lis   | Port list               |

### 3.2.131 monitor source cpu

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Mirror Interface traffic   |   |
| <b>Syntax</b>      | monitor source { cpu [ <cpu_switch_range> ] } { both   rx   tx } |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>  |
|                    | both   | Setting source port to both will mirror both ingress and egress traffic |
|                    | rx   | Setting source port to rx will mirror ingress traffic                   |
|                    | tx   | Setting source port to tx will mirror egress traffic                    |

### 3.2.132 tacacs-server host

|                    |  |                        |
|--------------------|--|------------------------|
| <b>Description</b> | Configure TACACS+ server   |                        |
| <b>Syntax</b>      | tacacs-server host <word1-255> [ port <0-65535> ] [ timeout <1-1000> ]<br>[ key <line1-63> ] |                        |
| <b>Parameter</b>   |  |                        |
|                    | <b>Name</b>  | <b>Description</b>     |
|                    | word1-255  | Hostname or IP address |
|                    | 0-65535  | TCP port number        |
|                    | 1-1000   | Wait time in seconds   |
|                    | line1-63   | The shared key         |

### 3.2.133 tacacs-server key

|                    |                                  |                    |
|--------------------|----------------------------------|--------------------|
| <b>Description</b> | Configure TACACS+ encryption key |                    |
| <b>Syntax</b>      | tacacs-server key <line1-63>     |                    |
| <b>Parameter</b>   |                                  |                    |
|                    | <b>Name</b>                      | <b>Description</b> |
|                    | line1-63                         |                    |

### 3.2.134 tacacs-server timeout

|                    |  |                      |
|--------------------|--|----------------------|
| <b>Description</b> | Time to wait for a TACACS+ server to reply |                      |
| <b>Syntax</b>      | tacacs-server timeout <1-1000>             |                      |
| <b>Parameter</b>   |  |                      |
|                    | <b>Name</b>                                | <b>Description</b>   |
|                    | 1-1000                                     | Wait time in seconds |

### 3.2.135 traps

|                    |  |                               |
|--------------------|--|-------------------------------|
| <b>Description</b> | trap event configuration   |                               |
| <b>Syntax</b>      | traps [authentication ] [ system [ coldstart ] [ warmstart ] ] [ switch [ stp ] [ rmon ] ] |                               |
| <b>Parameter</b>   |  |                               |
|                    | <b>Name</b>  | <b>Description</b>            |
|                    | aaa authentication   | AAA authentication fail event |
|                    | coldstart  | Cold start event              |
|                    | warmstart  | Warm start event              |
|                    | stp  | STP event                     |
|                    | rmon   | RMON event                    |

### 3.2.136 upnp

|                    |                           |  |
|--------------------|---------------------------|--|
| <b>Description</b> | Set UPnP's configurations |  |
| <b>Syntax</b>      | upnp                      |  |
| <b>Parameter</b>   |                           |  |

### 3.2.137 upnp advertising-duration

|                    |                                       |                      |
|--------------------|---------------------------------------|----------------------|
| <b>Description</b> | Set UPnP's advertising duration       |                      |
| <b>Syntax</b>      | upnp advertising-duration <100-86400> |                      |
| <b>Parameter</b>   |                                       |                      |
|                    | <b>Name</b>                           | <b>Description</b>   |
|                    | 100-86400                             | advertising duration |

### 3.2.138 upnp ttl

|                    |                      |                    |
|--------------------|----------------------|--------------------|
| <b>Description</b> | Set UPnP's TTL value |                    |
| <b>Syntax</b>      | upnp ttl <1-255>     |                    |
| <b>Parameter</b>   |                      |                    |
|                    | <b>Name</b>          | <b>Description</b> |
|                    | 1-255                | TTL value          |

### 3.2.139 username

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | User account   |  |
| <b>Syntax</b>      | username <username> privilege <priv> password encrypted <encyr_password><br>username <username> privilege <priv> password none<br>username <username> privilege <priv> password unencrypted <password> |  |
| <b>Parameter</b>   |  |  |

|  | Name        | Description   |
|--|-------------|---|
|  | username    | <Username : word31> User name allows letters, numbers and underscores |
|  | privilege   | Set user privilege level  |
|  | priv        | User privilege level  |
|  | password    | Specify the password for the user                                     |
|  | encrypted   | Specifies an ENCRYPTED password will follow                           |
|  | none        | NULL password   |
|  | unencrypted | Specifies an UNENCRYPTED password will follow                         |

### 3.2.140 web

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> |  |  |
| <b>Syntax</b>      | web privilege group <group_name> level { [ cro <cro> ] [ crw <crw> ] [ sro <sro> ] [ srw <srw> ] }*1 |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | privilege  | Web privilege  |
|                    | group  | Web privilege group  |
|                    | group_name   | Valid words are 'Aggregation' 'DHCP' 'Debug' 'Dhcp_Client' 'Diagnostics' 'EEE' 'Green_Ethernet' 'IP2' 'IPMC_Snooping' 'LACP' 'LLDP' 'Loop_Protect' 'MAC_Table' 'MVR' 'Maintenance' 'Mirroring' 'NTP' 'Ports' 'Private_VLANs' 'QoS' 'RPC' 'Security' 'Spanning_Tree' 'System' 'Timer' 'VCL' 'VLANs' 'Voice_VLAN' 'XXRP' 'sFlow' |
|                    | level  | Web privilege group level  |
|                    | cro  | Configuration Read-only level  |
|                    | crw  | Configuration Read-write level   |
|                    | sro  | Status/Statistics Read-only level  |
|                    | srw  | Status/Statistics Read-write level   |
|                    | cro  | <Cro : 0-15>   |
|                    | crw  | <Crw : 0-15>   |
|                    | sro  | <Sro : 0-15>   |
|                    | srw  | <Srw : 0-15>   |

### 3.2.141 flow-control {enable|disble}

|                    |                              |                       |
|--------------------|------------------------------|-----------------------|
| <b>Description</b> | Enable/Disable flow-control. |                       |
| <b>Syntax</b>      | flow-control {enable disble} |                       |
| <b>Parameter</b>   |                              |                       |
|                    | <b>Name</b>                  | <b>Description</b>    |
|                    | enable                       | Enable flow-control.  |
|                    | disable                      | Disable flow-control. |

### 3.2.142 speed

|                    |  |                              |
|--------------------|--|------------------------------|
| <b>Description</b> | Configure gigabit Ethernet speed and Copper/SFP for gigabit port 7~8.<br>(port1~6 Only support copper, no SFP)<br>(port 9, 10 only support auto) |                              |
| <b>Syntax</b>      | speed<br>{auto full-1000mbps full-100mbps full-10mbps half-100mbps half-10mbps}  |                              |
| <b>Parameter</b>   |  |                              |
|                    | <b>Name</b>  | <b>Description</b>           |
|                    | auto   | Auto negotiation.            |
|                    | full-1000mbps  | Set 1000Mbps full duplexing. |

|  |              |                             |
|--|--------------|-----------------------------|
|  | full-100mbps | Set 100Mbps full duplexing. |
|  | full-10mbps  | Set 10Mbps full duplexing.  |
|  | half-100mbps | Set 100Mbps half duplexing. |
|  | half-10mbps  | Set 10Mbps half duplexing.  |

### 3.2.143 port {enable/disable}

|                    |   |                        |
|--------------------|---|------------------------|
| <b>Description</b> | Set interface gigabit port enable or disable. |                        |
| <b>Syntax</b>      | port {enable/disable}                         |                        |
| <b>Parameter</b>   |   |                        |
|                    | <b>Name</b>                                   | <b>Description</b>     |
|                    | disable                                       | Turn off gigabit port. |
|                    | enable  | Turn off gigabit port. |

## 3.3 VLAN Mode Commands

### 3.3.1 vlan

|                    |                  |                     |
|--------------------|------------------|---------------------|
| <b>Description</b> | VLAN commands    |                     |
| <b>Syntax</b>      | vlan <vlan_list> |                     |
| <b>Parameter</b>   |                  |                     |
|                    | <b>Name</b>      | <b>Description</b>  |
|                    | vlan_lis         | ISL VLAN IDs 1~4095 |

### 3.3.2 vlan ethertype s-custom-port

|                    |  |                                  |
|--------------------|--|----------------------------------|
| <b>Description</b> | Vlan Ether type for custom S-ports configuration |                                  |
| <b>Syntax</b>      | vlan ethertype s-custom-port <0x0600-0xffff>     |                                  |
| <b>Parameter</b>   |  |                                  |
|                    | <b>Name</b>                                      | <b>Description</b>               |
|                    | 0x0600-0xffff                                    | Ethertype (Range: 0x0600-0xffff) |

### 3.3.3 vlan protocol

|                    |  |                                       |
|--------------------|--|---------------------------------------|
| <b>Description</b> |  |                                       |
| <b>Syntax</b>      | vlan protocol { { eth2 { <0x600-0xffff>   arp   ip   ipx   at } }   { snap { <0x0-0xfffff>   rfc_1042   snap_8021h } <0x0-0xffff> }   { llc <0x0-0xff> <0x0-0xff> } } group <word16> |                                       |
| <b>Parameter</b>   |  |                                       |
|                    | <b>Name</b>  | <b>Description</b>                    |
|                    | 0x600-0xffff   | Ether Type(Range: 0x600 - 0xFFFF)     |
|                    | arp  | Ether Type is ARP                     |
|                    | ip   | Ether Type is IP                      |
|                    | ipx  | Ether Type is IPX                     |
|                    | at   | Ether Type is AppleTalk               |
|                    | 0x0-0xfffff  | SNAP OUI (Range 0x000000 - 0FFFFFFF)  |
|                    | rfc_1042   | SNAP OUI is rfc_1042                  |
|                    | snap_8021h   | SNAP OUI is 8021h                     |
|                    | 0x0-0xffff   | PID (Range: 0x0 - 0xFFFF)             |
|                    | 0x0-0xff   | DSAP (Range: 0x00 - 0xFF)             |
|                    | 0x0-0xff   | SSAP (Range: 0x00 - 0xFF)             |
|                    | word16   | Group Name (Range: 1 - 16 characters) |

## 3.4 Interface Vlan Mode Commands

### 3.4.1 IP address configuration

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | IP address configuration.   |  |
| <b>Syntax</b>      | ip address {{<ipv4_addr> <ipv4_netmask>}   {dhcp [fallback <ipv4_addr> <ipv4_netmask> [timeout <uint>]]}} |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                                 |
|                    | ipv4_addr   | IP address   |
|                    | ipv4_netmask  | IP netmask   |
|                    | fallback  | DHCP fallback settings                             |
|                    | timeout   | DHCP fallback timeout, Default value is 60 seconds |

### 3.4.2 ip dhcp server

|                    |                              |                    |
|--------------------|------------------------------|--------------------|
| <b>Description</b> | Enable DHCP server per VLAN. |                    |
| <b>Syntax</b>      | ip dhcp server               |                    |
| <b>Parameter</b>   |                              |                    |
|                    | <b>Name</b>                  | <b>Description</b> |

### 3.4.3 ip igmp snooping

|                    |                             |                    |
|--------------------|-----------------------------|--------------------|
| <b>Description</b> | enable IGMP VLAN interface. |                    |
| <b>Syntax</b>      | ip igmp snooping            |                    |
| <b>Parameter</b>   |                             |                    |
|                    | <b>Name</b>                 | <b>Description</b> |

### 3.4.4 ip igmp snooping compatibility

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ip igmp snooping interface compatibility.    |                    |
| <b>Syntax</b>      | ip igmp snooping compatibility { auto   v1   v2   v3 } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

### 3.4.5 ip igmp snooping last-member-query-interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ip igmp snooping interface last member query interval in tenths of seconds. |                    |
| <b>Syntax</b>      | ip igmp snooping last-member-query-interval <0-31744>                                 |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |

### 3.4.6 ip igmp snooping priority

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ip igmp snooping interface priority. |                    |
| <b>Syntax</b>      | ip igmp snooping priority <0-7>                |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                    | <b>Description</b> |

### 3.4.7 ip igmp snooping querier

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Configure ip igmp snooping querier .                         |  |
| <b>Syntax</b>      | ip igmp snooping querier { election   address <ipv4_ucast> } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                               |
|                    | election   | Act as an IGMP Querier to join Querier-Election. |

|  |         |                                     |
|--|---------|-------------------------------------|
|  | address | IGMP Querier address configuration. |
|--|---------|-------------------------------------|

### 3.4.8 ip igmp snooping query-interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ip igmp snooping querier .      |                    |
| <b>Syntax</b>      | ip igmp snooping query-interval <1-31744> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                               | <b>Description</b> |

### 3.4.9 ip igmp snooping query-max-response-time

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ip igmp snooping Query Response Interval in tenths of seconds . |                    |
| <b>Syntax</b>      | ip igmp snooping query-max-response-time <0-31744>                        |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |

### 3.4.10 ip igmp snooping robustness-variable

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ip igmp snooping Robustness Variable. |                    |
| <b>Syntax</b>      | ip igmp snooping robustness-variable <2-255>    |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |

### 3.4.11 ip igmp snooping unsolicited-report-interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ip igmp snooping unsolicited-report-interval. |                    |
| <b>Syntax</b>      | ip igmp snooping unsolicited-report-interval <0-31744>  |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |

### 3.4.12 ipv6 address <ipv6\_subnet>

|                    |                            |                      |
|--------------------|----------------------------|----------------------|
| <b>Description</b> | Create ipv6 address.       |                      |
| <b>Syntax</b>      | ipv6 address <ipv6_subnet> |                      |
| <b>Parameter</b>   |                            |                      |
|                    | <b>Name</b>                | <b>Description</b>   |
|                    | <ipv6_subnet>              | IPv6 prefix x:x::y/z |

### 3.4.13 ipv6 address

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Enable DHCPv6 client function.                      |  |
| <b>Syntax</b>      | ipv6 address { autoconfig   dhcp [ rapid-commit ] } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                       |
|                    | rapid-commit  | Enable DHCPv6 client Rapid-Commit option |

### 3.4.14 ipv6 mld snooping

|                    |                       |                    |
|--------------------|-----------------------|--------------------|
| <b>Description</b> | enable MLD snooping.. |                    |
| <b>Syntax</b>      | ipv6 mld snooping     |                    |
| <b>Parameter</b>   |                       |                    |
|                    | <b>Name</b>           | <b>Description</b> |

### 3.4.15 ipv6 mld snooping compatibility

|                    |  |                             |
|--------------------|--|-----------------------------|
| <b>Description</b> | Configure ipv6 mld snooping interface compatibility. |                             |
| <b>Syntax</b>      | ipv6 mld snooping compatibility { auto   v1   v2 }   |                             |
| <b>Parameter</b>   |  |                             |
|                    | <b>Name</b>  | <b>Description</b>          |
|                    | auto   | Compatible with MLDv1/MLDv2 |

|  |    |              |
|--|----|--------------|
|  | v1 | Forced MLDv1 |
|  | V2 | Forced MLDv2 |

### 3.4.16 ipv6 mld snooping last-member-query-interval

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping interface last member query interval in tenths of seconds. |                    |
| <b>Syntax</b>      | ipv6 mld snooping last-member-query-interval <0-31744>                                 |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

### 3.4.17 ipv6 mld snooping priority

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping interface priority. |                    |
| <b>Syntax</b>      | ipv6 mld snooping priority <0-7>                |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |

### 3.4.18 ipv6 mld snooping querier election

|                    |                                       |  |
|--------------------|---------------------------------------|--|
| <b>Description</b> | Configure ipv6 mld snooping querier . |  |
| <b>Syntax</b>      | ipv6 mld snooping querier election    |  |
| <b>Parameter</b>   |                                       |  |
|                    | <b>Name</b>                           | <b>Description</b>                             |
|                    | election                              | Act as a MLD Querier to join Querier-Election. |

### 3.4.19 ipv6 mld snooping query-interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping query-interval. |                    |
| <b>Syntax</b>      | ipv6 mld snooping query-interval <1-31744>  |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                 | <b>Description</b> |

### 3.4.20 ipv6 mld snooping query-max-response-time

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping Query Response Interval in tenths of seconds . |                    |
| <b>Syntax</b>      | ipv6 mld snooping query-max-response-time <0-31744>                        |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

### 3.4.21 ipv6 mld snooping robustness-variable

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping Robustness Variable. |                    |
| <b>Syntax</b>      | ipv6 mld snooping robustness-variable <1-255>    |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                      | <b>Description</b> |

### 3.4.22 ipv6 mld snooping unsolicited-report-interval

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure ipv6 mld snooping unsolicited-report-interval. |                    |
| <b>Syntax</b>      | ipv6 mld snooping unsolicited-report-interval <0-31744>  |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

## 3.5 Interface Mode Commands

### 3.5.1 create an aggregation

|                    |                              |                           |
|--------------------|------------------------------|---------------------------|
| <b>Description</b> | Create an aggregation group. |                           |
| <b>Syntax</b>      | aggregation group <uint>     |                           |
| <b>Parameter</b>   |                              |                           |
|                    | <b>Name</b>                  | <b>Description</b>        |
|                    | <uint>                       | The aggregation group id. |

### 3.5.2 dot1x port-control

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Sets the port security state.  |  |
| <b>Syntax</b>      | dot1x port-control { force-authorized   force-unauthorized   auto   single   multi   mac-based } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                           |
|                    | force-authorized   | Port access is allowed                       |
|                    | force-unauthorized   | Port access is not allowed                   |
|                    | auto   | Port-based 802.1X Authentication             |
|                    | single   | Single Host 802.1X Authentication            |
|                    | multi  | Multiple Host 802.1X Authentication          |
|                    | mac-based  | Switch authenticates on behalf of the client |

### 3.5.3 dot1x guest-vlan

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | G Enables/disables Guest VLAN globally or on one or more ports |  |
| <b>Syntax</b>      | dot1x guest-vlan   |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                               |
|                    | <1-4095>   | Guest VLAN ID used when entering the Guest VLAN. |

### 3.5.4 dot1x radius-vlan

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Enables/disables per-port state of RADIUS-assigned VLAN. |  |
| <b>Syntax</b>      | dot1x radius-vlan  |  |
| <b>Parameter</b>   |  |  |

### 3.5.5 dot1x radius-qos

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Enables/disables per-port state of RADIUS-assigned QoS. |  |
| <b>Syntax</b>      | dot1x radius-qos  |  |
| <b>Parameter</b>   |   |  |

### 3.5.6 dot1x re-authenticate

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Refresh (restart) 802.1X authentication process. |  |
| <b>Syntax</b>      | dot1x re-authenticate                            |  |
| <b>Parameter</b>   |  |  |

### 3.5.7 configure interface duplex mode

|                    |  |                     |
|--------------------|--|---------------------|
| <b>Description</b> | Use duplex to configure interface duplex mode. |                     |
| <b>Syntax</b>      | duplex { half   full   auto [ half   full ] }  |                     |
| <b>Parameter</b>   |  |                     |
|                    | <b>Name</b>                                    | <b>Description</b>  |
|                    | half   | Forced half duplex. |

|  |      |                                  |
|--|------|----------------------------------|
|  | full | Forced full duplex.              |
|  | auto | Auto negotiation of duplex mode. |
|  | half | Advertise half duplex.           |
|  | full | Advertise full duplex.           |

### 3.5.8 flowcontrol

|                    |                              |                       |
|--------------------|------------------------------|-----------------------|
| <b>Description</b> | Enable/Disable flow control. |                       |
| <b>Syntax</b>      | flowcontrol { on   off }     |                       |
| <b>Parameter</b>   |                              |                       |
|                    | <b>Name</b>                  | <b>Description</b>    |
|                    | on                           | Enable flow control.  |
|                    | off                          | Disable flow control. |

### 3.5.9 frame-length-check

|                    |  |
|--------------------|--|
| <b>Description</b> | Enable 803.3 frame length check for ethertypes below 0x0600. |
| <b>Syntax</b>      | frame-length-check   |
| <b>Parameter</b>   |  |

### 3.5.10 enable gmrp port agent

|                    |                         |
|--------------------|-------------------------|
| <b>Description</b> | enable gmrp port agent. |
| <b>Syntax</b>      | gmrp agent enable       |
| <b>Parameter</b>   |                         |

### 3.5.11 enable gmrp port

|                    |                   |
|--------------------|-------------------|
| <b>Description</b> | enable gmrp port. |
| <b>Syntax</b>      | gmrp enable       |
| <b>Parameter</b>   |                   |

### 3.5.12 green-ethernet eee urgent-queues

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Sets EEE urgent queues.                         |                    |
| <b>Syntax</b>      | green-ethernet eee urgent-queues [<range_list>] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |
|                    | <range_list>                                    | EEE Interface.     |

### 3.5.13 green-ethernet energy-detect

|                    |                                      |
|--------------------|--------------------------------------|
| <b>Description</b> | Enables energy-detect power savings. |
| <b>Syntax</b>      | green-ethernet energy-detect         |
| <b>Parameter</b>   |                                      |

### 3.5.14 green-ethernet short-reach

|                    |                                    |
|--------------------|------------------------------------|
| <b>Description</b> | Enables short-reach power savings. |
| <b>Syntax</b>      | green-ethernet short-reach         |
| <b>Parameter</b>   |                                    |

### 3.5.15 gvrp

|                    |                     |
|--------------------|---------------------|
| <b>Description</b> | Enable GVRP on port |
| <b>Syntax</b>      | gvrp                |
| <b>Parameter</b>   |                     |

### 3.5.16 ip arp inspection check-vlan

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | VLAN interface configurations |
|--------------------|-------------------------------|

|                  |                              |                    |
|------------------|------------------------------|--------------------|
| <b>Syntax</b>    | ip arp inspection check-vlan |                    |
| <b>Parameter</b> |                              |                    |
|                  | <b>Name</b>                  | <b>Description</b> |

### 3.5.17 ip arp inspection trust

|                    |                              |                    |
|--------------------|------------------------------|--------------------|
| <b>Description</b> | ARP inspection trust config. |                    |
| <b>Syntax</b>      | ip arp inspection trust      |                    |
| <b>Parameter</b>   |                              |                    |
|                    | <b>Name</b>                  | <b>Description</b> |

### 3.5.18 ip dhcp snooping trust

|                    |                             |                    |
|--------------------|-----------------------------|--------------------|
| <b>Description</b> | DHCP Snooping trust config. |                    |
| <b>Syntax</b>      | ip dhcp snooping trust      |                    |
| <b>Parameter</b>   |                             |                    |
|                    | <b>Name</b>                 | <b>Description</b> |

### 3.5.19 ip igmp snooping filter <word16>

|                    |  |                            |
|--------------------|--|----------------------------|
| <b>Description</b> | Access control on IGMP multicast group registration. |                            |
| <b>Syntax</b>      | ip igmp snooping filter <word16>                     |                            |
| <b>Parameter</b>   |  |                            |
|                    | <b>Name</b>  | <b>Description</b>         |
|                    | <word16>   | Profile name in 16 char's. |

### 3.5.20 ip igmp snooping immediate-leave

|                    |                                  |                    |
|--------------------|----------------------------------|--------------------|
| <b>Description</b> | Immediate leave configuration.   |                    |
| <b>Syntax</b>      | ip igmp snooping immediate-leave |                    |
| <b>Parameter</b>   |                                  |                    |
|                    | <b>Name</b>                      | <b>Description</b> |

### 3.5.21 ip igmp snooping max-groups

|                    |                                      |  |
|--------------------|--------------------------------------|--|
| <b>Description</b> | IGMP group throttling configuration. |  |
| <b>Syntax</b>      | ip igmp snooping max-groups <1-10>   |  |
| <b>Parameter</b>   |                                      |  |
|                    | <b>Name</b>                          | <b>Description</b>                         |
|                    | <1-10>                               | Maximun number of IGMP group registration. |

### 3.5.22 ip igmp snooping mrouter

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Multicast router port configuration. |                    |
| <b>Syntax</b>      | ip igmp snooping mrouter             |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |

### 3.5.23 ipv6 mld snooping filter

|                    |   |                            |
|--------------------|---|----------------------------|
| <b>Description</b> | Access control on MLD multicast group registration. |                            |
| <b>Syntax</b>      | ipv6 mld snooping filter <word16>                   |                            |
| <b>Parameter</b>   |   |                            |
|                    | <b>Name</b>   | <b>Description</b>         |
|                    | <word16>  | Profile name in 16 char's. |

### 3.5.24 ipv6 mld snooping immediate-leave

|                    |                                |  |
|--------------------|--------------------------------|--|
| <b>Description</b> | Immediate leave configuration. |  |
|--------------------|--------------------------------|--|

|                  |                                   |                    |
|------------------|-----------------------------------|--------------------|
| <b>Syntax</b>    | ipv6 mld snooping immediate-leave |                    |
| <b>Parameter</b> |                                   |                    |
|                  | <b>Name</b>                       | <b>Description</b> |

### 3.5.25 ipv6 mld snooping max-groups

|                    |                                     |   |
|--------------------|-------------------------------------|---|
| <b>Description</b> | MLD group throttling configuration. |   |
| <b>Syntax</b>      | ipv6 mld snooping max-groups <1-10> |   |
| <b>Parameter</b>   |                                     |   |
|                    | <b>Name</b>                         | <b>Description</b>                        |
|                    | <1-10>                              | Maximun number of MLD group registration. |

### 3.5.26 ipv6 mld snooping mrouter

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Multicast router port configuration. |                    |
| <b>Syntax</b>      | ipv6 mld snooping mrouter            |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |

### 3.5.27 Enable LACP on an interface

|                    |                              |                    |
|--------------------|------------------------------|--------------------|
| <b>Description</b> | Enable LACP on an interface. |                    |
| <b>Syntax</b>      | lacp                         |                    |
| <b>Parameter</b>   |                              |                    |
|                    | <b>Name</b>                  | <b>Description</b> |

### 3.5.28 lacp key

|                    |  |                                   |
|--------------------|--|-----------------------------------|
| <b>Description</b> | Key of the LACP aggregation configuration. |                                   |
| <b>Syntax</b>      | lacp key { <1-65535>   auto }              |                                   |
| <b>Parameter</b>   |  |                                   |
|                    | <b>Name</b>                                | <b>Description</b>                |
|                    | <1-65535>                                  | Key value.                        |
|                    | auto                                       | Choose a key based on port speed. |

### 3.5.29 lacp port-priority

|                    |                              |  |
|--------------------|------------------------------|--|
| <b>Description</b> | Set the lacp port priority.  |  |
| <b>Syntax</b>      | lacp port-priority <1-65535> |  |
| <b>Parameter</b>   |                              |  |
|                    | <b>Name</b>                  | <b>Description</b>                           |
|                    | <1-65535>                    | Priority value, lower means higher priority. |

### 3.5.30 lacp role

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Set the LACP role, active or passive in transmitting BPDUs. |   |
| <b>Syntax</b>      | lacp role { active   passive }                              |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                                |
|                    | active  | Transmit LACP BPDUs continuously.                 |
|                    | passive   | Wait for neighbor LACP BPDUs before transmitting. |

### 3.5.31 lacp timeout

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Set the LACP timeout, i.e. how fast to transmit BPDUs, once a sec or once each 30 sec.. |  |
| <b>Syntax</b>      | lacp timeout { fast   slow }  |  |
| <b>Parameter</b>   |   |  |

|  | Name | Description                                    |
|--|------|--|
|  | fast | Transmit BPDU each second (fast timeout).      |
|  | slow | Transmit BPDU each 30th second (slow timeout). |

### 3.5.32 Link check function

| <b>Description</b> | Enable link-check on an interface. |             |
|--------------------|------------------------------------|-------------|
| <b>Syntax</b>      | link-check enable                  |             |
| <b>Parameter</b>   |                                    |             |
|                    | Name                               | Description |

### 3.5.33 Ildp cdp-aware

| <b>Description</b> | Configures if the interface shall be CDP aware. |   |
|--------------------|---|---|
| <b>Syntax</b>      | ildp cdp-aware                                  |   |
| <b>Parameter</b>   |   |   |
|                    | Name  | Description   |
|                    | cdp-aware                                       | Configures if the interface shall be CDP aware (CDP discovery information is added to the LLDP neighbor table). |

### 3.5.34 Ildp med media-vlan policy-list

| <b>Description</b> | Use the media-vlan policy-list to assign policy to the interface. |                                      |
|--------------------|---|--------------------------------------|
| <b>Syntax</b>      | ildp med media-vlan policy-list <range_list>                      |                                      |
| <b>Parameter</b>   |   |                                      |
|                    | Name  | Description                          |
|                    | <range_list>  | Policies to assign to the interface. |

### 3.5.35 Ildp med transmit-tlv

| <b>Description</b> | Use the Ildp med transmit-tlv to configure which TLVs to transmit to link partner. |   |
|--------------------|--|---|
| <b>Syntax</b>      | ildp med transmit-tlv [ capabilities ] [ location ] [ network-policy ] [ poe ]     |   |
| <b>Parameter</b>   |  |   |
|                    | Name   | Description   |
|                    | capabilities   | Enable transmission of the optional capabilities TLV.   |
|                    | location   | Enable transmission of the optional location TLV.       |
|                    | network-policy   | Enable transmission of the optional network-policy TLV. |

### 3.5.36 Ildp med type

|                    |   |
|--------------------|---|
| <b>Description</b> | Select if the interface is working as "Network Connectivity Device" or an "Endpoint Device". The difference between working as "Network Connectivity Device" and an "Endpoint Device" is a question of who is initializing the LLDP-MED TVLs transmission. A "Network Connectivity Device" is not starting LLDP-MED TLVs transmission until it has detected an "Endpoint Device" as link partner. An "Endpoint Device" will start LLDP-MED TLVs transmission at once. |
|--------------------|---|

|                  |  |                              |
|------------------|--|------------------------------|
| <b>Syntax</b>    | lldp med type {connectivity   end-point} |                              |
| <b>Parameter</b> |  |                              |
|                  | <b>Name</b>                              | <b>Description</b>           |
|                  | connectivity                             | Work as connectivity device. |
|                  | end-point                                | Work as end-point device.    |

### 3.5.37 mac address-table learning

|                    |                                     |                    |
|--------------------|-------------------------------------|--------------------|
| <b>Description</b> | Enable learning on port.            |                    |
| <b>Syntax</b>      | mac address-table learning [secure] |                    |
| <b>Parameter</b>   |                                     |                    |
|                    | <b>Name</b>                         | <b>Description</b> |
|                    | secure                              | Port Secure mode.  |

### 3.5.38 configure the interface media type

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Use media-type to configure the interface media type. |  |
| <b>Syntax</b>      | media-type { copper   fiber   auto }                  |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                                 |
|                    | copper  | copper interface.                                  |
|                    | fiber   | fiber interface.                                   |
|                    | auto  | Dual media interface (fiber interface preference). |

### 3.5.39 mtu <value>

|                    |             |  |
|--------------------|-------------|--|
| <b>Description</b> | MTU size.   |  |
| <b>Syntax</b>      | mtu <value> |  |
| <b>Parameter</b>   |             |  |
|                    | <b>Name</b> | <b>Description</b>   |
|                    | <value>     | Range.<br><b>Valid values:</b> 1518~9600 (bytes)<br><b>Type:</b> Mandatory |

### 3.5.40 mvr immediate-leave

|                    |                                    |                               |
|--------------------|------------------------------------|-------------------------------|
| <b>Description</b> | MVR immediate leave configuration. |                               |
| <b>Syntax</b>      | mvr immediate-leave                |                               |
| <b>Parameter</b>   |                                    |                               |
|                    | <b>Name</b>                        | <b>Description</b>            |
|                    | immediate-leave                    | Immediate leave configuration |

### 3.5.41 mvr name

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | MVR multicast name configuration.            |                         |
| <b>Syntax</b>      | mvr name <word16> type { source   receiver } |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                                  | <b>Description</b>      |
|                    | word16                                       | MVR multicast VLAN name |
|                    | source                                       | MVR source port         |
|                    | receiver                                     | MVR receiver port       |

### 3.5.42 mvr vlan

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | MVR multicast vlan configuration.               |                    |
| <b>Syntax</b>      | mvr vlan <vlan_list> type { source   receiver } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |

|  |           |                         |
|--|-----------|-------------------------|
|  | vlan_list | MVR multicast VLAN list |
|  | source    | MVR source port         |
|  | receiver  | MVR receiver port       |

### 3.5.43 port-security

|                    |                                     |                    |
|--------------------|-------------------------------------|--------------------|
| <b>Description</b> | Enable port security per interface. |                    |
| <b>Syntax</b>      | port-security                       |                    |
| <b>Parameter</b>   |                                     |                    |
|                    | <b>Name</b>                         | <b>Description</b> |

### 3.5.44 port-security maximum

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Maximum number of MAC addresses that can be learned on this set of interfaces. |                    |
| <b>Syntax</b>      | port-security maximum [<1-1024>]   |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

### 3.5.45 port-security violation

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | The action involved with exceeding the limit..                        |   |
| <b>Syntax</b>      | port-security violation { protect   trap   trap-shutdown   shutdown } |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                      |
|                    | protect   | Don't do anything                       |
|                    | trap  | Send an SNMP trap                       |
|                    | trap-shutdown   | Send an SNMP trap and shutdown the port |
|                    | shutdown  | Shutdown the port                       |

### 3.5.46 ptp <0-3> announce

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | set ptp announce interval and timeout.                        |                    |
| <b>Syntax</b>      | ptp <0-3> announce { [ interval <-3-4> ] [ timeout <1-10> ] } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | <0-3>   | Clock instance     |
|                    | interval  | announce interval  |
|                    | timeout   | announce timeout   |

### 3.5.47 ptp <0-3> sync-interval

|                    |                                |                    |
|--------------------|--------------------------------|--------------------|
| <b>Description</b> | set ptp sync interval.         |                    |
| <b>Syntax</b>      | ptp <0-3> sync-interval <-7-4> |                    |
| <b>Parameter</b>   |                                |                    |
|                    | <b>Name</b>                    | <b>Description</b> |
|                    | <0-3>                          | Clock instance     |
|                    | sync-interval                  | sync interval      |

### 3.5.48 ptp <0-3> delay-mechanism

|                    |   |                              |
|--------------------|---|------------------------------|
| <b>Description</b> | set delay mechanism.                    |                              |
| <b>Syntax</b>      | ptp <0-3> delay-mechanism { e2e   p2p } |                              |
| <b>Parameter</b>   |   |                              |
|                    | <b>Name</b>                             | <b>Description</b>           |
|                    | <0-3>                                   | Clock instance               |
|                    | e2e                                     | End to End Delay mechanism   |
|                    | p2p                                     | Peer to Peer Delay mechanism |

### 3.5.49 ptp <0-3> delay-req interval

|                    |                                     |                            |
|--------------------|-------------------------------------|----------------------------|
| <b>Description</b> | set pdelay req interval.            |                            |
| <b>Syntax</b>      | ptp <0-3> delay-req interval <-7-5> |                            |
| <b>Parameter</b>   |                                     |                            |
|                    | <b>Name</b>                         | <b>Description</b>         |
|                    | <0-3>                               | Clock instance             |
|                    | interval                            | Define pdelay req interval |

### 3.5.50 ptp <0-3> delay-asymmetry

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | set path delay asymmetry.                  |                    |
| <b>Syntax</b>      | ptp <0-3> delay-asymmetry <-100000-100000> |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                | <b>Description</b> |
|                    | <0-3>                                      | Clock instance     |

### 3.5.51 ptp <0-3> ingress-latency

|                    |  |                      |
|--------------------|--|----------------------|
| <b>Description</b> | set port ingress latency.                  |                      |
| <b>Syntax</b>      | ptp <0-3> ingress-latency <-100000-100000> |                      |
| <b>Parameter</b>   |  |                      |
|                    | <b>Name</b>                                | <b>Description</b>   |
|                    | <0-3>                                      | Clock instance       |
|                    | ingress-laten<br>cy                        | port ingress latency |

### 3.5.52 ptp <0-3> egress-latency

|                    |   |                     |
|--------------------|---|---------------------|
| <b>Description</b> | set port egress latency.                  |                     |
| <b>Syntax</b>      | ptp <0-3> egress-latency <-100000-100000> |                     |
| <b>Parameter</b>   |   |                     |
|                    | <b>Name</b>                               | <b>Description</b>  |
|                    | <0-3>                                     | Clock instance      |
|                    | egress-laten<br>cy                        | port egress latency |

### 3.5.53 ptp <0-3>

|                    |   |                                 |
|--------------------|---|---------------------------------|
| <b>Description</b> | Enable PTP for the interface(s), optionally set as an internal interface. |                                 |
| <b>Syntax</b>      | ptp <0-3> [ internal ]  |                                 |
| <b>Parameter</b>   |   |                                 |
|                    | <b>Name</b>   | <b>Description</b>              |
|                    | <0-3>   | Clock instance                  |
|                    | internal  | enable as an internal interface |

### 3.5.54 pvlan isolation

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Use the pvlan isolation command to add the port into an isolation group. |                    |
| <b>Syntax</b>      | pvlan isolation  |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | isolation  | Port isolation     |

### 3.5.55 pvlan <range\_list>

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Use the pvlan add or remove command to add or remove a port from a PVLAN. |  |
| <b>Syntax</b>      | pvlan <range_list>  |  |

| Parameter |            |   |
|-----------|------------|---|
|           | Name       | Description   |
|           | range_list | list of PVLANS. Range is from 1 to number of ports. |

### 3.5.56 rmon collection stats

| <b>Description</b> | Configure statistics.           |                      |
|--------------------|---------------------------------|----------------------|
| <b>Syntax</b>      | rmon collection stats <1-65535> |                      |
| <b>Parameter</b>   |                                 |                      |
|                    | Name                            | Description          |
|                    | <1-65535>                       | statistics entry ID. |

### 3.5.57 rmon collection history

| <b>Description</b> | Configure history.  |   |
|--------------------|---|---|
| <b>Syntax</b>      | rmon collection history <1-65535> [buckets <1-65535>] [interval <1-3600>] |   |
| <b>Parameter</b>   |   |   |
|                    | Name  | Description   |
|                    | <1-65535>   | history entry ID.   |
|                    | buckets   | Requested buckets of intervals. Default is 50 buckets.            |
|                    | <1-65535>   | Requested buckets of intervals                                    |
|                    | interval  | Interval to sample data for each bucket. Default is 1800 seconds. |
|                    | <1-3600>  | Interval in seconds to sample data for each bucket.               |

### 3.5.58 Shutdown

| <b>Description</b> | Use shutdown to shutdown the interface. |             |
|--------------------|---|-------------|
| <b>Syntax</b>      | shutdown                                |             |
| <b>Parameter</b>   |   |             |
|                    | Name                                    | Description |

### 3.5.59 speed

| <b>Description</b> | Configures interface speed. If you use 10, 100, or 1000 keywords with the auto keyword the port will only advertise the specified speeds. |                  |
|--------------------|---|------------------|
| <b>Syntax</b>      | speed { 10g   2500   1000   100   10   auto { [ 10 ] [ 100 ] [ 1000 ] } }   |                  |
| <b>Parameter</b>   |   |                  |
|                    | Name  | Description      |
|                    | 1000  | 1Gbps            |
|                    | 100   | 100Mbps          |
|                    | 10  | 10Mbps           |
|                    | auto  | Auto negotiation |
|                    | [ 10 ]  | 10Mbps           |
|                    | [ 10 0 ]  | 100Mbps          |
|                    | [ 1000 ]  | 1Gbps            |

### 3.5.60 switchport access vlan

| <b>Description</b> | Set switch access mode of the interface |  |
|--------------------|---|--|
| <b>Syntax</b>      | switchport access vlan <vlan_id>        |  |
| <b>Parameter</b>   |   |  |
|                    | Name                                    | Description  |
|                    | vlan_id                                 | VLAN ID of the VLAN when this port is in access mode |

### 3.5.61 switchport forbidden vlan

|                    |  |                            |
|--------------------|--|----------------------------|
| <b>Description</b> | Adds or removes forbidden VLANs from the current list of forbidden VLANs |                            |
| <b>Syntax</b>      | switchport forbidden vlan { add   remove } <vlan_list>                   |                            |
| <b>Parameter</b>   |  |                            |
|                    | <b>Name</b>  | <b>Description</b>         |
|                    | add  | Add to existing list.      |
|                    | remove   | Remove from existing list. |
|                    | vlan_list  | VLAN IDs                   |

### 3.5.62 switchport hybrid acceptable-frame-type

|                    |   |                            |
|--------------------|---|----------------------------|
| <b>Description</b> | Set acceptable frame type on a port                                 |                            |
| <b>Syntax</b>      | switchport hybrid acceptable-frame-type { all   tagged   untagged } |                            |
| <b>Parameter</b>   |   |                            |
|                    | <b>Name</b>   | <b>Description</b>         |
|                    | all   | Allow all frames           |
|                    | tagged  | Allow only tagged frames   |
|                    | untagged  | Allow only untagged frames |

### 3.5.63 switchport hybrid allowed vlan

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Set allowed VLAN characteristics when interface is in hybrid mode                     |  |
| <b>Syntax</b>      | switchport hybrid allowed vlan { all   none   [ add   remove   except ] <vlan_list> } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | all   | All VLANs  |
|                    | none  | No VLANs   |
|                    | add   | Add VLANs to the current list                                  |
|                    | remove  | Remove VLANs from the current list                             |
|                    | except  | All VLANs except the following                                 |
|                    | vlan_list   | VLAN IDs of the allowed VLANs when this port is in hybrid mode |

### 3.5.64 switchport hybrid egress-tag

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Egress VLAN tagging configuration                             |   |
| <b>Syntax</b>      | switchport hybrid egress-tag { none   all [ except-native ] } |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>  |
|                    | none  | No egress tagging   |
|                    | all   | Tag all frames  |
|                    | except-native   | Tag all frames except frames classified to native VLAN of the hybrid port |

### 3.5.65 switchport hybrid ingress-filtering

|                    |                                     |  |
|--------------------|-------------------------------------|--|
| <b>Description</b> | VLAN Ingress filter configuration   |  |
| <b>Syntax</b>      | switchport hybrid ingress-filtering |  |
| <b>Parameter</b>   |                                     |  |

### 3.5.66 switchport mode

|                    |   |                                    |
|--------------------|---|------------------------------------|
| <b>Description</b> | Set switching mode                          |                                    |
| <b>Syntax</b>      | switchport mode { access   trunk   hybrid } |                                    |
| <b>Parameter</b>   |   |                                    |
|                    | <b>Name</b>                                 | <b>Description</b>                 |
|                    | access                                      | Set mode to ACCESS unconditionally |
|                    | trunk                                       | Set mode to TRUNK unconditionally  |

|  |        |                                  |
|--|--------|----------------------------------|
|  | hybrid | Set mode to HYBRID unconditional |
|--|--------|----------------------------------|

### 3.5.67 switchport trunk allowed vlan

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Set allowed VLAN characteristics when interface is in trunk mode                     |   |
| <b>Syntax</b>      | switchport trunk allowed vlan { all   none   [ add   remove   except ] <vlan_list> } |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>  |
|                    | all  | All VLANs   |
|                    | none   | No VLANs  |
|                    | add  | Add VLANs to the current list                                 |
|                    | remove   | Remove VLANs from the current list                            |
|                    | except   | All VLANs except the following                                |
|                    | vlan_list  | VLAN IDs of the allowed VLANs when this port is in trunk mode |

### 3.5.68 switchport vlan protocol group

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Protocol-based VLAN group commands                     |  |
| <b>Syntax</b>      | switchport vlan protocol group <word16> vlan <vlan_id> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | word16   | Group Name (Range: 1 - 16 characters)                          |
|                    | vlan_id  | VLAN ID required for the group to VLAN mapping (Range: 1-4095) |

### 3.5.69 udld port

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Set UDLD mode Normal or Aggressive on an interface.  |  |
| <b>Syntax</b>      | udld port [aggressive][message time-interval <7-90>] |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | aggressive   | Enable UDLD in the aggressive mode on an interface.  |
|                    | message  | Configures the period of time between UDLD probe messages on ports that are in the advertisement phase and are determined to be bidirectional. The range is from 7 to 90 seconds (Currently default message time interval 7 sec is supported). |

## 3.6 Interface VLAN Mode Commands

### 3.6.1 interface

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Interface configuration                    |  |
| <b>Syntax</b>      | interface <port_type> [ <port_type_list> ] |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>                                | <b>Description</b>                         |
|                    | port_type                                  | Port type in Fast, Giga or Tengigaethernet |
|                    | port_type_list                             | List of Port ID, ex, 1/1,3-5;2/2-4,6       |

### 3.6.2 interface vlan

|                    |                               |  |
|--------------------|-------------------------------|--|
| <b>Description</b> | VLAN interface configurations |  |
| <b>Syntax</b>      | interface vlan<vlan_list>     |  |
| <b>Parameter</b>   |                               |  |
|                    | <b>Name</b>                   | <b>Description</b>                     |
|                    | vlan_list                     | List of VLAN interface numbers, 1~4095 |

### 3.6.3 ipv6 address

|                    |  |                      |
|--------------------|--|----------------------|
| <b>Description</b> | Configure the IPv6 address of an interface |                      |
| <b>Syntax</b>      | ipv6 address <ipv6_subnet>                 |                      |
| <b>Parameter</b>   |  |                      |
|                    | <b>Name</b>                                | <b>Description</b>   |
|                    | ipv6_subnet                                | IPv6 prefix x:x::y/z |

## 3.7 Dt-ring Commands

### 3.7.1 dt-ring config mode

|                    |                       |                    |
|--------------------|-----------------------|--------------------|
| <b>Description</b> | To configure dt-ring. |                    |
| <b>Syntax</b>      | dt-ring <domain_id>   |                    |
| <b>Parameter</b>   |                       |                    |
|                    | <b>Name</b>           | <b>Description</b> |
|                    | domain_id             | Dt-ring domain id  |

### 3.7.2 dt-ring create

|                    |   |                          |
|--------------------|---|--------------------------|
| <b>Description</b> | Create dt-ring ring   |                          |
| <b>Syntax</b>      | dt-ring new <domain_name> domain <domain_id> { master   slave } |                          |
| <b>Parameter</b>   |   |                          |
|                    | <b>Name</b>   | <b>Description</b>       |
|                    | domain_name   | Dt-ring domain name      |
|                    | domain_id   | Dt-ring domain id <1-32> |
|                    | master  | Master station           |
|                    | slave   | Slave station            |

### 3.7.3 dt-ring delete

|                    |                                   |                    |
|--------------------|-----------------------------------|--------------------|
| <b>Description</b> | Dt-ring vlan config               |                    |
| <b>Syntax</b>      | dt-ring delete domain <domain_id> |                    |
| <b>Parameter</b>   |                                   |                    |
|                    | <b>Name</b>                       | <b>Description</b> |
|                    | domain_id                         | Dt-ring domain id  |

### 3.7.4 dt-ring mode config

|                    |  |                       |
|--------------------|--|-----------------------|
| <b>Description</b> | Dt-ring vlan config                      |                       |
| <b>Syntax</b>      | dt-ring mode { port-based   vlan-based } |                       |
| <b>Parameter</b>   |  |                       |
|                    | <b>Name</b>                              | <b>Description</b>    |
|                    | port-base                                | Set dt-ring port mode |
|                    | vlan-base                                | Set dt-ring vlan mode |

### 3.7.5 ring port config

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Ring port config   |  |
| <b>Syntax</b>      | ringport { add   delete } interface <port_type> <port_type_id> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | add  | Add ring port to ring  |
|                    | delete   | Delete ring port from ring   |
|                    | port_type  | FastEthernet : Fast Ethernet Port<br>GigabitEthernet : 1 Gigabit Ethernet Port |
|                    | port_type_id   | Port ID  |

### 3.7.6 backup port config

|                    |  |                                     |
|--------------------|--|-------------------------------------|
| <b>Description</b> | Set interface of ring protection node                        |                                     |
| <b>Syntax</b>      | backport { add interface <port_type> <port_type_id   delete> |                                     |
| <b>Parameter</b>   |  |                                     |
|                    | <b>Name</b>  | <b>Description</b>                  |
|                    | add  | <b>Add backup port to ring</b>      |
|                    | delete   | <b>Delete backup port from ring</b> |

|  |              |  |
|--|--------------|--|
|  | port_type    | FastEthernet : Fast Ethernet Port<br>GigabitEthernet : 1 Gigabit Ethernet Port |
|  | port_type_id | Port ID  |

### 3.7.7 dt-ring protocol config

|                    |                               |                                     |
|--------------------|-------------------------------|-------------------------------------|
| <b>Description</b> | Dt-ring protocol config       |                                     |
| <b>Syntax</b>      | protocol { enable   disable } |                                     |
| <b>Parameter</b>   |                               |                                     |
|                    | <b>Name</b>                   | <b>Description</b>                  |
|                    | enable                        | <b>Enable ring backup function</b>  |
|                    | disable                       | <b>Disable ring backup function</b> |

## 3.8 Drp Commands

### 3.8.1 Drp mode

|                    |                                    |                    |
|--------------------|------------------------------------|--------------------|
| <b>Description</b> | Config drp running mode            |                    |
| <b>Syntax</b>      | drp mode { port-base   vlan-base } |                    |
| <b>Parameter</b>   |                                    |                    |
|                    | <b>Name</b>                        | <b>Description</b> |
|                    | port-base                          | Set drp port mode  |
|                    | vlan-base                          | Set drp vlan mode  |

### 3.8.2 Drp create

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Create drp ring                          |                    |
| <b>Syntax</b>      | drp new <domain_name> domain <domain_id> |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                              | <b>Description</b> |
|                    | domain_name                              | Drp ring name      |
|                    | domain_id                                | Drp ring domain id |

### 3.8.3 Drp delete

|                    |                                   |                    |
|--------------------|-----------------------------------|--------------------|
| <b>Description</b> | Delete drp ring                   |                    |
| <b>Syntax</b>      | dt-ring delete domain <domain_id> |                    |
| <b>Parameter</b>   |                                   |                    |
|                    | <b>Name</b>                       | <b>Description</b> |
|                    | domain_id                         | Drp domain id      |

### 3.8.4 Drp config mode

|                    |                 |                    |
|--------------------|-----------------|--------------------|
| <b>Description</b> | Drp config mode |                    |
| <b>Syntax</b>      | drp <domain_id> |                    |
| <b>Parameter</b>   |                 |                    |
|                    | <b>Name</b>     | <b>Description</b> |
|                    | domain_id       | Drp domain id      |

### 3.8.5 Drp ring port config

|                    |  |                                   |
|--------------------|--|-----------------------------------|
| <b>Description</b> | Config drp ring port   |                                   |
| <b>Syntax</b>      | ringport { add   delete } interface <port_type> <port_type_id> |                                   |
| <b>Parameter</b>   |  |                                   |
|                    | <b>Name</b>  | <b>Description</b>                |
|                    | add  | Add ring port                     |
|                    | delete   | Delete ring port                  |
|                    | port_type  | FastEthernet : Fast Ethernet Port |

|  |              |   |
|--|--------------|---|
|  |              | GigabitEthernet : 1 Gigabit Ethernet Port |
|  | port_type_id | Port ID                                   |

### 3.8.6 Drp vlan

|                    |                                   |                    |
|--------------------|-----------------------------------|--------------------|
| <b>Description</b> | Drp config vlan                   |                    |
| <b>Syntax</b>      | vlan { add   delete } <vlan_list> |                    |
| <b>Parameter</b>   |                                   |                    |
|                    | <b>Name</b>                       | <b>Description</b> |
|                    | add                               | Add drp vlan       |
|                    | delete                            | Delete drp vlan    |
|                    | vlan_list                         | Vlan list.         |

### 3.8.7 Drp protocol vlan

|                    |                                      |                          |
|--------------------|--------------------------------------|--------------------------|
| <b>Description</b> | Drp config protocol vlan             |                          |
| <b>Syntax</b>      | protocol-vlan { <vlan_id>   delete } |                          |
| <b>Parameter</b>   |                                      |                          |
|                    | <b>Name</b>                          | <b>Description</b>       |
|                    | vlan_id                              | Drp protocol vlan        |
|                    | delete                               | Delete drp protocol vlan |

### 3.8.8 Drp protocol enable

|                    |                               |                      |
|--------------------|-------------------------------|----------------------|
| <b>Description</b> | Drp protocol enable           |                      |
| <b>Syntax</b>      | protocol { enable   disable } |                      |
| <b>Parameter</b>   |                               |                      |
|                    | <b>Name</b>                   | <b>Description</b>   |
|                    | enable                        | Enable drp protocol  |
|                    | disable                       | Disable drp protocol |

### 3.8.9 Drp role priority

|                    |                          |                           |
|--------------------|--------------------------|---------------------------|
| <b>Description</b> | Drp config role priority |                           |
| <b>Syntax</b>      | role-priority <priority> |                           |
| <b>Parameter</b>   |                          |                           |
|                    | <b>Name</b>              | <b>Description</b>        |
|                    | priority                 | Drp role priority (0~255) |

### 3.8.10 Drp crc threshold

|                    |                           |                              |
|--------------------|---------------------------|------------------------------|
| <b>Description</b> | Drp config crc threshold  |                              |
| <b>Syntax</b>      | crc threshold <threshold> |                              |
| <b>Parameter</b>   |                           |                              |
|                    | <b>Name</b>               | <b>Description</b>           |
|                    | threshold                 | Drp crc threshold (25~65535) |

### 3.8.11 Drp primary port

|                    |   |                          |
|--------------------|---|--------------------------|
| <b>Description</b> | Drp config primary port                             |                          |
| <b>Syntax</b>      | primary-port { ring-port-1   ring-port-2   delete } |                          |
| <b>Parameter</b>   |   |                          |
|                    | <b>Name</b>   | <b>Description</b>       |
|                    | ring-port-1   | Drp the first ring port  |
|                    | ring-port-2   | Drp the second ring port |
|                    | delete  | Delete drp primary port  |

### 3.8.12 Drp backup port

|                    |                        |  |
|--------------------|------------------------|--|
| <b>Description</b> | Drp config backup port |  |
|--------------------|------------------------|--|

|                  |   |  |
|------------------|---|--|
| <b>Syntax</b>    | backup-port { add interface <port_type> <port_type_id>   delete } |  |
| <b>Parameter</b> |   |  |
|                  | <b>Name</b>   | <b>Description</b>   |
|                  | port_type   | FastEthernet : Fast Ethernet Port<br>GigabitEthernet : 1 Gigabit Ethernet Port |
|                  | port_type_id  | Port ID  |
|                  | delete  | Delete drp backup port   |

### 3.8.13 Drp dhcp mode

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Drp config dhcp mode                            |                    |
| <b>Syntax</b>      | dhcp mode { disable   home-node   normal-node } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |
|                    | disable   | disable dhcp mode  |
|                    | home-node                                       | drp home node      |
|                    | normal-node                                     | drp normal node    |

## 3.9 Spanning Tree

### 3.9.1 spanning-tree

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Enable/disable STP on this interface |                    |
| <b>Syntax</b>      | spanning-tree                        |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |
|                    |                                      |                    |

### 3.9.2 spanning-tree aggregation

|                    |                           |                    |
|--------------------|---------------------------|--------------------|
| <b>Description</b> | Spanning Tree protocol    |                    |
| <b>Syntax</b>      | spanning-tree aggregation |                    |
| <b>Parameter</b>   |                           |                    |
|                    | <b>Name</b>               | <b>Description</b> |
|                    |                           |                    |

### 3.9.3 spanning-tree auto-edge

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Auto detect edge status              |                    |
| <b>Syntax</b>      | <b>3.9.4 spanning-tree auto-edge</b> |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |
|                    |                                      |                    |

### 3.9.5 spanning-tree bpdu-guard

|                    |                           |                    |
|--------------------|---------------------------|--------------------|
| <b>Description</b> | Enable/disable BPDU guard |                    |
| <b>Syntax</b>      | spanning-tree bpdu-guard  |                    |
| <b>Parameter</b>   |                           |                    |
|                    | <b>Name</b>               | <b>Description</b> |
|                    |                           |                    |

### 3.9.6 spanning-tree edge

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| <b>Description</b> | Edge port          |                    |
|                    | spanning-tree      |                    |
|                    | STP Bridge         |                    |
| <b>Syntax</b>      | spanning-tree edge |                    |
| <b>Parameter</b>   |                    |                    |
|                    | <b>Name</b>        | <b>Description</b> |
|                    |                    |                    |

|  |  |  |
|--|--|--|
|  |  |  |
|--|--|--|

### 3.9.7 spanning-tree edge bpdu-filter

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Enable BPDU filter (stop BPDU tx/rx) |                    |
| <b>Syntax</b>      | spanning-tree edge bpdu-filter       |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |
|                    |                                      |                    |

### 3.9.8 spanning-tree mode

|                    |  |                                 |
|--------------------|--|---------------------------------|
| <b>Description</b> | mode                                     |                                 |
|                    | STP protocol mode                        |                                 |
|                    | stp                                      |                                 |
|                    | 802.1D Spanning Tree                     |                                 |
|                    | rstp                                     |                                 |
|                    | Rapid Spanning Tree (802.1w)             |                                 |
|                    | mstp                                     |                                 |
|                    | Multiple Spanning Tree (802.1s)          |                                 |
| <b>Syntax</b>      | spanning-tree mode { stp   rstp   mstp } |                                 |
| <b>Parameter</b>   |  |                                 |
|                    | <b>Name</b>                              | <b>Description</b>              |
|                    | stp                                      | 802.1D Spanning Tree            |
|                    | rstp                                     | Rapid Spanning Tree (802.1w)    |
|                    | mstp                                     | Multiple Spanning Tree (802.1s) |

### 3.9.9 spanning-tree mst cost

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | STP bridge instance<br>STP Cost of this port          |                                  |
| <b>Syntax</b>      | spanning-tree mst <0-7> cost { <1-200000000>   auto } |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>   | <b>Description</b>               |
|                    | <0-7>   | instance 0-7 (CIST=0, MST2=1...) |
|                    | <1-200000000>   | STP Cost of this port            |
|                    |   |                                  |

### 3.9.10 spanning-tree mst port-priority

|                    |   |                                  |
|--------------------|---|----------------------------------|
| <b>Description</b> | port-priority                                 |                                  |
| <b>Syntax</b>      | spanning-tree mst <0-7> port-priority <0-240> |                                  |
| <b>Parameter</b>   |   |                                  |
|                    | <b>Name</b>                                   | <b>Description</b>               |
|                    | <0-7>   | instance 0-7 (CIST=0, MST2=1...) |
|                    | <0-240>                                       | STP priority of this port        |
|                    |   |                                  |

### 3.9.11 spanning-tree mst priority

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Priority of the instance                   |  |
|                    | Range in seconds                           |  |
| <b>Syntax</b>      | spanning-tree mst <0-7> priority <0-61440> |  |
| <b>Parameter</b>   |  |  |

|  | Name      | Description                      |
|--|-----------|----------------------------------|
|  | <0-7>     | instance 0-7 (CIST=0, MST2=1...) |
|  | <0-61440> | Priority of the instance         |
|  |           |                                  |

### 3.9.12 spanning-tree mst vlan

| <b>Description</b> | VLAN keyword                             |                                  |
|--------------------|--|----------------------------------|
| <b>Syntax</b>      | spanning-tree mst <0-7> vlan <vlan_list> |                                  |
| <b>Parameter</b>   |  |                                  |
|                    | Name                                     | Description                      |
|                    | <0-7>                                    | instance 0-7 (CIST=0, MST2=1...) |
|                    | <vlan_list>                              | Range of VLANs                   |
|                    |  |                                  |

### 3.9.13 spanning-tree mst forward-time

| <b>Description</b> | forward-time<br>Delay between port states |                           |
|--------------------|---|---------------------------|
| <b>Syntax</b>      | spanning-tree mst forward-time <4-30>     |                           |
| <b>Parameter</b>   |   |                           |
|                    | Name                                      | Description               |
|                    | <4-30>                                    | Delay between port states |
|                    |   |                           |

### 3.9.14 spanning-tree mst max-age

| <b>Description</b> | Max bridge age before timeout.                           |                               |
|--------------------|--|-------------------------------|
| <b>Syntax</b>      | spanning-tree mst max-age <6-40> [ forward-time <4-30> ] |                               |
| <b>Parameter</b>   |  |                               |
|                    | Name   | Description                   |
|                    | <6-40>   | Max bridge age before timeout |
|                    | <4-30>   | forward-time                  |
|                    |  |                               |

### 3.9.15 spanning-tree mst max-hops

| <b>Description</b> | MSTP bridge max hop count         |                           |
|--------------------|-----------------------------------|---------------------------|
| <b>Syntax</b>      | spanning-tree mst max-hops <6-40> |                           |
| <b>Parameter</b>   |                                   |                           |
|                    | Name                              | Description               |
|                    | <6-40>                            | MSTP bridge max hop count |
|                    |                                   |                           |

### 3.9.16 spanning-tree mst name

| <b>Description</b> | Name of the bridge<br>Revision<br>Revision keyword |                    |
|--------------------|--|--------------------|
| <b>Syntax</b>      | spanning-tree mst name <word32> revision <0-65535> |                    |
| <b>Parameter</b>   |  |                    |
|                    | Name   | Description        |
|                    | <word32>   | Name of the bridge |
|                    | <0-65535>  | Revision keyword   |
|                    |  |                    |

### 3.9.17 spanning-tree mst <instance>

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | instance 0-7 (CIST=0, MST2=1...)  |  |
| <b>Syntax</b>      | spanning-tree mst <instance> priority <prio><br>spanning-tree mst <instance> vlan <v_vlan_list> |  |
| <b>Parameter</b>   |   |  |

|  | Name        | Description                                       |
|--|-------------|---|
|  | instance    | <Instance : 0-7> instance 0-7 (CIST=0, MST2=1...) |
|  | priority    | Priority of the instance                          |
|  | vlan        | VLAN keyword                                      |
|  | prio        | <Prio : 0-61440> Range in seconds                 |
|  | v_vlan_list | <vlan_list> Range of VLANs                        |

### 3.9.18 spanning-tree recovery

| <b>Description</b> | Recovery                                   |                                       |
|--------------------|--|---------------------------------------|
| <b>Syntax</b>      | spanning-tree recovery interval <interval> |                                       |
| <b>Parameter</b>   |  |                                       |
|                    | Name                                       | Description                           |
|                    | interval                                   | The interval                          |
|                    | interva                                    | Interval : 30-86400> Range in seconds |

### 3.9.19 spanning-tree transmit

| <b>Description</b> | Transmit                                      |   |
|--------------------|---|---|
| <b>Syntax</b>      | spanning-tree transmit hold-count <holdcount> |   |
| <b>Parameter</b>   |   |   |
|                    | Name  | Description                                   |
|                    | hold-count                                    | Max number of transmit BPDUs per sec          |
|                    | holdcount                                     | <Holdcount : 1-10> 1-10 per sec, 6 is default |

## 3.10 sFlow Configure Command

### 3.10.1 sflow

| <b>Description</b> | Enables/disables flow sampling on this port. |                  |
|--------------------|--|------------------|
| <b>Syntax</b>      | sflow [ <range_list> ]                       |                  |
| <b>Parameter</b>   |  |                  |
|                    | Name   | Description      |
|                    | < range_list >                               | Sampler instance |

### 3.10.2 sflow agent-ip

| <b>Description</b> | The agent IP address used as agent-address in UDP datagrams. Defaults to IPv4 loopback address. |              |
|--------------------|---|--------------|
| <b>Syntax</b>      | sflow agent-ip { ipv4 <ipv4_addr>   ipv6 <ipv6_addr> }  |              |
| <b>Parameter</b>   |   |              |
|                    | Name  | Description  |
|                    | < ipv4_addr >   | Ipv4 address |
|                    | < ipv6_addr >   | ipv6 address |

### 3.10.3 sflow collector-address

| <b>Description</b> | Sflow runtime, see sflow_icli_functions                      |                  |
|--------------------|--|------------------|
| <b>Syntax</b>      | sflow collector-address [ receiver <range_list> ] [ <word> ] |                  |
| <b>Parameter</b>   |  |                  |
|                    | Name   | Description      |
|                    | < range_list >   | Sampler instance |

### 3.10.4 sflow max-datagram-size

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Statistics flow Maximum datagram size. |  |
|--------------------|--|--|

|                  |  |                    |
|------------------|--|--------------------|
| <b>Syntax</b>    | sflow max-datagram-size [ receiver <range_list> ] <200-1468> |                    |
| <b>Parameter</b> |  |                    |
|                  | <b>Name</b>  | <b>Description</b> |
|                  | <range_list>   | receiver list      |
|                  | <200-1468>   | packet byte        |

### 3.10.5 sflow max-sampling-size

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Specifies the maximum number of bytes to transmit per flow sample. |                    |
| <b>Syntax</b>      | sflow max-sampling-size [ sampler <range_list> ] [ <14-200> ]      |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | < range_list >   | Sampler instance   |
|                    | <200-1468>   | packet byte        |

### 3.10.6 sflow collector-port

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Collector UDP port   |  |
| <b>Syntax</b>      | sflow collector-port [ receiver <rcvr_idx_list> ] <collector_port> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                     |
|                    | collector_port   | <Collector Port : 1-65535> Port number |

### 3.10.7 sflow sampling-rate

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Specifies the statistical sampling rate. The sample rate is specified as N to sample 1/Nth of the packets in the monitored flows. There are no restrictions on the value, but the switch will adjust it to the closest possible sampling rate. |                    |
| <b>Syntax</b>      | sflow sampling-rate [ sampler <range_list> ] [ <1-4294967295> ]  |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | < range_list >   | Sampler instance   |
|                    | <1-4294967295>   | Sampling rate      |

### 3.10.8 sflow timeout

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Receiver timeout measured in seconds. The switch decrements the timeout once per second, and as long as it is non-zero, the receiver receives samples. Once the timeout reaches 0, the receiver and all its configuration is reset to defaults. |                    |
| <b>Syntax</b>      | sflow timeout [ receiver <range_list> ] <0-2147483647>  |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | < range_list >  | Sampler instance   |
|                    | <0-2147483647>  | Number of seconds. |

## 3.11 SNMP Configure Command

### 3.11.1 snmp-server

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| <b>Description</b> | Enable SNMP server |                    |
| <b>Syntax</b>      | snmp-server        |                    |
| <b>Parameter</b>   |                    |                    |
|                    | <b>Name</b>        | <b>Description</b> |

### 3.11.2 snmp-server access

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | snmp-server access configuration  |  |
| <b>Syntax</b>      | snmp-server access < group name > model { v1   v2c   v3   any } level { auth   noauth   priv } [ read <word255> ] [ write <word255> ] |  |

| Parameter | Name                     | Description                       |
|-----------|--------------------------|-----------------------------------|
|           | < group name >           | 32 words                          |
|           | < v1   v2c   v3   any >  | V1~v3 security model              |
|           | < level >                | security level                    |
|           | { auth   noauth   priv } | authNoPriv Security Level         |
|           |                          | noAuthNoPriv Security Level       |
|           |                          | authPriv Security Level           |
|           | read                     | specify a read view for the group |
|           | <word255>                | read view name                    |

### 3.11.3 snmp-server community v2c

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Set the SNMP v2c community                      |                    |
| <b>Syntax</b>      | snmp-server community v2c <word127> [ ro   rw ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                     | <b>Description</b> |
|                    | < word127 >                                     | Community word     |
|                    | < ro >  | Read only          |
|                    | <rw>  | Read write         |

### 3.11.4 snmp-server community v3

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | S Set the SNMP v3 community                                       |                    |
| <b>Syntax</b>      | snmp-server community v3 <word127> [ <ipv4_addr> <ipv4_netmask> ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | < word127 >   | Community word     |
|                    | < ipv4_addr >   | IPv4 address       |
|                    | <ipv4_netmask>  | IPv4 netmask       |

### 3.11.5 snmp-server host

|                    |                                  |                                |
|--------------------|----------------------------------|--------------------------------|
| <b>Description</b> | Set SNMP server's configurations |                                |
| <b>Syntax</b>      | snmp-server host <word32>        |                                |
| <b>Parameter</b>   |                                  |                                |
|                    | <b>Name</b>                      | <b>Description</b>             |
|                    | < word32 >                       | Name of the host configuration |

### 3.11.6 snmp-server host traps

|                    |  |                                |
|--------------------|--|--------------------------------|
| <b>Description</b> | Set SNMP host's configurations   |                                |
| <b>Syntax</b>      | snmp-server host < Name of the host configuration > traps [ linkup ] [ linkdown ] [ lldp ] |                                |
| <b>Parameter</b>   |  |                                |
|                    | <b>Name</b>  | <b>Description</b>             |
|                    | < Name of the host configuration >   | Name of the host configuration |
|                    | <200-1468>   | packet byte                    |
|                    | [ linkup ]   | Link up event                  |
|                    | [ linkdown ]   | Link down event                |
|                    | [ lldp ]   | LLDP event                     |

### 3.11.7 snmp-server trap

|                    |                                  |                    |
|--------------------|----------------------------------|--------------------|
| <b>Description</b> | Set SNMP server's configurations |                    |
| <b>Syntax</b>      | snmp-server trap                 |                    |
| <b>Parameter</b>   |                                  |                    |
|                    | <b>Name</b>                      | <b>Description</b> |

### 3.11.8 snmp-server user

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Set the SNMPv3 user's configurations                           |  |
| <b>Syntax</b>      | snmp-server user <Username> engine-id <Engine ID octet string> |  |

|                  |   |                      |
|------------------|---|----------------------|
|                  | [ { md5 <word8-32>   sha <word8-40> } [ priv { des   aes } <word8-32> ] ] |                      |
| <b>Parameter</b> |   |                      |
|                  | <b>Name</b>   | <b>Description</b>   |
|                  | <Username >   | 32 words             |
|                  | <Engine ID octet string>  | word10-32            |
|                  | MD5   | Set MD5 protocol     |
|                  | sha   | Set SHA protocol     |
|                  | <word8-40>  | SHA password         |
|                  | priv  | Set Privacy          |
|                  | { des   aes }   | Set DES/AES protocol |
|                  | <word8-32>  | Set privacy password |

### 3.11.9 snmp-server version

|                    |                                       |                    |
|--------------------|---------------------------------------|--------------------|
| <b>Description</b> | Set the SNMP server's version         |                    |
| <b>Syntax</b>      | snmp-server version { v1   v2c   v3 } |                    |
| <b>Parameter</b>   |                                       |                    |
|                    | <b>Name</b>                           | <b>Description</b> |
|                    | { v1   v2c   v3 }                     | SNMP v1,v2c,v3     |

### 3.11.10 snmp-server view

|                    |   |                                      |
|--------------------|---|--------------------------------------|
| <b>Description</b> | Snmp MIB view configuration                               |                                      |
| <b>Syntax</b>      | snmp-server view <word32> <word255> { include   exclude } |                                      |
| <b>Parameter</b>   |   |                                      |
|                    | <b>Name</b>   | <b>Description</b>                   |
|                    | < word32 >  | MIB view name                        |
|                    | < word255>  | MIB view OID                         |
|                    | { include   exclude }                                     | Included/Excluded type from the view |

### 3.11.11 SNMP trap receive ipv6 host

|                    |   |                                   |
|--------------------|---|-----------------------------------|
| <b>Description</b> | host configuration                                  |                                   |
| <b>Syntax</b>      | host <ipv6_ucast> [ <1-65535> ] [ traps   informs ] |                                   |
| <b>Parameter</b>   |   |                                   |
|                    | <b>Name</b>   | <b>Description</b>                |
|                    | ipv6_ucast  | IP address of SNMP trap host      |
|                    | 1-65535   | UDP port of the trap messages     |
|                    | traps   | Send Trap messages to this host   |
|                    | informs   | Send Inform messages to this host |

### 3.11.12 snmp-server contact

|                    |                                 |                          |
|--------------------|---------------------------------|--------------------------|
| <b>Description</b> | SNMP server contact             |                          |
| <b>Syntax</b>      | snmp-server contact <v_line255> |                          |
| <b>Parameter</b>   |                                 |                          |
|                    | <b>Name</b>                     | <b>Description</b>       |
|                    | v_line255                       | <line255> contact string |

### 3.11.13 snmp-server engine-id

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | SNMP server engine ID                  |  |
| <b>Syntax</b>      | snmp-server engine-id local <engineID> |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>                            | <b>Description</b>                     |
|                    | local                                  | Set SNMP local engine ID               |
|                    | engineID                               | <Engineid : word10-32> local engine ID |

### 3.11.14 snmp-server location

|                    |                                  |                           |
|--------------------|----------------------------------|---------------------------|
| <b>Description</b> | SNMP server location             |                           |
| <b>Syntax</b>      | snmp-server location <v_line255> |                           |
| <b>Parameter</b>   |                                  |                           |
|                    | <b>Name</b>                      | <b>Description</b>        |
|                    | v_line255                        | <line255> location string |

### 3.11.15 snmp-server security-to-group

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | SNMP server security  |  |
| <b>Syntax</b>      | snmp-server security-to-group model { v1   v2c   v3 } name <security_name> group <group_name> |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                         |
|                    | model   | security model                             |
|                    | v1  | v1 security model                          |
|                    | v2c   | v2c security model                         |
|                    | v3  | v3 security model                          |
|                    | name  | security user                              |
|                    | security_name   | <SecurityName : word32> security user name |
|                    | group   | security group                             |
|                    | group_name  | <GroupName : word32> security group name   |

### 3.11.16 SNMP trap receive ipv4 host

|                    |  |                                   |
|--------------------|--|-----------------------------------|
| <b>Description</b> | host configuration   |                                   |
| <b>Syntax</b>      | host { <ipv4_ucast>   <hostname> } [ <1-65535> ] [ traps   informs ] |                                   |
| <b>Parameter</b>   |  |                                   |
|                    | <b>Name</b>  | <b>Description</b>                |
|                    | ipv4_ucast   | IP address of SNMP trap host      |
|                    | hostname   | hostname of SNMP trap host        |
|                    | 1-65535  | UDP port of the trap messages     |
|                    | traps  | Send Trap messages to this host   |
|                    | informs  | Send Inform messages to this host |

## 3.12 Qos Function Command

### 3.12.1 qos qce

|                    |   |                                |
|--------------------|---|--------------------------------|
| <b>Description</b> | QCE setting                                 |                                |
| <b>Syntax</b>      | qos qce { <ld : 1-256>   refresh   update } |                                |
| <b>Parameter</b>   |   |                                |
|                    | <b>Name</b>                                 | <b>Description</b>             |
|                    | <ld : 1-256>                                | QCE ID                         |
|                    | refresh                                     | Refresh QCE tables in hardware |
|                    | update                                      | Update an existing QCE         |

### 3.12.2 qos storm

|                    |   |                         |
|--------------------|---|-------------------------|
| <b>Description</b> | QoS storm   |                         |
| <b>Syntax</b>      | qos storm { unicast   multicast   broadcast } { { <rate> [ kfps ] }   { 1024 kfps } } |                         |
| <b>Parameter</b>   |   |                         |
|                    | <b>Name</b>   | <b>Description</b>      |
|                    | broadcast   | Police broadcast frames |
|                    | multicast   | Police multicast frames |
|                    | unicast   | Police unicast frames   |

|  |        |   |
|--|--------|---|
|  | <rate> | 1024, Rate is 1024 kfps<br><Rate : 1,2,4,8,16,32,64,128,256,512> Policer rate (default fps) |
|--|--------|---|

### 3.12.3 qos cos

|                    |                                |                           |
|--------------------|--------------------------------|---------------------------|
| <b>Description</b> | Class of service configuration |                           |
| <b>Syntax</b>      | qos cos <0-7>                  |                           |
| <b>Parameter</b>   |                                |                           |
|                    | <b>Name</b>                    | <b>Description</b>        |
|                    | <0-7>                          | Specific class of service |

### 3.12.4 qos dscp-classify

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Set qos dscp-classify.                      |                    |
| <b>Syntax</b>      | qos dscp-classify { zero   selected   any } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                                 | <b>Description</b> |

### 3.12.5 qos dscp-remark

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Set qos dscp-remark                            |                    |
| <b>Syntax</b>      | qos dscp-remark { rewrite   remap   remap-dp } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                    | <b>Description</b> |

### 3.12.6 qos dscp-translate

|                    |                                |  |
|--------------------|--------------------------------|--|
| <b>Description</b> | Enable qos dscp-translate mode |  |
| <b>Syntax</b>      | qos dscp-translate             |  |

### 3.12.7 qos map cos-dscp

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Configure cos mapping to dscptable  |  |
| <b>Syntax</b>      | qos map cos-dscp <0~7> dpl <0~1> dscp { <0-63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | <0~7>   | Cos level  |
|                    | <0~1>   | Specific drop precedence level                             |
|                    | <0-63>  | Dscp level   |
|                    | be  | Default PHB(DSCP 0) for best effort traffic                |
|                    | af11~13   | Assured Forwarding PHB 11~13(DSCP 10,12,14)                |
|                    | af22~23   | Assured Forwarding PHB 22~23(DSCP 20,22)                   |
|                    | af31~33   | Assured Forwarding PHB 31~33(DSCP 26,28,30)                |
|                    | Af41~43   | Assured Forwarding PHB 41~43(DSCP 34,36,38)                |
|                    | cs1~7   | Class Selector PHB CS1~7 precedence 1~7(DSCP 8*(cs value)) |
|                    | ef  | Expedited Forwarding PHB(DSCP 46)                          |
|                    | va  | Voice Admit PHB(DSCP 44)                                   |

### 3.12.8 qos map dscp-cos

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure dscp mapping to cos table  |                    |
| <b>Syntax</b>      | qos map dscp-cos { <0~63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } cos <0-7> dpl <dpl> |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |

|  |         |  |
|--|---------|--|
|  | <0~7>   | Cos level  |
|  | <0-63>  | Dscp level   |
|  | be      | Default PHB(DSCP 0) for best effort traffic                |
|  | af11~13 | Assured Forwarding PHB 11~13(DSCP 10,12,14)                |
|  | af22~23 | Assured Forwarding PHB 22~23(DSCP 20,22)                   |
|  | af31~33 | Assured Forwarding PHB 31~33(DSCP 26,28,30)                |
|  | Af41~43 | Assured Forwarding PHB 41~43(DSCP 34,36,38)                |
|  | cs1~7   | Class Selector PHB CS1~7 precedence 1~7(DSCP 8*(cs value)) |
|  | ef      | Expedited Forwarding PHB(DSCP 46)                          |
|  | va      | Voice Admit PHB(DSCP 44)                                   |
|  | <0~1>   | Specific drop precedence level                             |
|  |         |  |

### 3.12.9 qos map dscp-egress-translation

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Configure dscp egress-translation  |  |
| <b>Syntax</b>      | qos map dscp-egress-translation { <0~63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } <0~1> to { <0-63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | <0~7>  | Cos level  |
|                    | <0-63>   | Dscp level   |
|                    | be   | Default PHB(DSCP 0) for best effort traffic                |
|                    | af11~13  | Assured Forwarding PHB 11~13(DSCP 10,12,14)                |
|                    | af22~23  | Assured Forwarding PHB 22~23(DSCP 20,22)                   |
|                    | af31~33  | Assured Forwarding PHB 31~33(DSCP 26,28,30)                |
|                    | Af41~43  | Assured Forwarding PHB 41~43(DSCP 34,36,38)                |
|                    | cs1~7  | Class Selector PHB CS1~7 precedence 1~7(DSCP 8*(cs value)) |
|                    | ef   | Expedited Forwarding PHB(DSCP 46)                          |
|                    | va   | Voice Admit PHB(DSCP 44)                                   |
|                    | <0~1>  | Specific drop precedence level                             |
|                    |  |  |

### 3.12.10 qos map dscp-ingress-translation

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure dscp ingress-translation  |                    |
| <b>Syntax</b>      | qos map dscp-ingress-translation { <0~63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } to { <0-63>   { be   af11   af12   af13   af21   af22   af23   af31   af32   af33   af41   af42   af43   cs1   cs2   cs3   cs4   cs5   cs6   cs7   ef   va } } |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | <0~7>   | Cos level          |
|                    | <0-63>  | Dscp level         |

|  |         |  |
|--|---------|--|
|  | be      | Default PHB(DSCP 0) for best effort traffic                |
|  | af11~13 | Assured Forwarding PHB 11~13(DSCP 10,12,14)                |
|  | af22~23 | Assured Forwarding PHB 22~23(DSCP 20,22)                   |
|  | af31~33 | Assured Forwarding PHB 31~33(DSCP 26,28,30)                |
|  | Af41~43 | Assured Forwarding PHB 41~43(DSCP 34,36,38)                |
|  | cs1~7   | Class Selector PHB CS1~7 precedence 1~7(DSCP 8*(cs value)) |
|  | ef      | Expedited Forwarding PHB(DSCP 46)                          |
|  | va      | Voice Admit PHB(DSCP 44)                                   |
|  | <0~1>   | Specific drop precedence level                             |

### 3.12.11 qos policer

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | Configure qos policer                      |                         |
| <b>Syntax</b>      | qos policer <unit> [ fps ] [ flowcontrol ] |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                                | <b>Description</b>      |
|                    | < unit >                                   | Traffic meter           |
|                    | < fps >                                    | Frame rate              |
|                    | [ flowcontrol ]                            | Enable flowcontrol mode |

### 3.12.12 qos wrr

|                    |   |                        |
|--------------------|---|------------------------|
| <b>Description</b> | Specifies qos wrr mode                                  |                        |
| <b>Syntax</b>      | qos wrr <1-100> <1-100> <1-100> <1-100> <1-100> <1-100> |                        |
| <b>Parameter</b>   |   |                        |
|                    | <b>Name</b>   | <b>Description</b>     |
|                    | <1-100>   | every level proportion |

### 3.12.13 qos queue-shaper

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | Configure queue-shaper command                 |   |
| <b>Syntax</b>      | qos queue-shaper queue <0~7> <uint> [ excess ] |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>                                    | <b>Description</b>                      |
|                    | <1-100>  | every level proportion                  |
|                    | <uint>   | Traffic meter                           |
|                    | [ excess ]                                     | Agree the shaper could be excess or not |

### 3.12.14 qos queue-policer

|                    |                                      |                    |
|--------------------|--------------------------------------|--------------------|
| <b>Description</b> | Configure queue-policer command      |                    |
| <b>Syntax</b>      | qos queue-policer queue <0~7> <uint> |                    |
| <b>Parameter</b>   |                                      |                    |
|                    | <b>Name</b>                          | <b>Description</b> |
|                    | <0~7>                                | Queue number       |
|                    | <uint>                               | Traffic meter      |

### 3.12.15 qos shaper <unit>

|                    |                              |                        |
|--------------------|------------------------------|------------------------|
| <b>Description</b> | Configure qos shaper command |                        |
| <b>Syntax</b>      | qos shaper <uint>            |                        |
| <b>Parameter</b>   |                              |                        |
|                    | <b>Name</b>                  | <b>Description</b>     |
|                    | <1-100>                      | every level proportion |
|                    | <uint>                       | Traffic meter          |

## 3.13 GMRP Functional Commands

### 3.13.1 gmrp enable

|                    |                     |
|--------------------|---------------------|
| <b>Description</b> | enable global gmrp. |
| <b>Syntax</b>      | gmrp enable         |
| <b>Parameter</b>   |                     |

### 3.13.2 add gmrp agent mac-address

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | add gmrp agent mac-address.   |                    |
| <b>Syntax</b>      | gmrp agent mac-address <mac_addr> vlan <vlan_id> interface <port_type_list> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | mac-address   | Agent MAC address  |
|                    | vlan  | VLAN keyword       |
|                    | interface   | Interface list     |

### 3.13.3 gmrp timer

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | set gmrp timer.   |                    |
| <b>Syntax</b>      | gmrp timer {[join <100-327600>][leave <100-327600>][hold <100-327600>][leave-all <100-327600>]} |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | join  | Join timer         |
|                    | leave   | Leave timer        |
|                    | hold  | Hold timer         |
|                    | leave-all   | Leave-all timer    |

## 3.14 IGMP Functional Commands

### 3.14.1 ip igmp host-proxy [ leave-proxy ]

|                    |                                    |                      |
|--------------------|------------------------------------|----------------------|
| <b>Description</b> | IGMP proxy for leave configuration |                      |
| <b>Syntax</b>      | ip igmp host-proxy [ leave-proxy ] |                      |
| <b>Parameter</b>   |                                    |                      |
|                    | <b>Name</b>                        | <b>Description</b>   |
|                    | leave-proxy                        | IGMP proxy for leave |

### 3.14.2 ip igmp snooping

|                    |                  |
|--------------------|------------------|
| <b>Description</b> | Snooping igmp    |
| <b>Syntax</b>      | ip igmp snooping |
| <b>Parameter</b>   |                  |

### 3.14.3 ip igmp snooping immediate-leave

|                    |  |
|--------------------|--|
| <b>Description</b> | IP IGMP snooping immediate leave configuration |
| <b>Syntax</b>      | ip igmp snooping immediate-leave               |
| <b>Parameter</b>   |  |

### 3.14.4 ip igmp snooping last-member-query-interval

|                    |  |                             |
|--------------------|--|-----------------------------|
| <b>Description</b> | IP IGMP snooping Last Member Query Interval in tenths of seconds |                             |
| <b>Syntax</b>      | ip igmp snooping last-member-query-interval <0-31744>            |                             |
| <b>Parameter</b>   |  |                             |
|                    | <b>Name</b>  | <b>Description</b>          |
|                    | 0-31744  | 0 - 31744 tenths of seconds |

### 3.14.5 ip igmp snooping max-groups

|                    |                                     |   |
|--------------------|-------------------------------------|---|
| <b>Description</b> | IGMP group throttling configuration |   |
| <b>Syntax</b>      | ip igmp snooping max-groups <1-10>  |   |
| <b>Parameter</b>   |                                     |   |
|                    | <b>Name</b>                         | <b>Description</b>                        |
|                    | 1-10                                | Maximun number of IGMP group registration |

### 3.14.6 ip igmp snooping mrouter

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | IP IGMP snooping Multicast router port configuration |  |
| <b>Syntax</b>      | Ip igmp snooping mrouter                             |  |
| <b>Parameter</b>   |  |  |

### 3.14.7 ip igmp snooping querier

|                    |  |   |
|--------------------|--|---|
| <b>Description</b> | IP IGMP querier configuration                                |   |
| <b>Syntax</b>      | ip igmp snooping querier { election   address <ipv4_ucast> } |   |
| <b>Parameter</b>   |  |   |
|                    | <b>Name</b>  | <b>Description</b>                              |
|                    | election   | Act as an IGMP Querier to join Querier-Election |
|                    | address  | IGMP Querier address configuration              |
|                    | ipv4_ucast   | A valid IPv4 unicast address                    |

### 3.14.8 ip igmp snooping query-interval

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | IP IGMP snooping Query-Intervalin seconds |                    |
| <b>Syntax</b>      | ip igmp snooping query-interval <1-31744> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                               | <b>Description</b> |
|                    | 1-317                                     | 1 - 31744 seconds  |

### 3.14.9 ip igmp snooping vlan

|                    |                                  |                         |
|--------------------|----------------------------------|-------------------------|
| <b>Description</b> | ipigmp snooping vlan IDs         |                         |
| <b>Syntax</b>      | ip igmp snooping vlan<vlan_list> |                         |
| <b>Parameter</b>   |                                  |                         |
|                    | <b>Name</b>                      | <b>Description</b>      |
|                    | vlan_list                        | VLAN identifier(s): VID |

### 3.14.10 ip igmp ssm-range

|                    |   |                              |
|--------------------|---|------------------------------|
| <b>Description</b> | SSM range   |                              |
| <b>Syntax</b>      | ip igmp ssm-range <v_ipv4_mcast> <ipv4_prefix_length> |                              |
| <b>Parameter</b>   |   |                              |
|                    | <b>Name</b>   | <b>Description</b>           |
|                    | v_ipv4_mcast  | Valid IPv4 multicast address |
|                    | ipv4_prefix_length                                    | Length                       |

### 3.14.11 clear ip igmp snooping statistics

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | clear ip igmp snooping statisti                       |                    |
| <b>Syntax</b>      | clear ip igmp snooping [ vlan<vlan_list> ] statistics |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | vlan_list   | VLAN list.         |

## 3.15 Authenticate Mode Commands

### 3.15.1 radius-server attribute 32

|                    |                                   |                    |
|--------------------|-----------------------------------|--------------------|
| <b>Description</b> | Configure radius-server attribute |                    |
| <b>Syntax</b>      | radius-server attribute 32 <id>   |                    |
| <b>Parameter</b>   |                                   |                    |
|                    | <b>Name</b>                       | <b>Description</b> |
|                    | id                                | Id : line1-253     |

### 3.15.2 radius-server attribute 4

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Configure radius-server attribute      |                    |
| <b>Syntax</b>      | radius-server attribute 4 <ipv4_ucast> |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                            | <b>Description</b> |
|                    | <ipv4_ucast>                           | ipv4_ucast address |

### 3.15.3 radius-server attribute 95

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure radius-server attribute       |                    |
| <b>Syntax</b>      | radius-server attribute 95 <ipv6_ucast> |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>                             | <b>Description</b> |
|                    | <ipv6_ucast>                            | Ipv6_ucast address |

### 3.15.4 radius-server deadtime

|                    |                                  |                    |
|--------------------|----------------------------------|--------------------|
| <b>Description</b> | Configure radius-server deadtime |                    |
| <b>Syntax</b>      | radius-server deadtime <1-1440>  |                    |
| <b>Parameter</b>   |                                  |                    |
|                    | <b>Name</b>                      | <b>Description</b> |
|                    | <1-1440>                         | Time in minutes    |

### 3.15.5 radius-server host [ auth-port ] [ acct-port ] [ timeout ] [ retransmit ] [ key ]

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Configure radius-server host behavior  |  |
| <b>Syntax</b>      | radius-server host <word1-255> [ auth-port <0-65535> ] [ acct-port <0-65535> ] [ timeout <1-1000> ] [ retransmit <1-1000> ] [ key <line1-63> ] |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | <word1-255>  | Hostname or IP address   |
|                    | auth-port <0-65535>  | UDP port number for RADIUS authentication server                         |
|                    | acct-port <0-65535>  | UDP port number for RADIUS accounting server                             |
|                    | timeout <1-1000>   | Wait time in seconds for this RADIUS server to reply (overrides default) |
|                    | retransmit <1-1000>  |  |

### 3.15.6 radius -server key

|                    |                         |                                 |
|--------------------|-------------------------|---------------------------------|
| <b>Description</b> | radius-server key       |                                 |
| <b>Syntax</b>      | radius-server key <key> |                                 |
| <b>Parameter</b>   |                         |                                 |
|                    | <b>Name</b>             | <b>Description</b>              |
|                    | key                     | <Key : line1-63> The shared key |

### 3.15.7 radius-server retransmit

|                    |                          |
|--------------------|--------------------------|
| <b>Description</b> | radius-server retransmit |
|--------------------|--------------------------|

|                  |                                    |  |
|------------------|------------------------------------|--|
| <b>Syntax</b>    | radius-server retransmit <retries> |  |
| <b>Parameter</b> |                                    |  |
|                  | <b>Name</b>                        | <b>Description</b>                                     |
|                  | retries                            | <Retries : 1-1000> Number of retries for a transaction |

### 3.15.8 radius-server timeout

|                    |                                 |  |
|--------------------|---------------------------------|--|
| <b>Description</b> | radius-server timeout           |  |
| <b>Syntax</b>      | radius-server timeout <seconds> |  |
| <b>Parameter</b>   |                                 |  |
|                    | <b>Name</b>                     | <b>Description</b>                     |
|                    | seconds                         | <Seconds : 1-1000> Wait time in second |

### 3.15.9 tacacs-server deadtime <1-1440>

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Time to stop using a TACACS+ server that doesn't respond |                    |
| <b>Syntax</b>      | tacacs-server deadtime <1-1440>                          |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>  | <b>Description</b> |
|                    | < <1-1440>   | Time in minutes    |

### 3.15.10 tacacs-server host [ auth-port] [ timeout ] [ key]

|                    |   |                    |
|--------------------|---|--------------------|
| <b>Description</b> | Configure tacacs-server host behavior   |                    |
| <b>Syntax</b>      | tacacs-server host <word1-255> [ port <0-65535> ] [ timeout <1-1000> ] [ key <line1-63> ] |                    |
| <b>Parameter</b>   |   |                    |
|                    | <b>Name</b>   | <b>Description</b> |
|                    | < <1-1440>  | TCP port number    |

### 3.15.11 dot1x feature

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Globally enables/disables a dot1x feature functionality         |  |
| <b>Syntax</b>      | dot1x feature { [ guest-vlan ] [ radius-qos ] [ radius-vlan ] } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>                                       |
|                    | guest-vlan  | Globally enables/disables state of guest-vlan            |
|                    | radius-qos  | Globally enables/disables state of RADIUS-assigned QoS.  |
|                    | radius-vlan   | Globally enables/disables state of RADIUS-assigned VLAN. |

### 3.15.12 dot1x authentication timer

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | dot1x authentication timer   |  |
| <b>Syntax</b>      | dot1x authentication timer { inactivity <v_10_to_100000> }   { re-authenticate <v_1_to_3600> } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>   |
|                    | inactivity   | Time in seconds between check for activity on successfully authenticated MAC addresses |
|                    | re-authenticate  | The period between re-authentication attempts in seconds                               |

### 3.15.13 dot1x max-reauth-req

|                    |                                     |  |
|--------------------|-------------------------------------|--|
| <b>Description</b> | Max value of authentication request |  |
| <b>Syntax</b>      | dot1x max-reauth-req <1-255>        |  |
| <b>Parameter</b>   |                                     |  |

|  | Name    | Description     |
|--|---------|-----------------|
|  | <1-255> | number of times |

### 3.15.14 dot1x re-authentication

|                    |                         |
|--------------------|-------------------------|
| <b>Description</b> | re-authentication       |
| <b>Syntax</b>      | dot1x re-authentication |
| <b>Parameter</b>   |                         |

### 3.15.15 dot1x system-auth-control

|                    |                               |
|--------------------|-------------------------------|
| <b>Description</b> | System authentication control |
| <b>Syntax</b>      | dot1x system-auth-control     |
| <b>Parameter</b>   |                               |

### 3.15.16 dot1x timeout

|                    |   |  |
|--------------------|---|--|
| <b>Description</b> | Timeout control   |  |
| <b>Syntax</b>      | dot1x timeout { quiet-period <v_10_to_1000000> }   { tx-period <v_1_to_65535> } |  |
| <b>Parameter</b>   |   |  |
|                    | <b>Name</b>   | <b>Description</b>   |
|                    | quiet-period  | Time in seconds before a MAC-address that failed authentication gets a new authentication chance |
|                    | tx-period   | the time between EAPOL retransmissions   |

### 3.15.17 dot1x guest-vlan

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | G Enables/disables Guest VLAN globally or on one or more ports |  |
| <b>Syntax</b>      | dot1x guest-vlan<br>dot1x guest-vlan<1-4095>                   |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                               |
|                    | <1-4095>   | Guest VLAN ID used when entering the Guest VLAN. |

### 3.15.18 show radius-server [ statistics ]

|                    |                                   |                                |
|--------------------|-----------------------------------|--------------------------------|
| <b>Description</b> | show radius-server statistics     |                                |
| <b>Syntax</b>      | show radius-server [ statistics ] |                                |
| <b>Parameter</b>   |                                   |                                |
|                    | <b>Name</b>                       | <b>Description</b>             |
|                    | [ statistics ]                    | Count radius packet statistics |

### 3.15.19 enable

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Privilege level control  |  |
| <b>Syntax</b>      | Enable { password [ level <priv> ] <password> }   { secret { 0   5 } [ level <priv> ] <password> } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                         |
|                    | password   | Assign the privileged level clear password |
|                    | secret   | Assign the privileged level secret         |

### 3.15.20 end

|                    |            |
|--------------------|------------|
| <b>Description</b> | Level exit |
| <b>Syntax</b>      | end        |
| <b>Parameter</b>   |            |

### 3.15.21 exit

|                    |            |
|--------------------|------------|
| <b>Description</b> | Level exit |
| <b>Syntax</b>      | end        |
| <b>Parameter</b>   |            |

### 3.15.22 hostname

|                    |                            |
|--------------------|----------------------------|
| <b>Description</b> | This system's network name |
| <b>Syntax</b>      | hostname <hostname>        |
| <b>Parameter</b>   |                            |

## 3.16 Loop-Protection Configure commands

### 3.16.1 loop-protect

|                    |                                       |
|--------------------|---------------------------------------|
| <b>Description</b> | Loop protection configuration on port |
| <b>Syntax</b>      | loop-protect                          |
| <b>Parameter</b>   |                                       |

### 3.16.2 loop-protect action

|                    |  |                    |
|--------------------|--|--------------------|
| <b>Description</b> | Loop protection configuration on port        |                    |
| <b>Syntax</b>      | loop-protect action { [ shutdown ] [ log ] } |                    |
| <b>Parameter</b>   |  |                    |
|                    | <b>Name</b>                                  | <b>Description</b> |
|                    | shutdown                                     | Shutdown port      |
|                    | log  | Generate log       |

### 3.16.3 loop-protect shutdown-time

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | Loop protection shutdown time interval |                         |
| <b>Syntax</b>      | loop-protect shutdown-time <0-604800>  |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                            | <b>Description</b>      |
|                    | 0-604800                               | Shutdown time in second |

### 3.16.4 loop-protect transmit-time

|                    |  |                         |
|--------------------|--|-------------------------|
| <b>Description</b> | Loop protection transmit time interval |                         |
| <b>Syntax</b>      | loop-protect transmit-time <1-10>      |                         |
| <b>Parameter</b>   |  |                         |
|                    | <b>Name</b>                            | <b>Description</b>      |
|                    | 1-10                                   | Transmit time in second |

### 3.16.5 loop-protect tx-mode

|                    |  |
|--------------------|--|
| <b>Description</b> | Loop protection actively generate PDUs |
| <b>Syntax</b>      | loop-protect tx-mode                   |
| <b>Parameter</b>   |  |

## 3.17 LLDP Configure commands

### 3.17.1 lldp holdtime

|                    |   |
|--------------------|---|
| <b>Description</b> | Sets LLDP hold time (The neighbor switch will discarded the LLDP information after \"hold time\" multiplied with \"timer\" seconds ). |
| <b>Syntax</b>      | lldp holdtime <2-10>  |
| <b>Parameter</b>   |   |

|  | Name   | Description           |
|--|--------|-----------------------|
|  | <2-10> | Holdtime 2-10 seconds |

### 3.17.2 lldp med

| Description | LLDP MED          |   |   |
|-------------|-------------------|---|---|
| Syntax      | See Description   |   |   |
| Parameter   |                   |   |   |
|             | Name              | Description   |   |
|             | datum             | Datum (geodetic system) type  |   |
|             |                   | nad83-mllw  | Mean lower low water datum 1983   |
|             |                   | nad83-navd88  | North American vertical datum 1983  |
|             |                   | wgs84   | World Geodetic System 1984  |
|             | fast              | Number of times to repeat LLDP frame transmission at fast start<br><br><v_1_to_10> : <1-10>   |   |
|             | location-tlv      | LLDP-MED Location Type Length Value parameter   |   |
|             |                   | altitude  | Altitude parameter  |
|             |                   | civic-addr  | Civic address information and postal information  |
|             |                   | elin-addr   | Emergency Location Identification Number, (e.g. E911 and others), such as defined by TIA or NENA. |
|             |                   | latitude  | Latitude parameter  |
|             |                   | longitude   | Longitude parameter   |
|             | media-vlan-policy | Use the media-vlan-policy to create a policy, which can be assigned to an interface<br><br><Index : 0-31> : Policy id for the policy which is created |   |

### 3.17.3 lldp receive

|                    |  |
|--------------------|--|
| <b>Description</b> | Enable/Disable decoding of received LLDP frames. |
| <b>Syntax</b>      | lldp receive                                     |

### 3.17.4 lldp reinit <1-10>

| Description | LLDP tx reinitialization delay in seconds. |                             |
|-------------|--|-----------------------------|
| Syntax      | lldp reinit <1-10>                         |                             |
| Parameter   |  |                             |
|             | Name                                       | Description                 |
|             | <1-10>                                     | Reinitialization delay time |

### 3.17.5 lldp timer <5-32768>

|                    |  |
|--------------------|--|
| <b>Description</b> | Sets LLDP TX interval (The time between each LLDP frame transmitted) |
|--------------------|--|

|                  |                      |                    |
|------------------|----------------------|--------------------|
|                  | in seconds).         |                    |
| <b>Syntax</b>    | lldp timer <5-32768> |                    |
| <b>Parameter</b> |                      |                    |
|                  | <b>Name</b>          | <b>Description</b> |
|                  | <5-32768>            | 5-32768 seconds.   |
|                  |                      |                    |

### 3.17.6 lldp tlv-select

|                    |  |  |
|--------------------|--|--|
| <b>Description</b> | Which optional TLVs to transmit.   |  |
| <b>Syntax</b>      | lldp tlv-select { management-address   port-description   system-capabilities   system-description   system-name } |  |
| <b>Parameter</b>   |  |  |
|                    | <b>Name</b>  | <b>Description</b>                                 |
|                    | management-address   | Enable/Disable transmission of management address  |
|                    | port-description   | Enable/Disable transmission of port description    |
|                    | system-capabilities  | Enable/Disable transmission of system capabilities |
|                    | system-description   | Enable/Disable transmission of system description  |
|                    | system-name  | Enable/Disable transmission of system name.        |

### 3.17.7 lldp transmission-delay

|                    |   |                            |
|--------------------|---|----------------------------|
| <b>Description</b> | Sets LLDP transmission-delay. LLDP transmission delay (the amount of time that the transmission of LLDP frames will be delayed after LLDP configuration has changed) in seconds.) |                            |
| <b>Syntax</b>      | lldp transmission-delay <1-8192>  |                            |
| <b>Parameter</b>   |   |                            |
|                    | <b>Name</b>   | <b>Description</b>         |
|                    | <1-8192>  | transmission-delay seconds |
|                    |   |                            |

### 3.17.8 lldp transmit

|                    |  |
|--------------------|--|
| <b>Description</b> | Enable/Disabled transmission of LLDP frames. |
| <b>Syntax</b>      | lldp transmit                                |
| <b>Parameter</b>   |  |

## 3.18 GVRP Configure Commands

### 3.18.1 gvrp

|                    |                     |
|--------------------|---------------------|
| <b>Description</b> | Enable global gvrp. |
| <b>Syntax</b>      | gvrp                |
| <b>Parameter</b>   |                     |

### 3.18.2 gvrp max-vlans

|                    |                              |                               |
|--------------------|------------------------------|-------------------------------|
| <b>Description</b> | gvrp maximum number of VLANs |                               |
| <b>Syntax</b>      | gvrp max-vlans <1-4095>      |                               |
| <b>Parameter</b>   |                              |                               |
|                    | <b>Name</b>                  | <b>Description</b>            |
|                    | <1-4095>                     | A valid range is from 1-4095. |
|                    |                              |                               |

### 3.18.3 gvrp time { [ join-time <1-20> ] [ leave-time <60-300> ] [ leave-all-time <1000-50> ] }

|                    |   |   |
|--------------------|---|---|
| <b>Description</b> | Set gvrp time   |   |
| <b>Syntax</b>      | gvrp time { [ join-time <1-20> ] [ leave-time <60-300> ] [ leave-all-time <1000-5000> ] } |   |
| <b>Parameter</b>   |   |   |
|                    | <b>Name</b>   | <b>Description</b>                          |
|                    | 1-20  | join timer, available from 1 to 20          |
|                    | 60-300  | leave timer, available from 60 to 300       |
|                    | 1000-5000   | leaveall timer, available from 1000 to 5000 |

## 3.19 Link state track Configure commands

### 3.19.1 Create group

|                    |                               |                              |
|--------------------|-------------------------------|------------------------------|
| <b>Description</b> | Create link state track group |                              |
| <b>Syntax</b>      | link state track <group_num>  |                              |
| <b>Parameter</b>   |                               |                              |
|                    | <b>Name</b>                   | <b>Description</b>           |
|                    | group_num                     | link state track group <1-2> |

### 3.19.2 Link state track config

|                    |  |                              |
|--------------------|--|------------------------------|
| <b>Description</b> | Link state track config in interface mode                          |                              |
| <b>Syntax</b>      | link state track group <group_num> { [ upstream ] [ downstream ] } |                              |
| <b>Parameter</b>   |  |                              |
|                    | <b>Name</b>  | <b>Description</b>           |
|                    | group_num  | Link state track group <1-2> |
|                    | upstream   | Upstream                     |
|                    | downstream   | Downstream                   |

## 3.20 Uddl Configure commands

### 3.20.1 Uddl enable

|                    |             |                    |
|--------------------|-------------|--------------------|
| <b>Description</b> | Enable uddl |                    |
| <b>Syntax</b>      | uddl enable |                    |
| <b>Parameter</b>   |             |                    |
|                    | <b>Name</b> | <b>Description</b> |
|                    | enable      | Enable uddl        |

### 3.20.2 Uddl mode

|                    |                             |                              |
|--------------------|-----------------------------|------------------------------|
| <b>Description</b> | Uddl config aggressive mode |                              |
| <b>Syntax</b>      | uddl aggressive             |                              |
| <b>Parameter</b>   |                             |                              |
|                    | <b>Name</b>                 | <b>Description</b>           |
|                    | group_num                   | link state track group <1-2> |
|                    | upstream                    | upstream                     |
|                    | downstream                  | downstream                   |

### 3.20.3 Uddl message timer-interval

|                    |                                    |                         |
|--------------------|------------------------------------|-------------------------|
| <b>Description</b> | Uddl config timer interval         |                         |
| <b>Syntax</b>      | message time-interval <v_interval> |                         |
| <b>Parameter</b>   |                                    |                         |
|                    | <b>Name</b>                        | <b>Description</b>      |
|                    | v_interval                         | message interval <7-90> |

## 3.21 Device Maintenance commands

### 3.21.1 Show version

|                    |                                   |                             |
|--------------------|-----------------------------------|-----------------------------|
| <b>Description</b> | Show device version               |                             |
| <b>Syntax</b>      | show { version   build   active } |                             |
| <b>Parameter</b>   |                                   |                             |
|                    | <b>Name</b>                       | <b>Description</b>          |
|                    | version                           | Version information         |
